Web form or system? 5 questions

Hook (first line)

Web form or referral system? Five questions tell you which one you have.

Caption

Web form or referral system? Five questions tell you which one you have:

1. Does each referral become one case, or one more email?
2. Can you message the referring office right on the referral?
3. Can anyone on your team pick it up and see where it stands?
4. Can staff build notes from templates and copy them into your electronic health record?
5. Does a signed completion note go back when treatment is done?

Mostly no? You have a web form, not a referral system. Tooth Referral is yes to all five, and it takes about five minutes to set up.

WEB FORM OR SYSTEM?

5 questions to ask about your referrals

1. Does each referral become **one case**, or one more email?
2. Can you **message the referring office** right on the referral?
3. Can **anyone on your team** pick it up and see where it stands?
4. Can staff **build notes from templates** and copy them into your electronic health record?
5. Does a **signed completion note** go back when treatment is done?

Mostly no? You have a web form, not a referral system.
