The Referral Roast

Loud, comedic, roast energy. He roasts the fax-voicemail-sticky-note mess, then drops into an easy, almost relieved walkthrough.

LENGTH	MADE IN	GOAL
8 clips × 8 s = 64 s	Google Flow, one 8 s clip per segment	Awareness and value, not a sale: no prices, no sign-up

Why this version

Roasts stop the scroll. The contrast between chaos (fast, loud) and the dashboard (calm, clear) is the value message without selling.

The whole script at a glance

00-08 s	**Hook** · “Your referral process is fax paper, voicemail, and prayer. That's not a workflow. That's a hostage situation.”
08-16 s	**The mess** · “Every GP sends it differently. Email here, a call there, a sticky note somewhere. Hell. The patient just waits.”
16-24 s	**The clean-up** · “Now look at this. Incoming referrals: every office, every patient, one list. Breathe.”
24-32 s	**The network** · “Each office gets a green dot once it's connected. Build that network once, and referrals just flow in.”
32-40 s	**No detective work** · “Click one. Diagnosis, tooth numbers, what they want done. All there. No detective work required.”
40-48 s	**Like adults** · “Need a better X-ray? Message the referring office right inside the case. They answer. Like adults.”
48-56 s	**Zero phone tag** · “Update the status, schedule the consult, and the GP is notified. Zero phone tag. Zero "just checking in."”
56-64 s	**Close** · “That's what a referral network should feel like. Connected offices, one place, nobody left guessing.”

Presenter and set (already written into every prompt)

Same presenter and set as the earlier ToothReferral videos (swap in your avatar's own description if it differs): a man in his early 30s, short dark textured hair, light stubble, grey knit crew-neck sweater, black podcast mic on a boom arm entering from frame left, warm home studio behind him (wooden shelf with plants, Edison-bulb lamps, soft purple-blue wall light). Vertical 9:16, medium close-up from mid-chest up, eye level, camera locked off, the same framing in every clip.

Before you generate

- **One clip = one segment = 8 seconds.** Keep every line to the words written (14 to 20 words fits 8 s at a natural pace). Longer lines get rushed or cut.
- **Start and end every clip in the rest pose.** Hands relaxed at chest height, looking at camera, mouth closed for about half a second at the very start and end. This is what lets me join the clips so they feel like one take.
- **Gestures happen inside the frame, at chest-to-shoulder height.** A hand that leaves the frame cannot be tracked, and the animation that rides on it has nowhere to land.
- **Point at the same places every time.** Upper-left = where the dashboard panel will appear. Right side = where chat / notifications appear. Keep these consistent so the animations always land where he points.
- **Paste the dark 'Google Flow prompt' box as is, one box per clip.** Each box is complete on its own: presenter and set, camera, a second-by-second beat sheet of hand gestures with the words they land on, facial expression, head movement and the spoken line. The same prompts are in the matching -Flow-prompts.txt file, which copies cleaner than a PDF. If Flow blocks a swear word, use the clean line given at the end of that prompt.

Gesture key (what each gesture turns into in the edit)

POINT	index finger to a spot: a panel, callout or highlight appears there
SWIPE	flat hand across the body: the screen changes in that direction
COUNT	fingers 1-2-3: items pop in one per finger
TAP	a small forward finger tap in the air: a click / button press
PINCH-OUT	fingers spread apart: zoom into the dashboard
JOIN	hands come together / fingers interlock: offices connect into one network
TOSS	flick over the shoulder: the old way gets thrown out of frame
