TOOTH REFERRAL · SOCIAL POSTS

Not just a form: a system for your team · LinkedIn posts (3 carousels + 2 images)

LinkedIn posts to run alongside the three web-form videos. Each post has the slides, the LinkedIn caption (with the hook first), hashtags and trending keywords. Slides are 1080 × 1350 (4:5); the PNG files are in **carousels/web-form-posts/slides/**.

How to post

- Upload the carousel as a **document** (the slides-only PDF) so it swipes in the feed; single images upload as images.
- Paste the caption as written and keep the 3 to 5 hashtags at the end.
- Put one or two of the trending keywords in the first comment, and reply to comments in the first hour.
- **Pair with the video:** post the carousel 2 to 3 days after its video, or pin the video in the comments.
- Best windows for dental audiences: Tuesday to Thursday, 7 to 9 am or 12 to 1 pm local time.

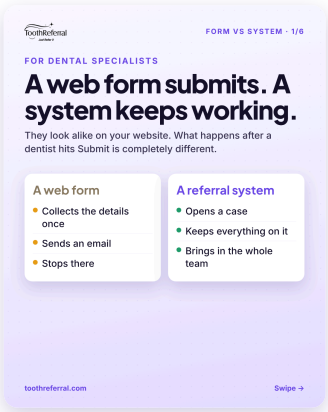

The posts

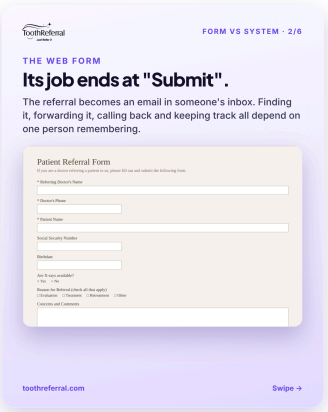

- **A web form submits. A system keeps working.** · Carousel · 6 slides · pairs with Buried in Emails v2 / Form vs Software
- **One referral, the whole team** · Carousel · 7 slides · pairs with Buried in Emails v2
- **Direct communication on the case** · Carousel · 6 slides · pairs with Same Referral, Two Ways
- **It's not just a form. It's a system for your team.** · Single image · pairs with all
- **Web form or system? 5 questions** · Single image · pairs with all

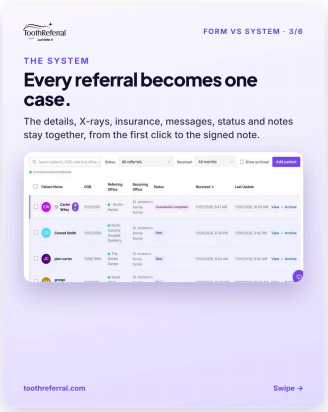

Claims match the sourced compare sheet; analytics numbers come from the canonical analytics reference. Offices, patients and staff in the examples are fictional. No competitors are named or shown.

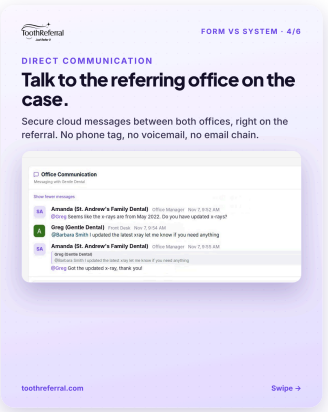

POST 1 · CAROUSEL · 6 SLIDES · PAIRS WITH BURIED IN EMAILS V2 / FORM VS SOFTWARE

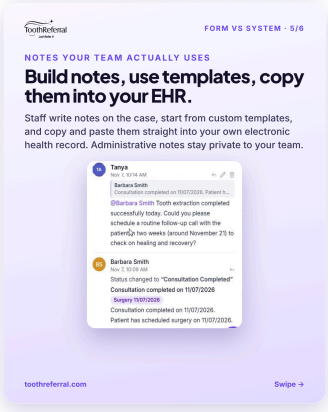

A web form submits. A system keeps working.

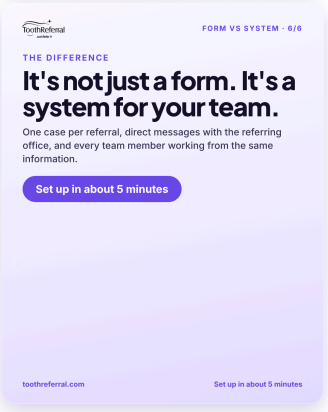

Hook (first line)

A web form and a referral system look the same on your website. They stop being the same the second someone hits Submit.

Caption

A web form and a referral system look the same on your website. They stop being the same the second someone hits Submit.

A web form has one job: collect the details once and send an email. After that, finding it, forwarding it, calling the patient and keeping the referring office posted all depend on someone remembering.

A referral system keeps working. Every referral becomes one case. The X-rays, insurance, messages, status and notes stay on it from the first click to the signed completion note. Your team talks to the referring office right on the case with secure cloud messages, and staff can build notes from templates and copy them straight into your EHR.

That's the difference we care about. It's not just a form. It's a system for your team.

Which one is on your website today?

web form vs referral system | dental referral software | referral management system | dental practice workflow | secure cloud messaging | EHR notes | dental team efficiency

Alt text: Carousel comparing a dental referral web form, which collects details once and sends an email, with the Tooth Referral system, which opens one case per referral with X-rays, insurance, secure messages with the referring office, notes and templates, for the whole team.

