Left On Read

about 75 s · 10 clips × 8 s | 184 words | Hook: "Most of you will skip this..." (hook reference library)

Awareness: slow first contact quietly kills referrals. Features: Time to first contact, the Status board, Staff responsiveness, status updates the GP sees. GP value: no check-in calls. ROI: even one referral that books covers the software for a whole year.

#	DIALOGUE (8 S)	EXPRESSION	ON SCREEN / EDIT
01	**"Most of you will skip this, which is ironic, because your referred patients are skipping you too."**	Deadpan, a knowing half-smile	Red flash · stacked text MOST OF YOU WILL SKIP THIS · a fake "skip ad" button that he ignores
02	**"A GP sends you a patient. Your office calls back two days later. That's not a callback, that's a pen pal."**	Matter-of-fact, then a dry smirk on "pen pal"	Referral card lands · a clock spins to "2 days" · a postage-stamp "pen pal" sticker slaps on
03	**"In dating, waiting two days to reply means you're not interested. Patients read it exactly the same way."**	Playful, then a pointed look	Phone chat bubble "seen 2 days ago" · status flips to "not interested"
04	**"Here's the real cost: every hour your front desk spends chasing callbacks is payroll, and every cold referral is lost production."**	Humour drops; sincere, leaning in	A payroll clock ticks up on the front desk · a referral card cools from warm to cold · "lost production" in red
05	**"ToothReferral's analytics shows your exact time to first contact. Spoiler: it's usually longer than anyone thinks."**	Curious, then a playful wince on "Spoiler"	Split screen: the real Time to first contact card counting up, highlighted · a "longer than you think" tag
06	**"The referring GP sees every status update too, so their front desk never has to call yours to check."**	Warm, reassuring	Split view: the GP office's side, status pills updating Received → Consultation Scheduled · a phone with "no check-in call needed"
07	**"The status board shows who's stuck in Callback Requested or Unable to Contact, and exactly how long they've waited."**	Practical, slightly concerned	Status board: Callback Requested and Unable to Contact cards highlighted with their wait times
08	**"So the front desk stops guessing: they see who to call next, and staff responsiveness shows who actually did."**	Relieved, then a knowing grin	Status board card "Callback Requested" → "call next" · Staff responsiveness table: log-ins, avg time, changes
09	**"The return? Call faster, book more. Even one referral that books covers the software for the whole year."**	Confident, holding up one finger	"seen" bubble turns into "Consultation Scheduled ✓" · "1 referral = a full year covered" with 12 months filling in
10	**"Start your free ToothReferral trial today, and stop leaving your referrals, and your GPs, on read."**	Warm, a playful wink	Read receipt turns into a green "replied" tick → logo, "Start your free trial" button, end card

What they get · why they need it (ROI) · value for the GP office · free trial

The Insurance Scavenger Hunt

about 75 s · 10 clips × 8 s | 174 words | Hook: "I have a question..." (hook reference library)

Awareness: chasing insurance and paperwork stalls consults. Features: insurance cards on the referral, Request from patient, Needs attention reminders, signed consultation notes. GP value: no refaxing, no chasing notes. ROI: even one case that doesn't stall covers the software for a whole year.

#	DIALOGUE (8 S)	EXPRESSION	ON SCREEN / EDIT
01	**“I have a question: why does getting a patient's insurance card feel like a scavenger hunt with hold music?”**	Genuinely puzzled, eyebrows up	Red flash · stacked text I HAVE A QUESTION · a treasure-map icon with a dotted trail
02	**“Call the patient. Leave a voicemail. Call the GP. They fax it. Sideways. Upside down. Somehow, the back is missing.”**	Escalating exasperation, counting on fingers	Each step pops as a map stop · a sideways fax spins upside down · “back side: missing”
03	**“Meanwhile the consult sits in limbo, and your front desk becomes a full-time insurance detective.”**	Dry, mock-serious	A magnifying glass and detective hat drop onto the front desk · status “Waiting on insurance”
04	**“That costs real money: hours of front-desk payroll on hold music, and every stalled case is an empty chair.”**	Humour drops; serious	A payroll clock ticks over hold music notes · an empty dental chair · a calendar slot greys out
05	**“With ToothReferral, insurance cards live right on the referral, front and back, next to the X-rays.”**	Relieved, bright	Split screen: the real Insurance cards section, card flips front to back
06	**“Missing one? Hit Request from patient. They send it straight in, and the GP's office never refaxes anything.”**	Easy, a satisfied nod	Cursor clicks “Request from patient” · the card slides in · the GP's fax machine gets a “retired” tag
07	**“And Needs attention flags any insurance request older than forty-eight hours. One click sends a reminder.”**	Practical	Needs attention row “insurance requests outstanding, older than 48 h” · cursor clicks “Send reminder”
08	**“After the visit, a signed consultation note goes straight to the GP. Their office never chases you for it.”**	Pleased, explaining	Prepare Consultation Note filling in the patient and referring doctor · DocuSign signed · “sent to the GP ✓”
09	**“The return: even one case that doesn't stall on paperwork covers the software for the whole year.”**	Confident, holding up one finger	“1 case saved = a full year covered” with 12 months filling in
10	**“Start your free ToothReferral trial today, and call off the insurance scavenger hunt for good.”**	Warm, playful	The treasure map folds up, stamped FOUND → logo, “Start your free trial” button, end card
