TOOTH REFERRAL · SCRIPTS 21 TO 23 · THE FEATURE SERIES

After "Buried in Emails": now show the software

Three scripts that build from the first video. Same front desk, same people (Tanya and Amanda, then Greg). Video 1 set the hook: referrals buried in emails, voicemails and faxes, and one promise, "every referral came in as one case". Each new episode takes one part of that promise and **shows it on the real screens**, feature by feature, and ends on a question that makes the viewer want the next one.

Vejay's notes this answers (13 Nov)

- "Build from the first video, the buried one." Every episode quotes a line from video 1 and pays it off.
- "Focus on showing the features of the software." Each clip names the exact Tooth Referral screen on view; the dialogue is two colleagues using it, not describing it.
- **Story first, features second:** every script opens on a real front-desk moment (a referral lost in an old email address, a callback about a voicemail nobody remembers, a recital at 5:30). The features appear as the way out of that moment, never as a demo. Clips marked STORY carry no product graphics.
- **A different feature set in every script (no repeats):** 21 is how a referral **arrives** (the website form), 22 is how it is **worked** (statuses, reminders, insurance request, notifications), 23 is how it is **closed** (notes and e-signature).
- "People need to turn the page with curiosity." Each script ends on an open question that the next episode answers.
- "Send me topics before you produce: hook, goal, and how it builds from the first video." The topics are below; nothing gets produced until you approve them.

Topics for approval

Script 21 · Episode 2 · The Form That Isn't a Form (How a referral arrives: the website referral form)

Story	Gentle Dental calls: they sent a patient through the website form last Tuesday. Nobody at the front desk ever saw it. It went to an old email address nobody opens.
Topic	The website referral form: build it yourself in minutes, put it on your site, and every referral it receives starts a case instead of an email.
Hook	"A referral? Through our website? Last Tuesday?" Nobody at the front desk ever saw it.
Goal	Let the viewer feel the lost-referral moment first, then watch the fix happen on screen. They should think: "Where does OUR website form go?" and "I could set that up this afternoon."

Builds from video 1	In video 1 Amanda said: "We replaced the form on our website with Tooth Referral. Every referral came in as one case." Video 1 only said it. This episode shows why (a referral lost in an old email address) and shows the replacement being built, ending with the same referral landing as one case.
Turns the page	Ends on: "That's just how it arrives. Tomorrow, let's see how Greg does without you." (opens Script 22)

Script 22 · Episode 3 · Tanya's Day Off (How a referral is worked: anyone can pick it up)

Story	Tanya texts that she is sick. Then a patient calls back about a voicemail "someone" left him yesterday. Greg did not make that call. A year ago that would have been a dead end.
Topic	Tracking and follow-up when a person is out: statuses on every referral, next-step reminders, automatic updates to the referring office, the insurance request link and the notifications feed.
Hook	"Someone left you a voicemail yesterday?" Greg did not call him. The person who did is out sick.
Goal	Put the viewer in a moment every office knows (a call about work someone else started), then show the answer is already on the screen. Prove the "system for the team" idea without ever saying it.
Builds from video 1	In video 1 Tanya asked: "So if I'm out tomorrow..." and Amanda answered: "Greg opens it and knows exactly where it stands. No digging through anyone's email." This episode is that exact day. It also answers the old problem from video 1: "every referral lives in someone's inbox or someone's head".
Turns the page	Ends on: "What about the letters after treatment?" · "Oh, those write themselves. Ask Tanya tomorrow." (opens Script 23)

Script 23 · Episode 4 · The Letter That Writes Itself (How a referral is closed: notes, signed and sent before five)

Story	Tanya's daughter has a recital at 5:30. It is ten to five and three completion letters still have to go out. Last spring she missed the first half, typing the same letter again and again.
Topic	Notes: templates that fill themselves in, your own letter imported from Word, e-signature, the signed note on the case for both offices, and copy into your electronic health record.
Hook	"Isn't the recital tonight?" · "Five thirty." · "You have three completion letters. You're not making it."

Goal	Give the paperwork a human stake (getting out the door on time), then let the software quietly win. The viewer should see the letter fill itself in and get signed, and want to try it on their own letters.
Builds from video 1	Video 1 opened with a patient who never got a call back and a team "losing steam". This is the other end of the same referral: the loop closes on time and the team goes home. It completes the journey the series has followed since video 1: arrives (21), worked (22), closed (23).
Turns the page	Ends on: "You know who should see this? The doctor." · "From the owner's chair? The numbers are a whole other conversation." (opens the Analytics episode)

Each script: 11 clips of about 8 seconds (about 90 seconds). Horizontal 16:9 like video 1, with the split-screen dashboard. Script only; filming prompts come after approval. Demo data: Gentle Dental (general dentist) refers to the specialist office where Tanya, Amanda and Greg work. No doctors are named.

