The Phone-Tag Funeral

Deadpan, cheeky, a little rude. He mock-buries the old email-and-phone-tag system, then calmly walks through what replaced it.

LENGTH	MADE IN	GOAL
8 clips × 8 s = 64 s	Google Flow, one 8 s clip per segment	Awareness and value, not a sale: no prices, no sign-up

Why this version

The 'funeral' gives the hook a visual joke (RIP card, tossing the phone) and a clean turn into the dashboard.

The whole script at a glance

00-08 s	**Hook** · “Are you still doing referrals by email and phone tag? Damn. That's not a system. It's a shitty game of telephone.”
08-16 s	**The turn** · “So, let's bury it. Here's the new way: every referral, from every office, lands in one place.”
16-24 s	**The board** · “This is the incoming referrals board. It shows who sent each referral, when it came in, and where it stands.”
24-32 s	**The network** · “Do you see the green dot? That means the office is connected. Your whole referral network is in one inbox.”
32-40 s	**Talk inside the case** · “When you open a referral, you're talking straight to the GP. Do you need a different X-ray? Just ask right here.”
40-48 s	**Everything shared** · “X-rays, insurance cards, and notes are shared with both offices. No more "Did you get my fax?" bullshit.”
48-56 s	**Status that travels** · “When you update the status, the referring office gets notified. Everyone knows where the patient is.”
56-64 s	**Close** · “That's the point: less phone tag and more trust between offices. It's a referral network that actually feels like one.”

Before you generate

- **One clip = one segment = 8 seconds.** Keep every line to the words written (14 to 20 words fits 8 s at a natural pace). Longer lines get rushed or cut.
- **Start and end every clip in the rest pose.** Hands relaxed at chest height, looking at camera, mouth closed for about half a second at the very start and end. This is what lets me join the clips so they feel like one take.
- **Gestures happen inside the frame, at chest-to-shoulder height.** A hand that leaves the frame cannot be tracked, and the animation that rides on it has nowhere to land.
- **Point at the same places every time.** Upper-left = where the dashboard panel will appear. Right side = where chat / notifications appear. Keep these consistent so the animations always land where he points.
- **Paste the dark 'Google Flow prompt' box as is, one box per clip.** Each box is complete on its own: camera, a second-by-second beat sheet of hand gestures with the words they land on, facial expression, head movement and the spoken line. The same prompts are in the matching -Flow-prompts.txt file, which copies cleaner than a PDF. If Flow blocks a swear word, use the clean line given at the end of that prompt.