ToothReferral
Just Refer it

FOR DENTAL SPECIALISTS

A web form submits. A system keeps working.

They look alike on your website. What happens after a dentist hits Submit is completely different.

A web form

- Collects the details once
- Sends an email
- Stops there

A referral system

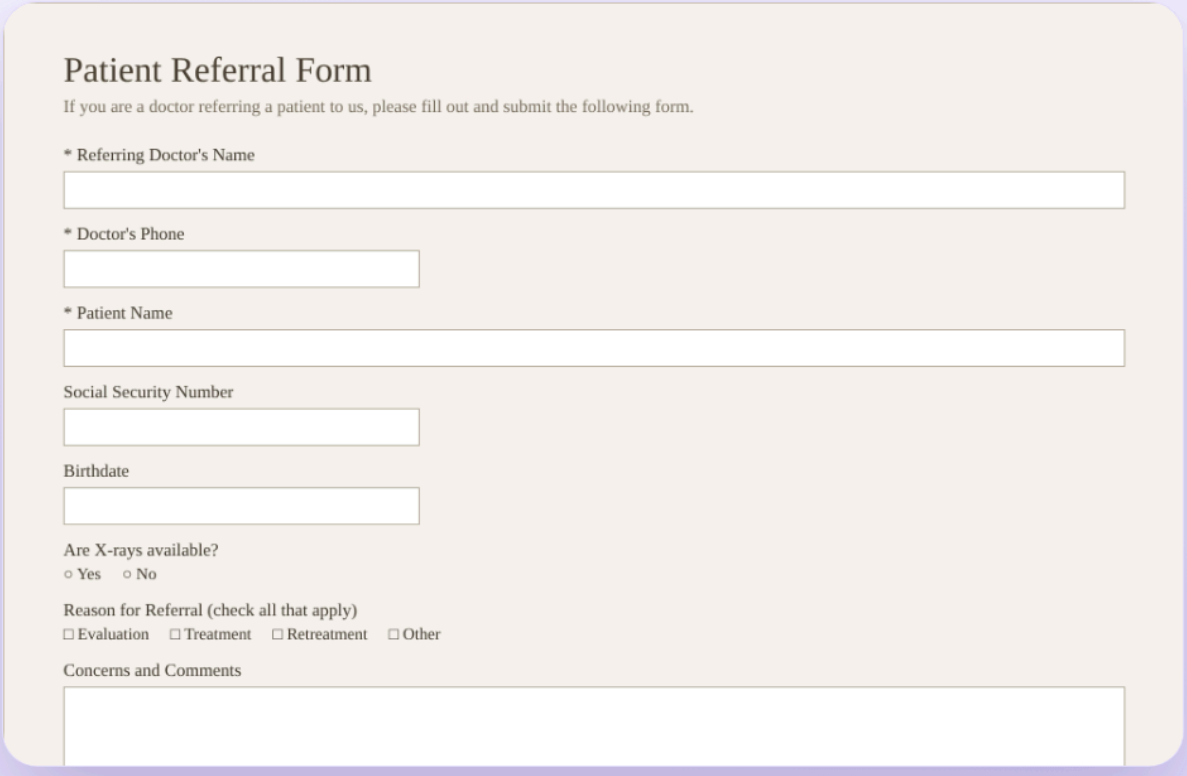

- Opens a case
- Keeps everything on it
- Brings in the whole team

ToothReferral
Just Refer it

THE WEB FORM

Its job ends at "Submit".

The referral becomes an email in someone's inbox. Finding it, forwarding it, calling back and keeping track all depend on one person remembering.

Patient Referral Form

If you are a doctor referring a patient to us, please fill out and submit the following form.

* Referring Doctor's Name

* Doctor's Phone

* Patient Name

Social Security Number

Birthdate

Are X-rays available?
○ Yes ○ No

Reason for Referral (check all that apply)
☐ Evaluation ☐ Treatment ☐ Retreatment ☐ Other

