POST 3 · CAROUSEL · 6 SLIDES · PAIRS WITH SAME REFERRAL, TWO WAYS

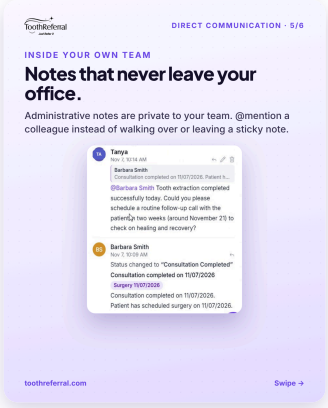

Direct communication on the case

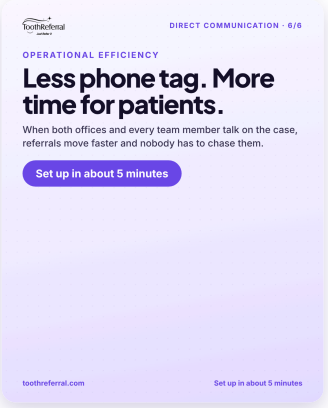

Hook (first line)

"Do you have a newer X-ray?" One small question between two offices. Here's how long it takes each way.

Caption

"Do you have a newer X-ray?" One small question between two offices. Here's how long it takes each way.

Without a system: a call that nobody picks up, a voicemail, an email to someone's inbox, and a callback the next day while you're with a patient.

With Tooth Referral: Amanda asks right on the referral. Greg at the referring office uploads a current X-ray that afternoon and replies in the same thread.

That's what direct communication looks like. Secure cloud messages between both offices, on the patient's case, HIPAA compliant and encrypted. Inside your own office, administrative notes stay private to your team, and you can @mention a colleague instead of leaving a sticky note.

Less phone tag, more time for patients, and referrals that keep moving.

DIRECT COMMUNICATION

"Do you have a newer X-ray?"

One small question between two offices. Here's how long it takes each way.

ToothReferral
Just Refer it

WITHOUT A SYSTEM

A call, a voicemail, a callback.

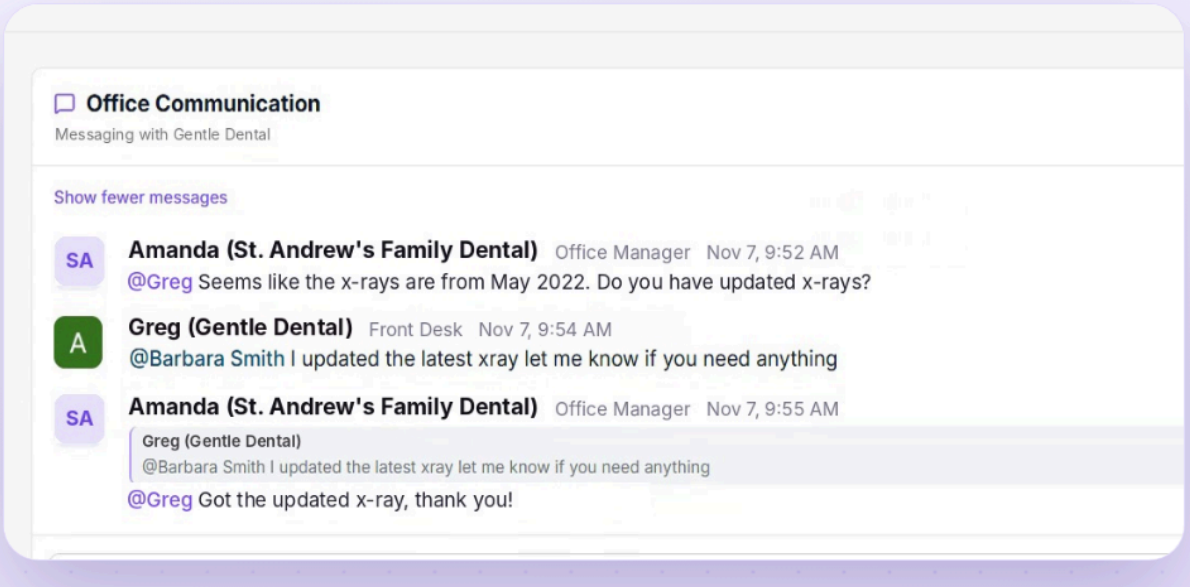

11:20 am	Your front desk calls the referring office. Nobody picks up.
11:22 am	A voicemail. Then an email to someone's inbox.
Next day	A callback while you're with a patient. The X-ray still isn't here.

WITH TOOTH REFERRAL

A message on the case.

Amanda asks right on the referral. Greg at the referring office uploads a current X-ray that afternoon and replies in the same thread.

SECURE CLOUD MESSAGES

Both offices, one conversation, on the case.

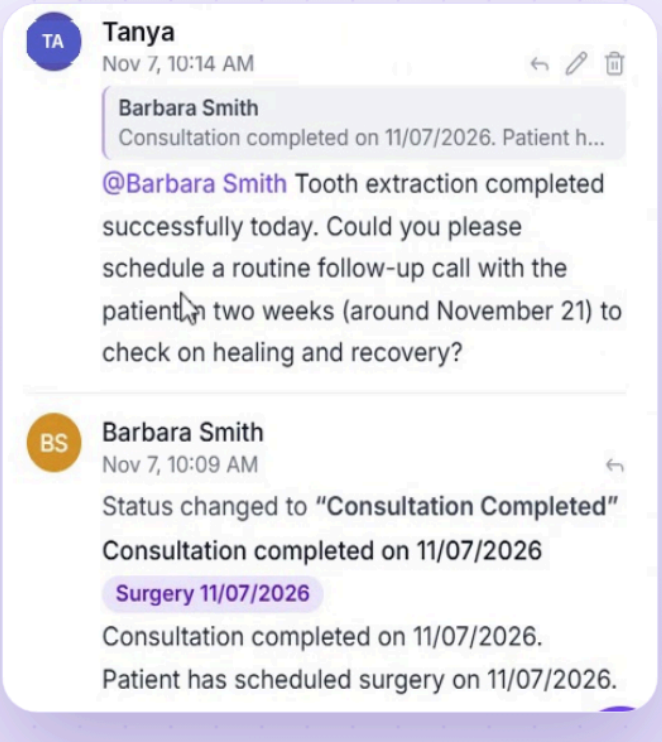

- HIPAA compliant and encrypted
- @mention the right person on either team
- Every message stays with the patient's referral
- The referring office sees each status update

INSIDE YOUR OWN TEAM

Notes that never leave your office.

Administrative notes are private to your team. @mention a colleague instead of walking over or leaving a sticky note.

Just Refer it

OPERATIONAL EFFICIENCY

Less phone tag. More time for patients.

When both offices and every team member talk on the case, referrals move faster and nobody has to chase them.
