TOOTH REFERRAL · SCRIPTS 21 TO 23 · THE FEATURE SERIES

After "Buried in Emails": now show the software

Three scripts that build from the first video. Same front desk, same people (Tanya and Amanda, then Greg). Video 1 set the hook: referrals buried in emails, voicemails and faxes, and one promise, "every referral came in as one case". Each new episode takes one part of that promise and **shows it on the real screens**, feature by feature, and ends on a question that makes the viewer want the next one.

Vejay's notes this answers (13 Nov)

- "Build from the first video, the buried one." Every episode quotes a line from video 1 and pays it off.
- "Focus on showing the features of the software." Each clip names the exact Tooth Referral screen on view; the dialogue is two colleagues using it, not describing it.
- **A real story, not problem → solution:** each script is told in four acts. Act 1 sets up the people and a normal day. Act 2 lets things go wrong slowly, with a human cost (a nervous patient who thinks nobody wanted her, a new colleague alone for the first time, a mother's promise to her daughter). Act 3 is the turn, where the software appears the way a colleague would actually use it. Act 4 pays off the story, not the feature. Clips marked STORY carry no product graphics.
- **Every episode introduces Tooth Referral, like video 1:** one clip marked INTRO where a character says in plain words what Tooth Referral is and how it helps ("Tooth Referral turns every referral into one case... Both offices see it. Nobody digs through email."), so a viewer who never saw video 1 still understands it.
- **A different feature set in every script (no repeats):** 21 is how a referral **arrives** (the website form), 22 is how it is **worked** (statuses, reminders, insurance request, notifications), 23 is how it is **closed** (notes and e-signature).
- "People need to turn the page with curiosity." Each script ends on an open question that the next episode answers.
- "Send me topics before you produce: hook, goal, and how it builds from the first video." The topics are below; nothing gets produced until you approve them.

Topics for approval

Script 21 · Episode 2 · Last Tuesday (How a referral arrives: the website referral form)

Story	A good Monday. Tanya brings in donuts. Barbara from Gentle Dental calls, just to chat, and asks how Mrs. Ortiz is doing. Nobody at St. Andrew's has ever heard of Mrs. Ortiz. She was sent a week ago, through the website.
Topic	The website referral form: replaced by one that starts a case in Tooth Referral instead of sending an email.
Hook	"How did Mrs. Ortiz do? She was so nervous." · "...Mrs. Ortiz?"

Goal	Make the viewer feel a lost referral as a person (a nervous patient who thinks nobody wanted her), not as a statistic. The software only appears after that, as the obvious thing to do. The viewer leaves asking: "Where does OUR website form go?"
Builds from video 1	In video 1 Amanda said: "We replaced the form on our website with Tooth Referral." Video 1 only said it. This episode shows the day that made them do it, and the moment the first referral arrives the new way.
Turns the page	Ends on Amanda: "Tomorrow's the real test. You're out, and Greg's on his own." (opens Script 22)

Script 22 · Episode 3 · Tanya's Day Off (How a referral is worked: anyone can pick it up)

Story	Tanya is sick but won't go home: she left Mr. Turner a voicemail and promised herself she'd call back. The next morning Greg is alone at the desk for the first time, Mr. Turner calls, a little annoyed, and Greg has no idea who called him.
Topic	Picking up someone else's work: statuses on every referral, next-step reminders, automatic updates to the referring office, the insurance request link and the notifications feed.
Hook	"Somebody called me yesterday. I've been waiting by the phone all morning." · Greg didn't call him. The person who did is home sick.
Goal	Put the viewer in a moment every office knows (a call about work someone else started) and let them feel Greg's panic before showing the calm answer. The "system for the team" idea is never said; it is felt.
Builds from video 1	In video 1 Tanya asked: "So if I'm out tomorrow..." and Amanda answered: "Greg opens it and knows exactly where it stands." This is that exact day, and Greg's first real test. It also answers video 1's old problem: "every referral lives in someone's inbox or someone's head".
Turns the page	Ends on Tanya's text back: "Tomorrow I have three letters and a recital. Pray for me." (opens Script 23)

Script 23 · Episode 4 · Front Row (How a referral is closed: notes, signed and sent before five)

Story	Tanya's daughter Lily has her first piano solo at 5:30. Tanya promised her the front row. Last spring she missed the first half of the recital typing completion letters. At 4:15 three finished cases land on her desk.

Topic	Closing the loop: note templates that fill themselves in, your own letter imported from Word, routing to the doctor to sign, e-signature, the signed note on the case for both offices, copy into your electronic health record.
Hook	"Front row. She made me promise." · At 4:15, three completion letters land on her desk.
Goal	Give the paperwork a human stake (a promise to a child) and let the software quietly win. The viewer should want those 20 minutes back in their own day.
Builds from video 1	Video 1 opened with a team "losing steam" and a patient nobody called back. This is the other end of the same journey: the loop closes on time and the people go home. Together with 21 and 22 the series follows one referral: it arrives, it is worked, it is closed.
Turns the page	Ends on Greg: "The doctor should see this from the owner's side." · Amanda: "The numbers? That's a whole other story." (opens the Analytics episode)

Each script: 12 clips of about 8 seconds (90 to 100 seconds), in four acts. Horizontal 16:9 like video 1, with the split-screen dashboard. Script only; filming prompts come after approval. Demo data: Gentle Dental (general dentist) refers to the specialist office where Tanya, Amanda and Greg work. No doctors are named.