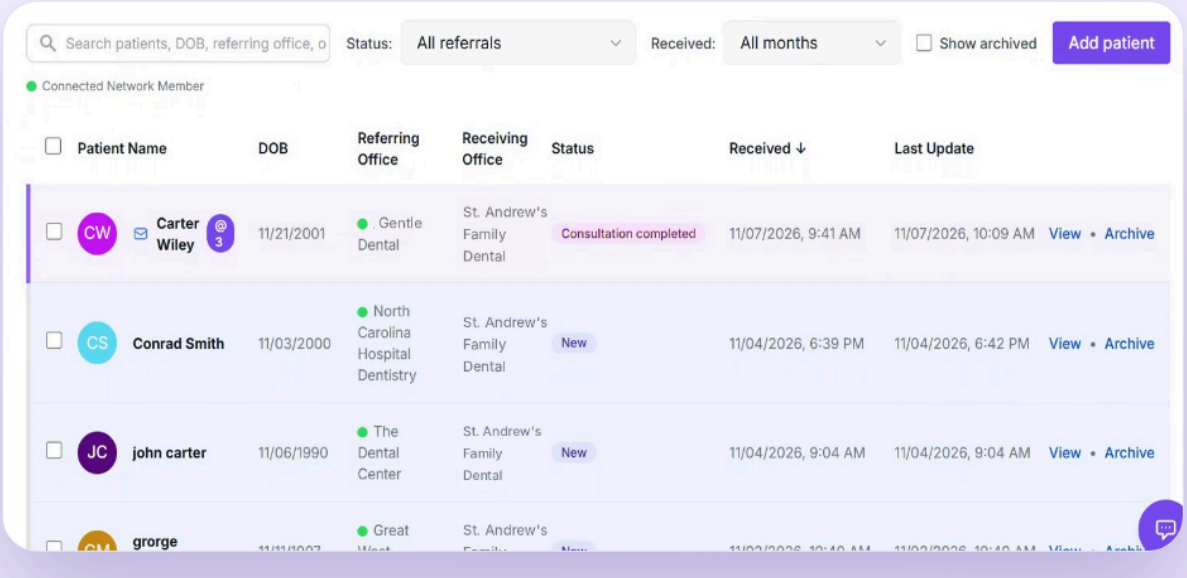

Concerns and Comments

ToothReferral
Just Refer it

THE SYSTEM

Every referral becomes one case.

The details, X-rays, insurance, messages, status and notes stay together, from the first click to the signed note.

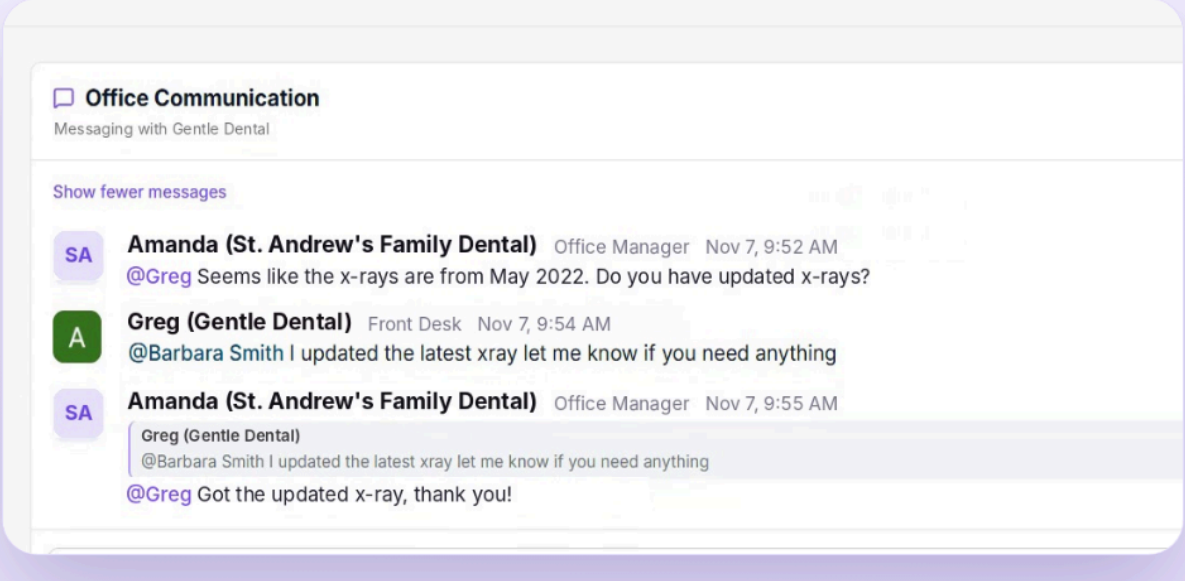

ToothReferral
Just Refer it

DIRECT COMMUNICATION

Talk to the referring office on the case.

Secure cloud messages between both offices, right on the referral. No phone tag, no voicemail, no email chain.

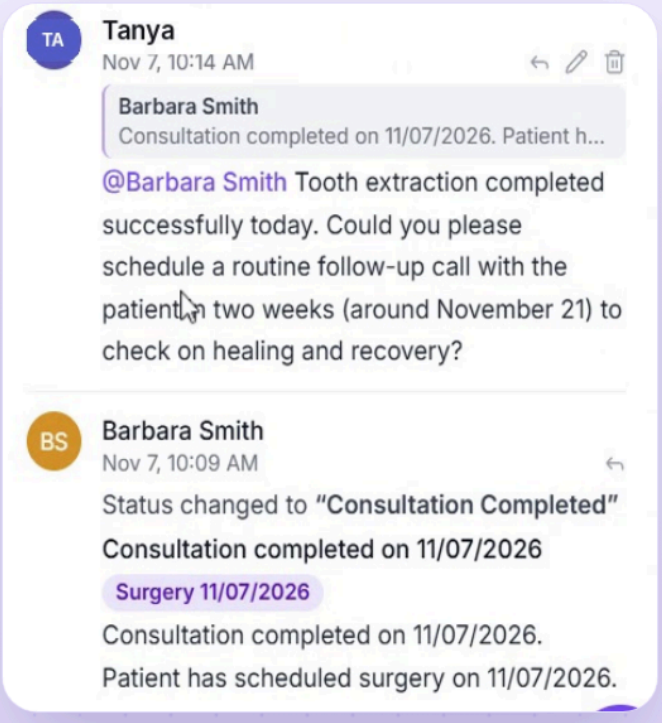

ToothReferral
Just Refer it

NOTES YOUR TEAM ACTUALLY USES

Build notes, use templates, copy them into your EHR.