SCRIPT 21 · EPISODE 2 OF THE SERIES

The Form That Isn't a Form

How a referral arrives: the website referral form · 11 clips · about 90 seconds · 203 spoken words

Story	Gentle Dental calls: they sent a patient through the website form last Tuesday. Nobody at the front desk ever saw it. It went to an old email address nobody opens.
Topic	The website referral form: build it yourself in minutes, put it on your site, and every referral it receives starts a case instead of an email.
Hook	"A referral? Through our website? Last Tuesday?" Nobody at the front desk ever saw it.
Goal	Let the viewer feel the lost-referral moment first, then watch the fix happen on screen. They should think: "Where does OUR website form go?" and "I could set that up this afternoon."
Builds from video 1	In video 1 Amanda said: "We replaced the form on our website with Tooth Referral. Every referral came in as one case." Video 1 only said it. This episode shows why (a referral lost in an old email address) and shows the replacement being built, ending with the same referral landing as one case.
Turns the page	Ends on: "That's just how it arrives. Tomorrow, let's see how Greg does without you." (opens Script 22)
Cast and set	Tanya and Amanda, at the same front desk as Buried in Emails. Greg (Gentle Dental) is only a voice on the phone.

FEATURES SHOWN

Website Lead Forms · Referral Web Form · Logo, welcome message, Insurance Accepted display · "What we are known for" tags and doctor routing · Form field toggles with live preview · Referral Access Code for regular referring offices · Get embed code · The referral lands in Incoming as one case

The script

	DIALOGUE	ON SCREEN (TOOTH REFERRAL)
01	**The call** **Tanya:** “St. Andrew's, this is Tanya... A referral? Through our website? Last Tuesday?”	STORY. Full frame. The desk phone rings; Tanya answers, confused. Amanda looks up from her screen. No graphics.
02	**Where does it go?** **Tanya:** “Greg says they sent a patient through our website. There's nothing in my inbox.” **Amanda:** “Where does that form even go?”	STORY. Tanya covers the phone and scrolls her email. Small pop-up: "0 results".

03	**The old address** **Amanda:** “Found it. It goes to the old front-desk email. Nobody's opened that since spring.” **Tanya:** “Greg, I am so sorry. Can you send it again?”	STORY. Amanda at the second monitor. A dusty-looking mailbox graphic: "frontdesk-old@ · 214 unread" in amber.
04	**Last time** **Tanya:** “He's faxing it. A patient waited a week because of a web form.” **Amanda:** “That's the last time. Let's replace it today.”	STORY turns. Tanya hangs up, frustrated at the form, not at anyone. Amanda opens Tooth Referral: Website Lead Forms.
05	**Make it ours** **Amanda:** “Referral Web Form. Our logo, a welcome message, the insurance we accept.” **Tanya:** “So nobody has to call and ask.”	The builder: logo upload, welcome message, the Insurance Accepted display light up as she names them.
06	**The right doctor** **Tanya:** “'What we are known for.' Implants, wisdom teeth...” **Amanda:** “And it routes each referral to the right doctor.”	The "What we are known for!" skill tags being added, then Specialty & Doctor Routing.
07	**What they see** **Amanda:** “Pick what the dentist fills in. Tooth numbers, chief complaint, X-rays.” **Tanya:** “And that's exactly what Greg sees?” **Amanda:** “Live preview.”	The toggles switch on one by one; the Live patient preview on the right updates with each one.
08	**No retyping** **Amanda:** “Offices that refer a lot get an access code. Their details fill in by themselves.” **Tanya:** “Greg will love that.”	Referral Access Code (Company Access PIN): entering it auto-fills the referring office details on the form.
09	**On the website** **Amanda:** “Get embed code. Paste it on our site. Done.” **Tanya:** “That's it? That took ten minutes.”	The "Get embed code" button, the code copied, then the new form live on the practice website.
10	**Call him back** **Tanya:** “Greg? It's Tanya. Try the website one more time... Got it. It's already here.”	STORY pays off. Tanya on the phone again, smiling. Incoming referrals list: the new row slides in, status "New".
11	**Not an email** **Tanya:** “One case. Not an email in a mailbox nobody opens.” **Amanda:** “That's just how it arrives. Tomorrow, let's see how Greg does without you.”	Full frame. The dusty mailbox graphic from clip 3 dissolves into the single case. End card.

