The Phone-Tag Funeral

Deadpan, cheeky, a little rude. He mock-buries the old email-and-phone-tag system, then calmly walks through what replaced it.

LENGTH	MADE IN	GOAL
8 clips × 8 s = 64 s	Google Flow, one 8 s clip per segment	Awareness and value, not a sale: no prices, no sign-up

Why this version

The 'funeral' gives the hook a visual joke (RIP card, tossing the phone) and a clean turn into the dashboard.

The whole script at a glance

00-08 s	**Hook** · “Still doing referrals by email and phone tag? Damn. That's not a system. That's a shitty game of telephone.”
08-16 s	**The turn** · “So let's bury it. Here's the new way: every referral, from every office, lands in one place.”
16-24 s	**The board** · “This is the incoming referrals board. Who sent it, when it came in, and where it's at.”
24-32 s	**The network** · “See the green dot? That's a connected office. Your whole referral network, in one inbox.”
32-40 s	**Talk inside the case** · “Open a referral and you're talking straight to the GP. Need a different X-ray? Ask right here.”
40-48 s	**Everything shared** · “X-rays, insurance cards, notes, shared with both offices. No more "did you get my fax?" bullshit.”
48-56 s	**Status that travels** · “Update the status, and the referring office gets notified. Everyone knows where the patient is.”
56-64 s	**Close** · “That's the point. Less phone tag, more trust between offices. A referral network that actually feels like one.”

Presenter and set (already written into every prompt)

Same presenter and set as the earlier ToothReferral videos (swap in your avatar's own description if it differs): a man in his early 30s, short dark textured hair, light stubble, grey knit crew-neck sweater, black podcast mic on a boom arm entering from frame left, warm home studio behind him (wooden shelf with plants, Edison-bulb lamps, soft purple-blue wall light). Vertical 9:16, medium close-up from mid-chest up, eye level, camera locked off, the same framing in every clip.

Before you generate

- **One clip = one segment = 8 seconds.** Keep every line to the words written (14 to 20 words fits 8 s at a natural pace). Longer lines get rushed or cut.
- **Start and end every clip in the rest pose.** Hands relaxed at chest height, looking at camera, mouth closed for about half a second at the very start and end. This is what lets me join the clips so they feel like one take.
- **Gestures happen inside the frame, at chest-to-shoulder height.** A hand that leaves the frame cannot be tracked, and the animation that rides on it has nowhere to land.
- **Point at the same places every time.** Upper-left = where the dashboard panel will appear. Right side = where chat / notifications appear. Keep these consistent so the animations always land where he points.
- **Paste the dark 'Google Flow prompt' box as is, one box per clip.** Each box is complete on its own: presenter and set, camera, a second-by-second beat sheet of hand gestures with the words they land on, facial expression, head movement and the spoken line. The same prompts are in the matching -Flow-prompts.txt file, which copies cleaner than a PDF. If Flow blocks a swear word, use the clean line given at the end of that prompt.

Gesture key (what each gesture turns into in the edit)

POINT	index finger to a spot: a panel, callout or highlight appears there
SWIPE	flat hand across the body: the screen changes in that direction
COUNT	fingers 1-2-3: items pop in one per finger
TAP	a small forward finger tap in the air: a click / button press
PINCH-OUT	fingers spread apart: zoom into the dashboard
JOIN	hands come together / fingers interlock: offices connect into one network
TOSS	flick over the shoulder: the old way gets thrown out of frame

01 Hook 00-08 s