Staff write notes on the case, start from custom templates, and copy and paste them straight into your own electronic health record. Administrative notes stay private to your team.

ToothReferral
Just Refer it

THE DIFFERENCE

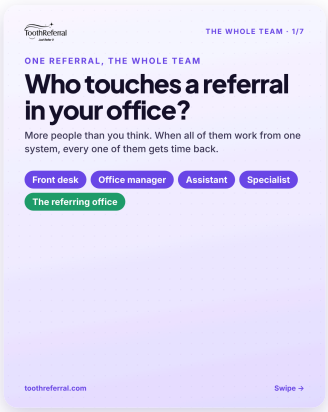

It's not just a form. It's a system for your team.

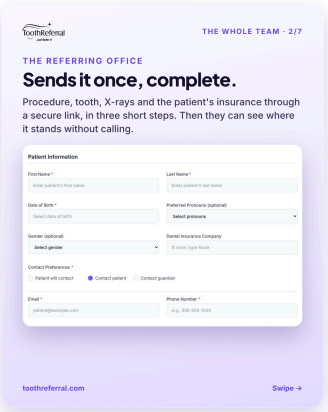

One case per referral, direct messages with the referring office, and every team member working from the same information.

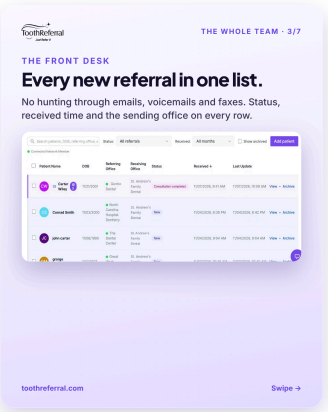

Set up in about 5 minutes

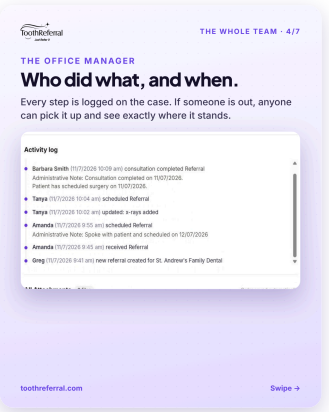

POST 2 · CAROUSEL · 7 SLIDES · PAIRS WITH BURIED IN EMAILS V2

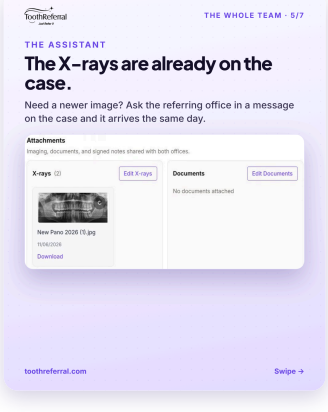

One referral, the whole team

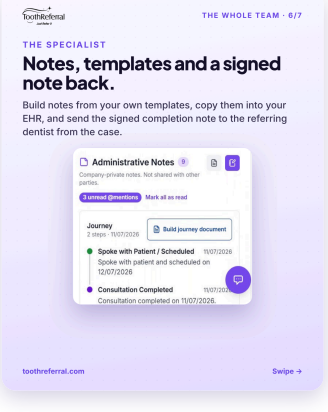

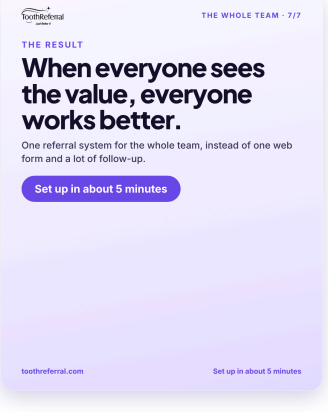

Hook (first line)

Count the people who touch one referral in your office. It's more than you think.

Caption

Count the people who touch one referral in your office. It's more than you think.

The referring office sends it. The front desk finds it and calls the patient. The office manager makes sure nothing slips. The assistant needs the X-rays. The specialist writes the notes and sends the completion note back.

With a web form, each of them is working from a different email, phone message or sticky note. With Tooth Referral, they all work from the same case:

• the referring office sends it complete, and sees the status without calling
• the front desk has every new referral in one list
• the office manager can see who did what, and anyone can pick a case up when someone is out
• the assistant has the X-rays on the case, and can ask for a newer one in a message
• the specialist builds notes from templates, copies them into the EHR, and sends the signed note back

When every team member sees the value, the whole office runs better. That's what a referral system is for.

ONE REFERRAL, THE WHOLE TEAM

Who touches a referral in your office?

More people than you think. When all of them work from one system, every one of them gets time back.