End card: Tooth Referral. Not just a form. A system. · toothreferral.com

SCRIPT 22 · EPISODE 3 OF THE SERIES

Tanya's Day Off

How a referral is worked: anyone can pick it up · 11 clips · about 90 seconds · 175 spoken words

Story	Tanya texts that she is sick. Then a patient calls back about a voicemail "someone" left him yesterday. Greg did not make that call. A year ago that would have been a dead end.
Topic	Tracking and follow-up when a person is out: statuses on every referral, next-step reminders, automatic updates to the referring office, the insurance request link and the notifications feed.
Hook	"Someone left you a voicemail yesterday?" Greg did not call him. The person who did is out sick.
Goal	Put the viewer in a moment every office knows (a call about work someone else started), then show the answer is already on the screen. Prove the "system for the team" idea without ever saying it.
Builds from video 1	In video 1 Tanya asked: "So if I'm out tomorrow..." and Amanda answered: "Greg opens it and knows exactly where it stands. No digging through anyone's email." This episode is that exact day. It also answers the old problem from video 1: "every referral lives in someone's inbox or someone's head".
Turns the page	Ends on: "What about the letters after treatment?" · "Oh, those write themselves. Ask Tanya tomorrow." (opens Script 23)
Cast and set	Greg and Amanda, same front desk, the next morning. Tanya is out. A patient, Mr. Turner, is only a voice on the phone.

FEATURES SHOWN

Incoming list with statuses · Contact statuses (Left a Voicemail) · Scheduling from the status chips · Automatic status updates to the referring office · Next-step reminders · Request insurance from the patient (secure link) · Notifications feed

The script

	DIALOGUE	ON SCREEN (TOOTH REFERRAL)
01	**Sick today** **Greg:** “'Sick today. So sorry.' Tanya's out.” **Amanda:** “Remember last spring? She was out two days and we lived on sticky notes.”	STORY. Full frame. Greg reads a text on his phone as Amanda walks in with coffee. Tanya's chair is empty.
02	**The callback** **Greg:** “St. Andrew's, this is Greg... Mr. Turner? Someone left you a voicemail yesterday?”	STORY. The desk phone rings. Greg answers and frowns: he has no idea who called this patient.

03	**It was Tanya** **Greg:** “One second, Mr. Turner.” **Greg:** “Here. Michael Turner. 'Left a voicemail', yesterday, ten past four. That was Tanya.”	Greg types the name. Incoming list, then the case: Status & Schedule chips with "Left a Voicemail" and the time.
04	**Book him** **Greg:** “Yes, Mr. Turner, we were calling to book your consultation. Tuesday at ten? Perfect.”	Greg clicks Consultation Scheduled, picks the date, Save & update status. Green success toast.
05	**They already know** **Amanda:** “Should I let his dentist know?” **Greg:** “They already know. They get every status update.”	Split: the referring office (Gentle Dental) sees the same referral now marked "Consultation Scheduled".
06	**She thought ahead** **Greg:** “Look. She'd set a reminder to check on him today. It came to me this morning.”	"Next Step: Check back in 2 business days? Remind me on..." Then the reminder notification that arrived today.
07	**The missing card** **Greg:** “This next one's missing insurance. That used to be my whole morning on the phone.” **Amanda:** “And now?”	Another case: the Insurance cards panel is empty. The button "Request from patient" pulses.
08	**One click** **Greg:** “Request from patient. She gets a secure link and takes a picture of her card. Sent.”	Click on Request from patient. Green toast: "Success · Insurance request sent".
09	**She sent it** **Amanda:** “That was quick.” **Greg:** “'Patient submitted insurance.' Front and back, right on the case.”	Notifications feed: "patient submitted insurance". The card images appear in the Insurance panel.
10	**One feed** **Greg:** “And this shows me everything that moved while she's out. Every office, one feed.”	Notifications feed with the tabs All / Unread / Read and the Type filter (Status, Mentions, Insurance Submission).
11	**Feel better** **Amanda:** “Text her back. 'Feel better. Nothing's waiting on you.'” **Greg:** “What about the letters after treatment?” **Amanda:** “Those write themselves. Ask Tanya tomorrow.”	STORY pays off. Greg types the text on his phone, smiling. End card.

