Just Refer it

FOR DENTAL SPECIALISTS

Most specialists think they need more GP referrals.

Your biggest leak is inside your own front office.

Swipe →

WHERE REFERRALS LEAK

One referral. Three ways to lose it.

A GP sends you a patient

Missed voicemail

Left on Monday. The caller is out sick Tuesday. The patient goes cold.

Wrong status click

Marked “Scheduled” instead of “Received”. It drops off every list.

Staff turnover

The coordinator quits. Their follow-ups leave with them.

ToothReferral
Just Refer it

THE COST

Tens of thousands in lost production, every month.

Not from GPs who stopped referring. From patients they already sent you.

ToothReferral
Just Refer it

TODAY: THE WEB FORM WORKFLOW

Nobody owns the referral.

Patient details sent through your web form

↓

An email lands in a shared inbox

↓

Someone has to notice it

↓

A call, a voicemail, then waiting

↓

✕ The case is forgotten

ToothReferral
Just Refer it

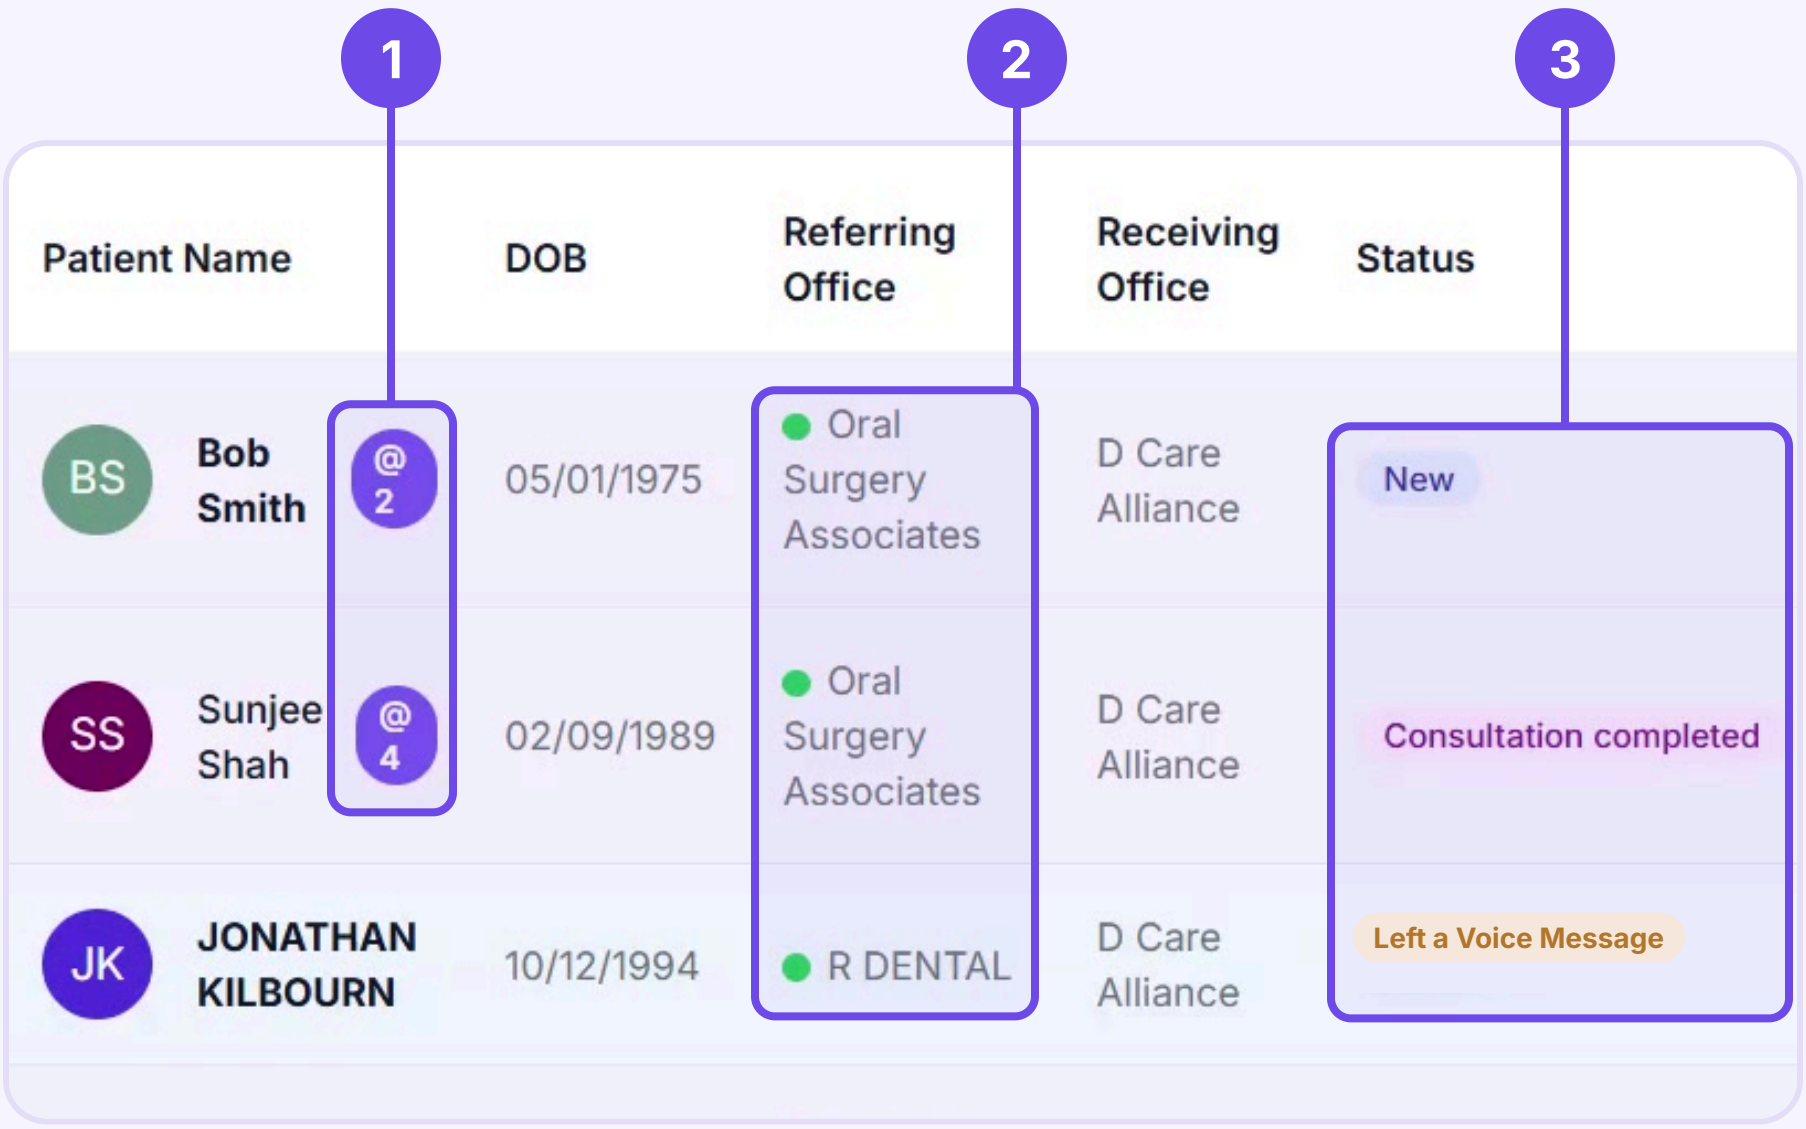

WITH TOOTHREFERRAL

Every step is tracked by the system.

- The referral lands in your shared dashboard
- Every call and voicemail is logged for the whole team
- “Scheduled” needs a real appointment and a note
- The referring GP is updated automatically

INSIDE THE DASHBOARD

Every referral, one list.

1. @ badge: your team was tagged in a message
2. Green dot: the referring office is on the network
3. The status of every case, at a glance

ToothReferral
Just Refer it

THE RETURN

One saved referral pays for the system.

1 referral that doesn't leak

=

ToothReferral paid for

LINKEDIN CAPTION

Most specialists think they need more GP referrals. Their biggest leak is inside their own front office.