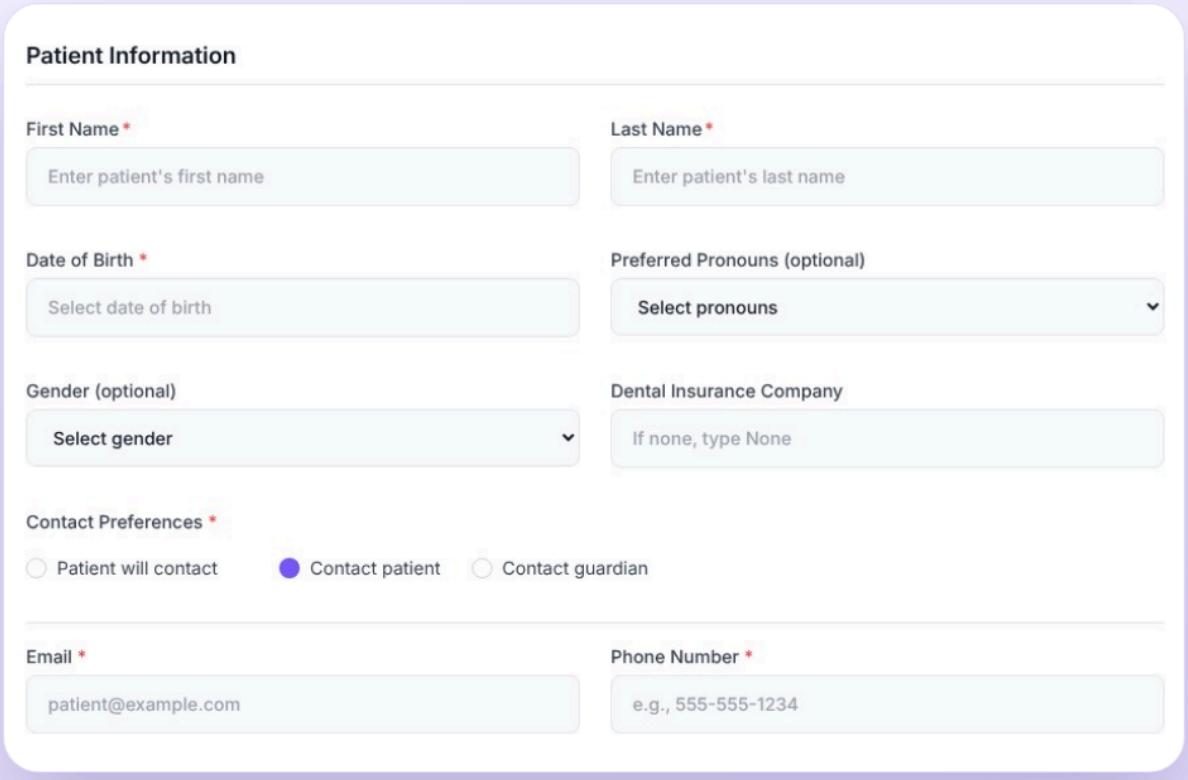

- Front desk
- Office manager
- Assistant
- Specialist
- The referring office

ToothReferral
Just Refer it

THE REFERRING OFFICE

Sends it once, complete.

Procedure, tooth, X-rays and the patient's insurance through a secure link, in three short steps. Then they can see where it stands without calling.

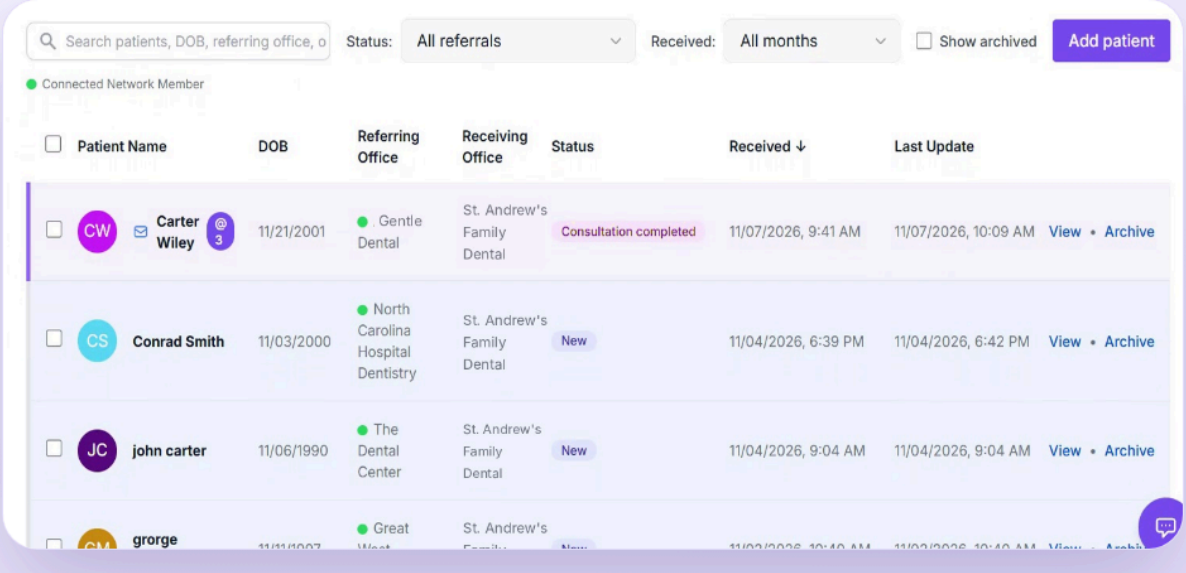

ToothReferral
Just Refer it

THE FRONT DESK

Every new referral in one list.

