ONE REFERRAL, THE WHOLE TEAM

Who touches a referral in your office?

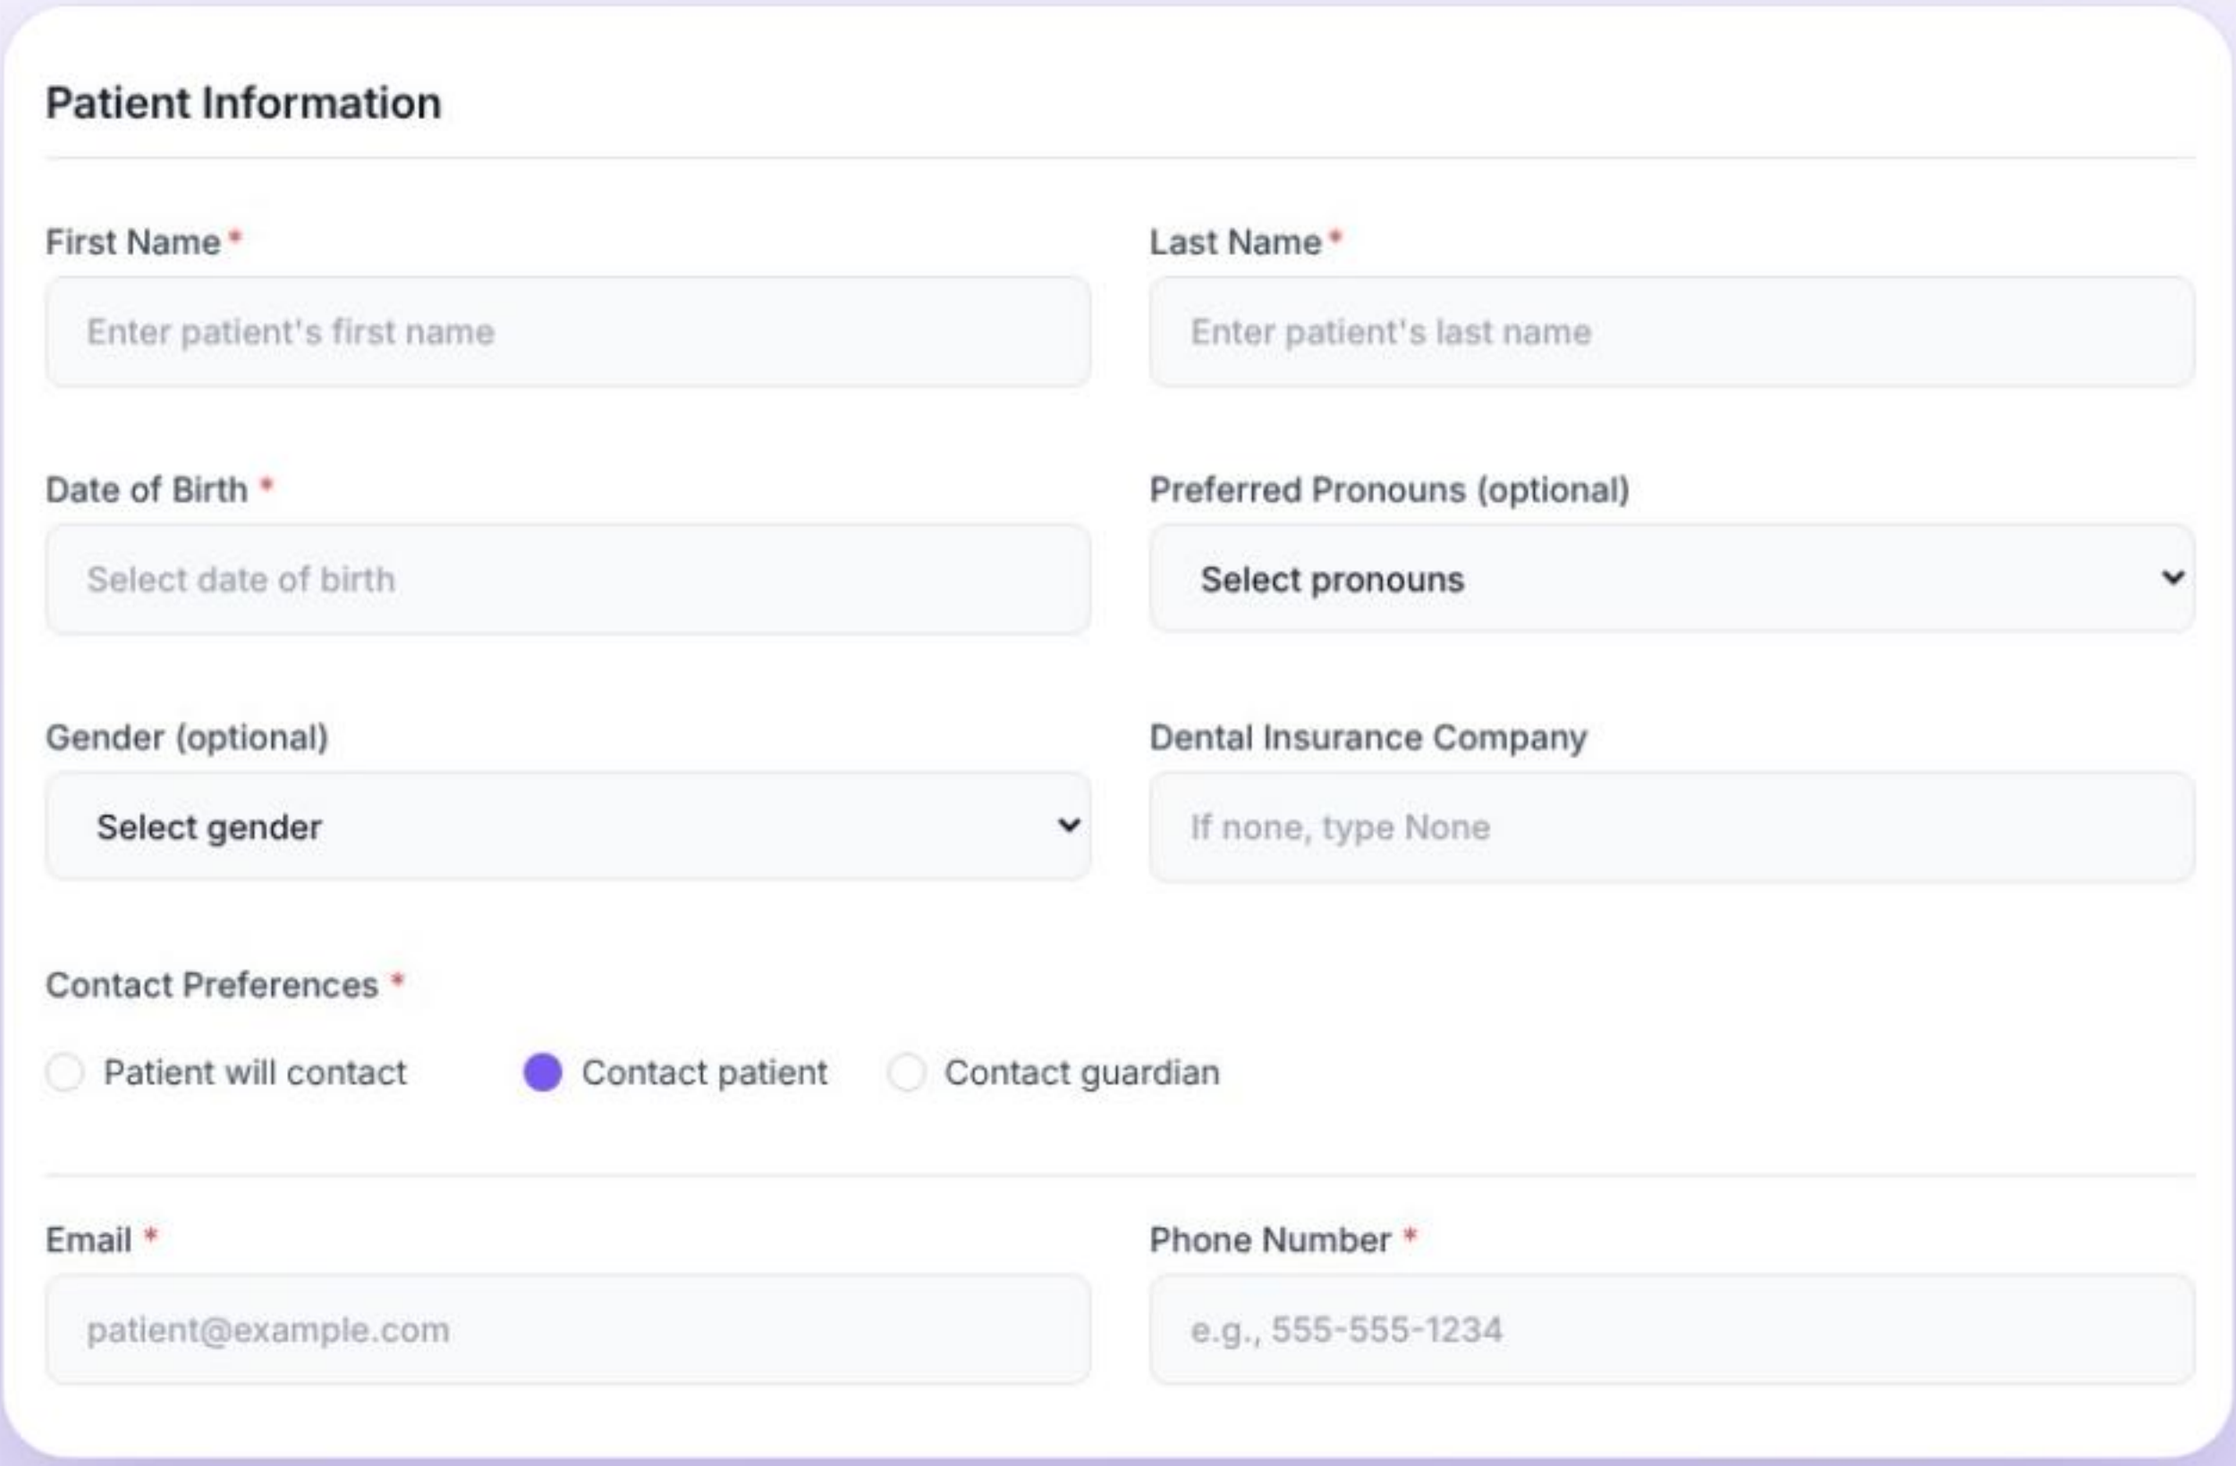

More people than you think. When all of them work from one system, every one of them gets time back.

- Front desk
- Office manager
- Assistant
- Specialist
- The referring office

THE REFERRING OFFICE

Sends it once, complete.