End card: Tooth Referral. Whoever opens it knows where it stands. · toothreferral.com

SCRIPT 23 · EPISODE 4 OF THE SERIES

The Letter That Writes Itself

How a referral is closed: notes, signed and sent before five · 11 clips · about 90 seconds · 182 spoken words

Story	Tanya's daughter has a recital at 5:30. It is ten to five and three completion letters still have to go out. Last spring she missed the first half, typing the same letter again and again.
Topic	Notes: templates that fill themselves in, your own letter imported from Word, e-signature, the signed note on the case for both offices, and copy into your electronic health record.
Hook	"Isn't the recital tonight?" · "Five thirty." · "You have three completion letters. You're not making it."
Goal	Give the paperwork a human stake (getting out the door on time), then let the software quietly win. The viewer should see the letter fill itself in and get signed, and want to try it on their own letters.
Builds from video 1	Video 1 opened with a patient who never got a call back and a team "losing steam". This is the other end of the same referral: the loop closes on time and the team goes home. It completes the journey the series has followed since video 1: arrives (21), worked (22), closed (23).
Turns the page	Ends on: "You know who should see this? The doctor." · "From the owner's chair? The numbers are a whole other conversation." (opens the Analytics episode)
Cast and set	Tanya and Amanda, same front desk, late afternoon. Tanya is back; her daughter's recital is at 5:30.

FEATURES SHOWN

Status change prompts the note · Note templates with smart variables (auto-filled) · Import your own letter from Word or PDF · Who signs: route to a doctor to sign · E-signature (DocuSign) · Signed notes visible to both offices · Copy into your electronic health record · Save as a new template

The script

	DIALOGUE	ON SCREEN (TOOTH REFERRAL)
01	The recital **Amanda:** “Isn't the recital tonight?” **Tanya:** “Five thirty.” **Amanda:** “It's ten to five. You have three completion letters. You're not making it.”	STORY. Full frame. Amanda has her coat on. A small photo of a child at a piano is taped to Tanya's monitor. Clock chip: 4:50 PM.

02	**Last spring** **Tanya:** “Last spring I missed the whole first half. Typing 'thank you for referring' over and over.”	STORY. Tanya glances at the photo. Three "Completion letter" cards sit in a stack beside her.
03	**Watch this** **Amanda:** “So why are you so calm?” **Tanya:** “Watch. Emma Park's treatment is done. I mark it Completed, and it asks me for the note.”	She clicks Completed. The note creator opens by itself ("Prepare note").
04	**Our own letter** **Tanya:** “That's our own letter. We imported it from Word. Her name, date of birth, the referring office. All filled in.”	The letter with the purple variable chips: Patient Name, Patient DOB, Referring Office Name, Today's Date switch to real values.
05	**Two lines** **Amanda:** “You didn't type any of that?” **Tanya:** “It pulls it from the case. I add two lines about the visit.”	She types two short lines in the body. Preview.
06	**Route it** **Amanda:** “But the doctor has to sign it.” **Tanya:** “So I route it to the doctor. One click.”	"Who signs this note?" · I'll sign it myself · Sign on behalf of a doctor · Route to a doctor to sign (selected).
07	**Signed** **Tanya:** “Signed. No printing, no scanning, no fax.”	The e-signature step: signature placed, Finish, then "All done — your document is signed!" and the green success toast.
08	**Both offices** **Amanda:** “And Gentle Dental?” **Tanya:** “It's on the case. Greg can open it right now.”	Signed notes panel: "Completion Note · Signed · Visible to both offices". Split: the same note on Gentle Dental's side.
09	**Our chart** **Amanda:** “What about our own chart?” **Tanya:** “Copy, paste. Straight into our electronic health record.”	The line "Copy and paste into your patient electronic health record as a note" with the copy action highlighted.
10	**Three for three** **Tanya:** “Saved as a template. The other two are one click each... Done. It's four fifty-eight.”	"Save as New Template". The three letter cards tick off: sent, sent, sent. Clock chip: 4:58 PM.
11	**Front row** **Tanya:** “Front row, here I come.” **Amanda:** “Go! ...You know who should see this? The doctor.” **Tanya:** “The numbers? That's a whole other conversation.”	STORY pays off. Tanya grabs her coat and the photo, heading out. A one-second glimpse of the Analytics page, blurred. End card.

End card: Tooth Referral. Completion letters that write themselves. · toothreferral.com