No hunting through emails, voicemails and faxes. Status, received time and the sending office on every row.

ToothReferral
Just Refer it

THE OFFICE MANAGER

Who did what, and when.

Every step is logged on the case. If someone is out, anyone can pick it up and see exactly where it stands.

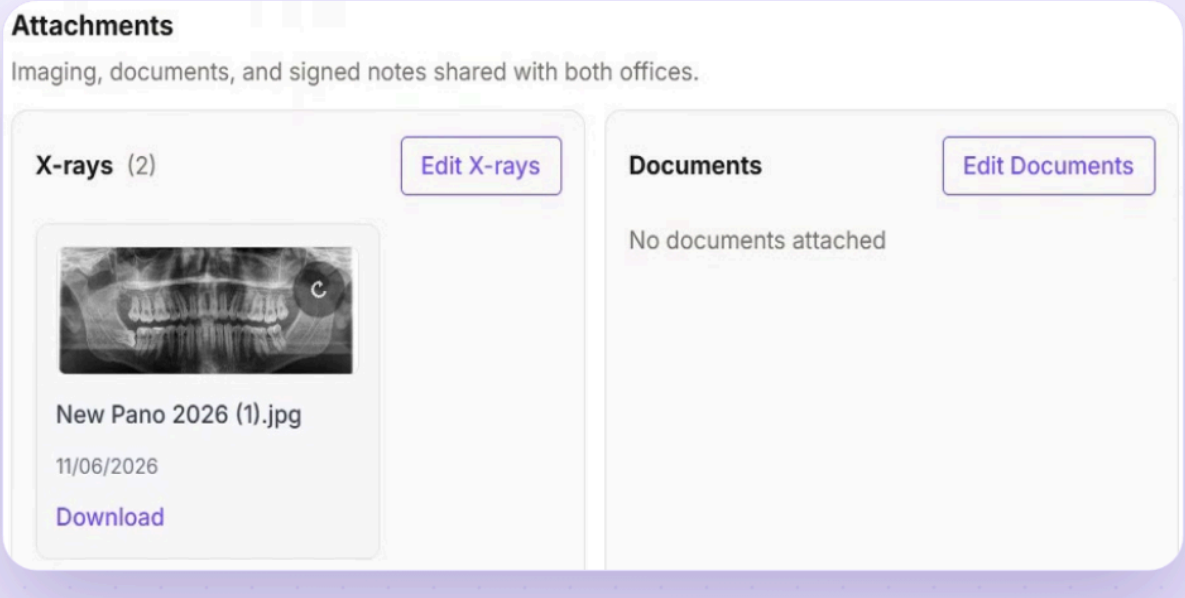

ToothReferral
Just Refer it

THE ASSISTANT

The X-rays are already on the case.

Need a newer image? Ask the referring office in a message on the case and it arrives the same day.

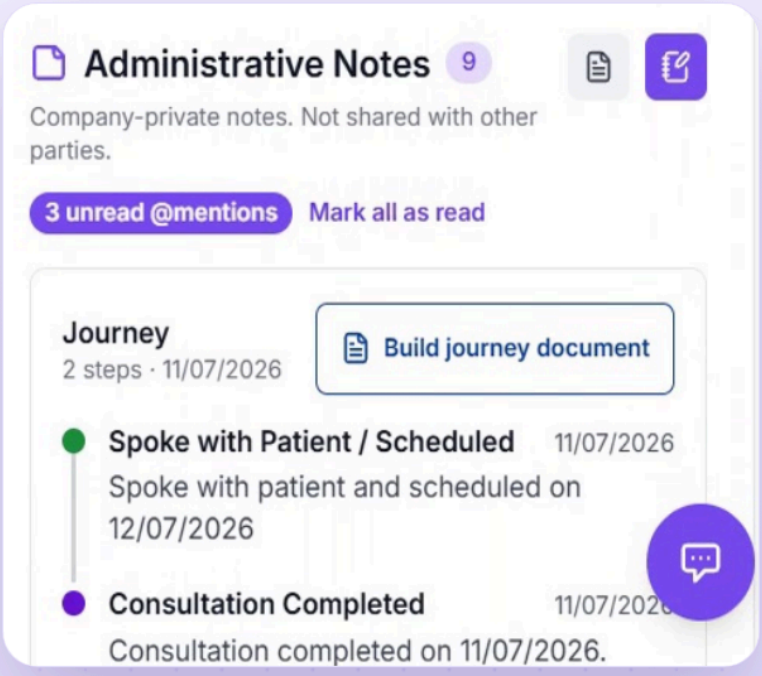

ToothReferral
Just Refer it

THE SPECIALIST

Notes, templates and a signed note back.

Build notes from your own templates, copy them into your EHR, and send the signed completion note to the referring dentist from the case.

ToothReferral
Just Refer it

THE RESULT

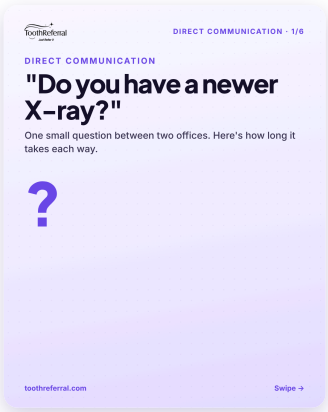

When everyone sees the value, everyone works better.