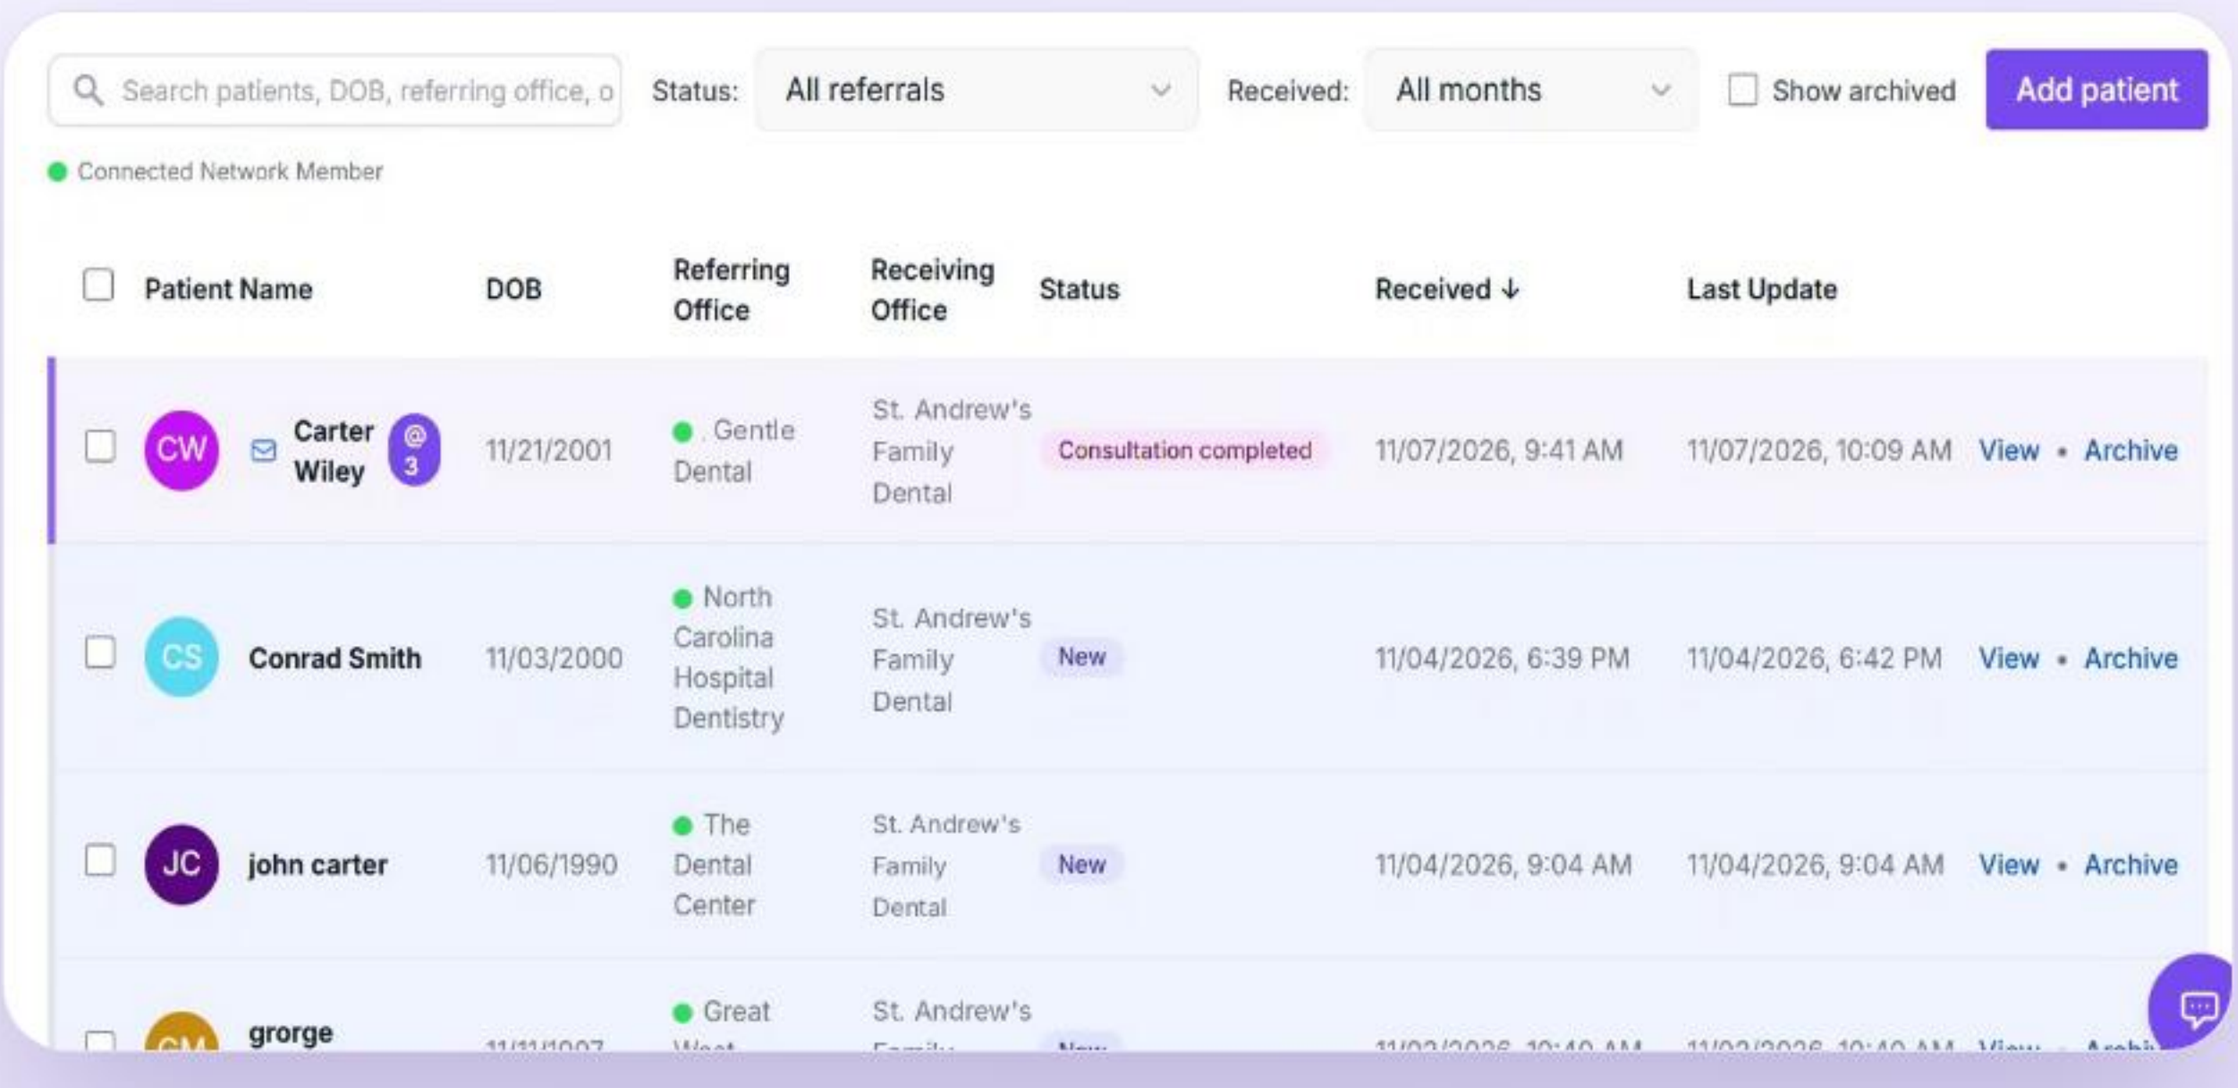

Procedure, tooth, X-rays and the patient's insurance through a secure link, in three short steps. Then they can see where it stands without calling.

THE FRONT DESK

Every new referral in one list.

No hunting through emails, voicemails and faxes. Status, received time and the sending office on every row.

THE OFFICE MANAGER

Who did what, and when.

Every step is logged on the case. If someone is out, anyone can pick it up and see exactly where it stands.

Activity log

- **Barbara Smith** (11/7/2026 10:09 am) consultation completed Referral
  Administrative Note: Consultation completed on 11/07/2026.
  Patient has scheduled surgery on 11/07/2026.
- **Tanya** (11/7/2026 10:04 am) scheduled Referral
- **Tanya** (11/7/2026 10:02 am) updated: x-rays added
- **Amanda** (11/7/2026 9:55 am) scheduled Referral
  Administrative Note: Spoke with patient and scheduled on 12/07/2026
- **Amanda** (11/7/2026 9:45 am) received Referral
- **Greg** (11/7/2026 9:41 am) new referral created for St. Andrew's Family Dental

THE ASSISTANT

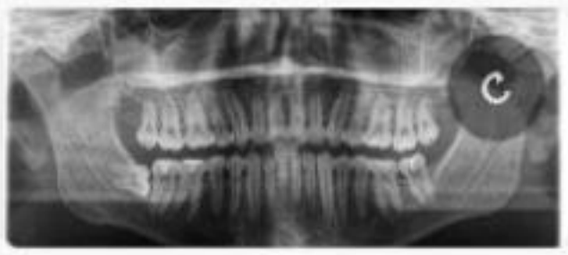

The X-rays are already on the case.

Need a newer image? Ask the referring office in a message on the case and it arrives the same day.

Attachments

Imaging, documents, and signed notes shared with both offices.

THE SPECIALIST

Notes, templates and a signed note back.

Build notes from your own templates, copy them into your EHR, and send the signed completion note to the referring dentist from the case.

THE RESULT

When everyone sees the value, everyone works better.

One referral system for the whole team, instead of one web form and a lot of follow-up.

Set up in about 5 minutes
