DIRECT COMMUNICATION

"Do you have a newer X-ray?"

One small question between two offices. Here's how long it takes each way.

?

WITHOUT A SYSTEM

A call, a voicemail, a callback.

11:20 am Your front desk calls the referring office. Nobody picks up.

11:22 am A voicemail. Then an email to someone's inbox.

Next day A callback while you're with a patient. The X-ray still isn't here.

WITH TOOTH REFERRAL

A message on the case.

Amanda asks right on the referral. Greg at the referring office uploads a current X-ray that afternoon and replies in the same thread.

SA **Amanda (St. Andrew's Family Dental)** Office Manager Nov 7, 9:52 AM
@Greg Seems like the x-rays are from May 2022. Do you have updated x-rays?

A **Greg (Gentle Dental)** Front Desk Nov 7, 9:54 AM
@Barbara Smith I updated the latest xray let me know if you need anything

SA **Amanda (St. Andrew's Family Dental)** Office Manager Nov 7, 9:55 AM
> Greg (Gentle Dental)
> @Barbara Smith I updated the latest xray let me know if you need anything

@Greg Got the updated x-ray, thank you!

SECURE CLOUD MESSAGES

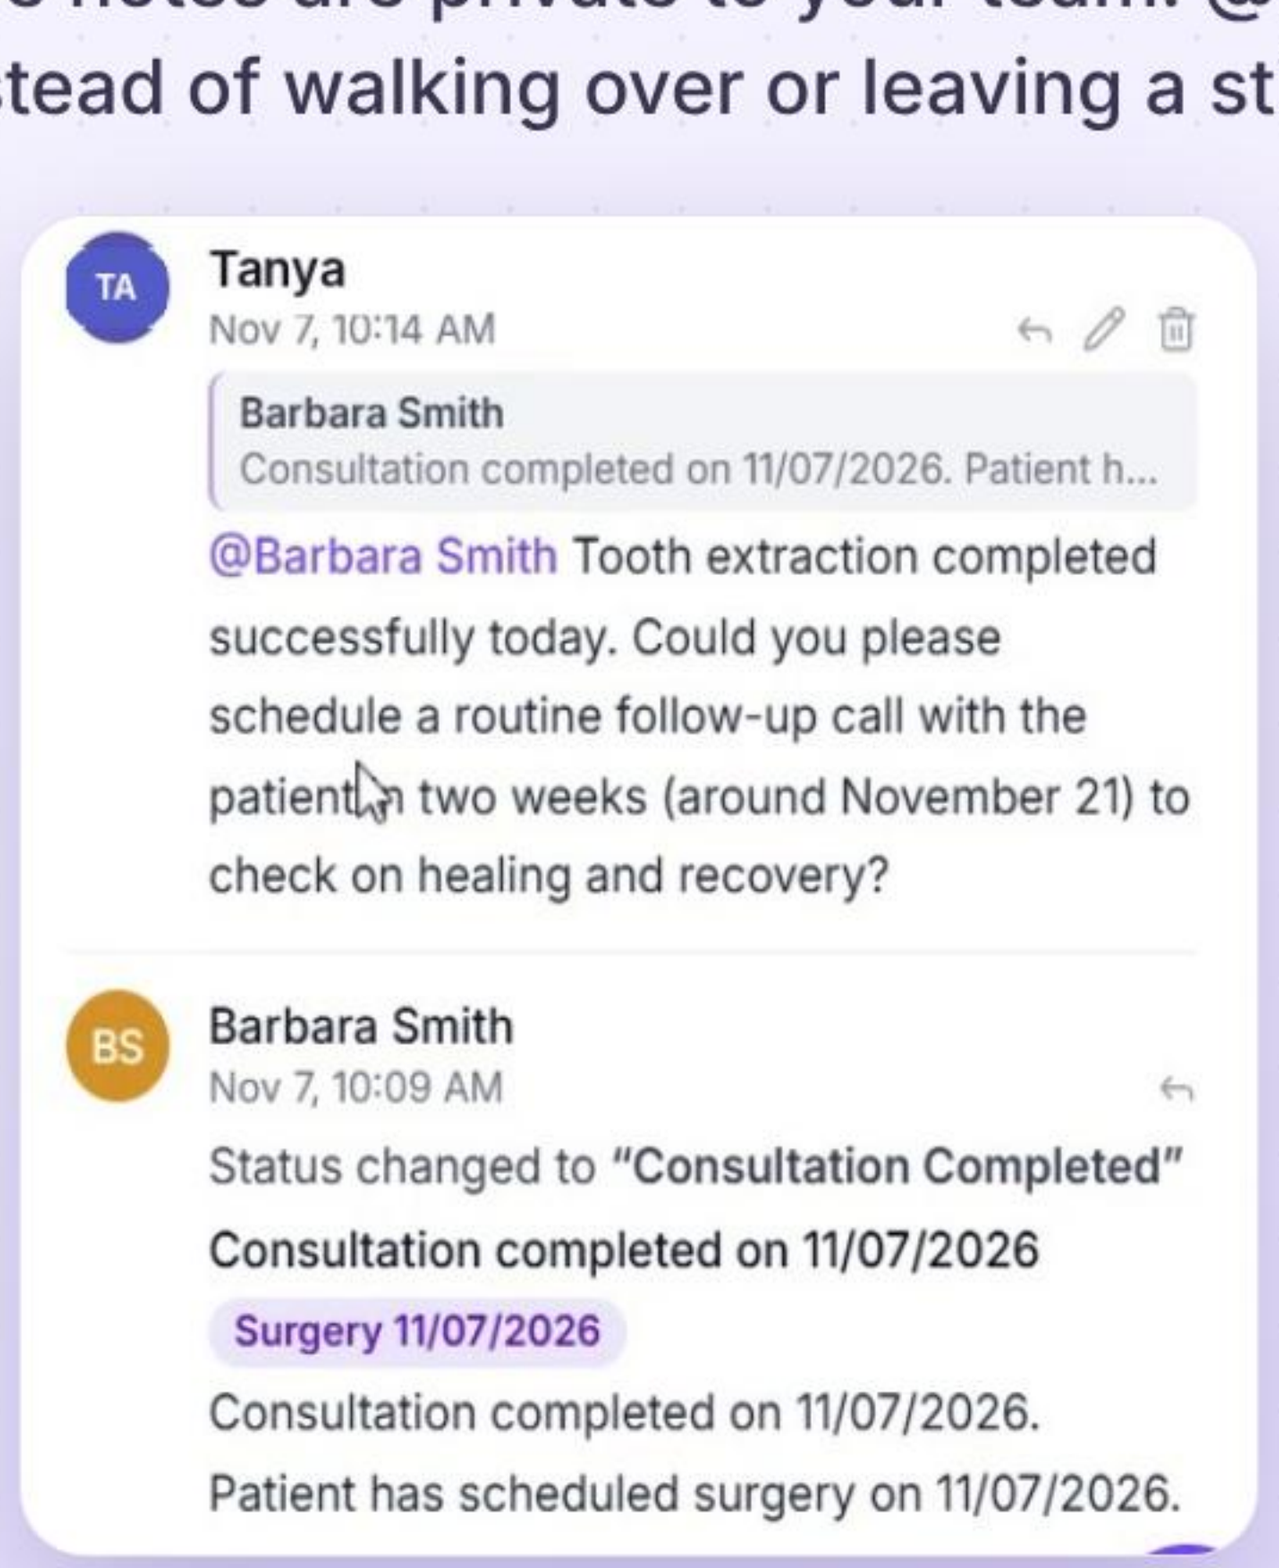

Both offices, one conversation, on the case.

- HIPAA compliant and encrypted
- @mention the right person on either team
- Every message stays with the patient's referral
- The referring office sees each status update

INSIDE YOUR OWN TEAM

Notes that never leave your office.

Administrative notes are private to your team. @mention a colleague instead of walking over or leaving a sticky note.

OPERATIONAL EFFICIENCY

Less phone tag. More time for patients.

When both offices and every team member talk on the case, referrals move faster and nobody has to chase them.