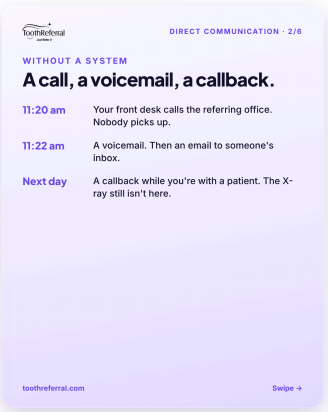

One referral system for the whole team, instead of one web form and a lot of follow-up.

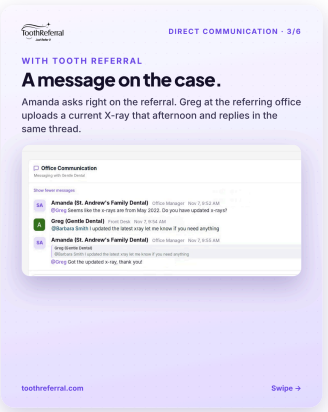

Set up in about 5 minutes

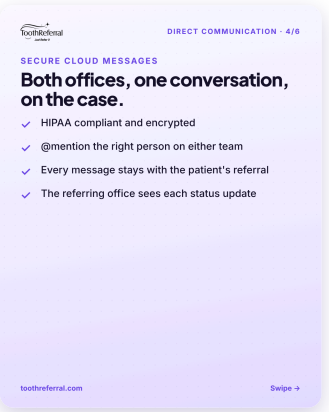

POST 3 · CAROUSEL · 6 SLIDES · PAIRS WITH SAME REFERRAL, TWO WAYS

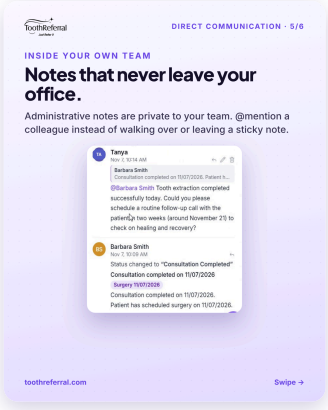

Direct communication on the case

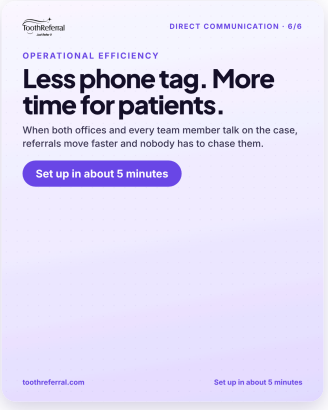

Hook (first line)

"Do you have a newer X-ray?" One small question between two offices. Here's how long it takes each way.

Caption

"Do you have a newer X-ray?" One small question between two offices. Here's how long it takes each way.

Without a system: a call that nobody picks up, a voicemail, an email to someone's inbox, and a callback the next day while you're with a patient.

With Tooth Referral: Amanda asks right on the referral. Greg at the referring office uploads a current X-ray that afternoon and replies in the same thread.

That's what direct communication looks like. Secure cloud messages between both offices, on the patient's case, HIPAA compliant and encrypted. Inside your own office, administrative notes stay private to your team, and you can @mention a colleague instead of leaving a sticky note.

Less phone tag, more time for patients, and referrals that keep moving.

DIRECT COMMUNICATION

"Do you have a newer X-ray?"

One small question between two offices. Here's how long it takes each way.

?

ToothReferral
Just Refer it

WITHOUT A SYSTEM

A call, a voicemail, a callback.

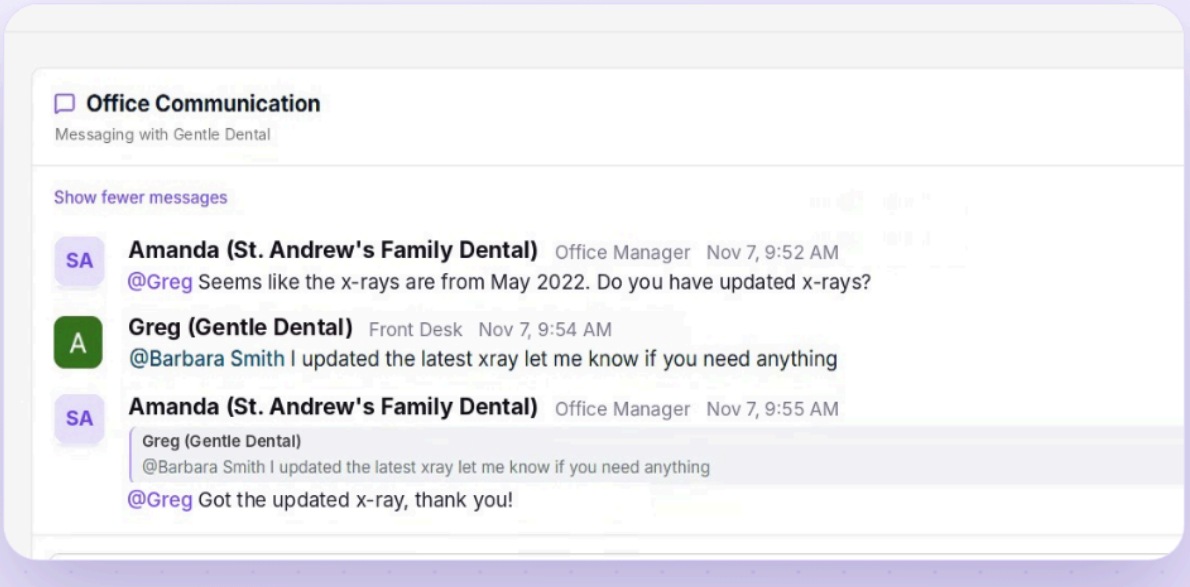

11:20 am	Your front desk calls the referring office. Nobody picks up.
11:22 am	A voicemail. Then an email to someone's inbox.
Next day	A callback while you're with a patient. The X-ray still isn't here.

ToothReferral
Just Refer it

WITH TOOTH REFERRAL

A message on the case.

Amanda asks right on the referral. Greg at the referring office uploads a current X-ray that afternoon and replies in the same thread.

ToothReferral
Just Refer it

SECURE CLOUD MESSAGES

Both offices, one conversation, on the case.

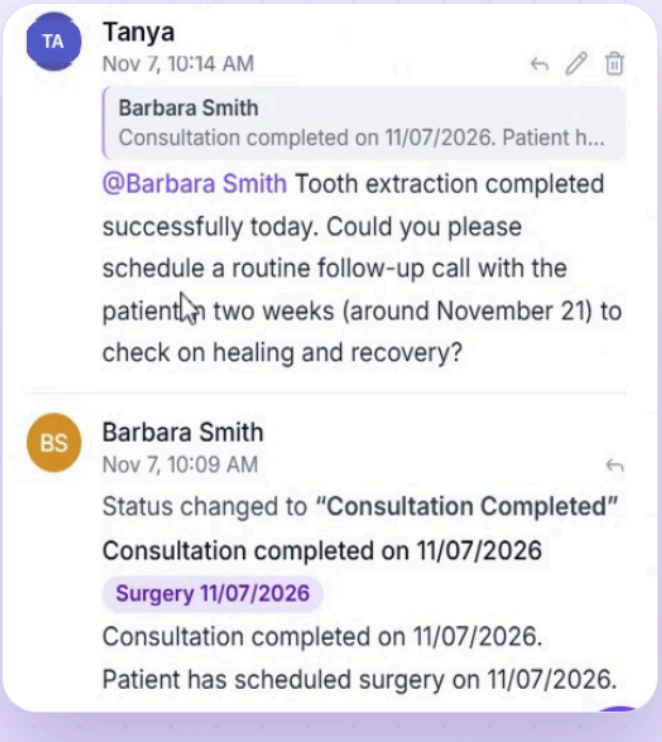

- HIPAA compliant and encrypted
- @mention the right person on either team
- Every message stays with the patient's referral
- The referring office sees each status update

ToothReferral
Just Refer it

INSIDE YOUR OWN TEAM

Notes that never leave your office.

Administrative notes are private to your team. @mention a colleague instead of walking over or leaving a sticky note.

ToothReferral
Just Refer it

OPERATIONAL EFFICIENCY

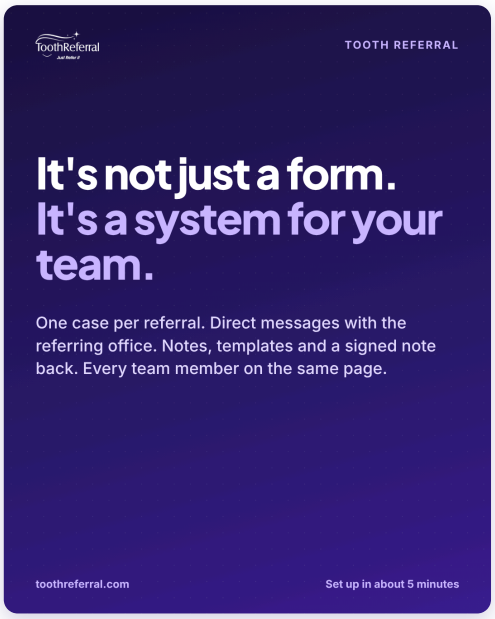

Less phone tag. More time for patients.

When both offices and every team member talk on the case, referrals move faster and nobody has to chase them.

It's not just a form. It's a system for your team.

Hook (first line)

It's not just a form. It's a system for your team.

Caption

It's not just a form. It's a system for your team.

A web form collects a referral. A referral system runs it: one case per referral, direct messages with the referring office, notes and templates that go straight into your EHR, and a signed completion note back to the dentist.

When every team member works from the same case, nobody chases anything.

Web form or system? 5 questions

Hook (first line)

Web form or referral system? Five questions tell you which one you have.

Caption

Web form or referral system? Five questions tell you which one you have:

1. Does each referral become one case, or one more email?
2. Can you message the referring office right on the referral?
3. Can anyone on your team pick it up and see where it stands?
4. Can staff build notes from templates and copy them into your EHR?
5. Does a signed completion note go back when treatment is done?

Mostly no? You have a web form, not a referral system. Tooth Referral is yes to all five, and it takes about five minutes to set up.