Look at what happens to the cases you already get.

A voicemail is left on Monday and the person who left it is out sick on Tuesday. Someone clicks "Scheduled" when they meant "Received." A coordinator quits and their follow-ups go with them. In a busy specialty office, that adds up to tens of thousands in lost production every month.

ToothReferral gives your whole team one referral pipeline. Every call, voicemail and status change is logged where everyone can see it, a case can't be marked Scheduled without a real appointment, and the referring GP is updated automatically.

One referral that doesn't leak pays for the system. Setup takes about five minutes.

FOR SPECIALISTS

Referral portals fail.

They treat your referring doctors like outsiders who need an access code for every update.

CLOSED LOOP

The GP sees every milestone in seconds.

- Case received — GP updated
- Outreach made — GP updated
- Consultation scheduled — GP updated
- Post-op complete — GP updated
- Returned for restorative care — GP updated

ToothReferral
Just Refer it

WHY IT MATTERS

When the updates stop, GPs look elsewhere.

Keep them in the loop and you stay their first call.

No update from your office

They try another specialist
One who answers the first time.

They start doing it in-house
And stop referring that procedure out.

ToothReferral
Just Refer it

THE RETURN

One extra referral pays for the system.

Keep GPs informed, keep the referrals coming, and the software covers itself.

LINKEDIN CAPTION

Referral portals fail because they treat your referring doctors like outsiders.

A GP who wants an update on a crown or an implant gets a portal link, an access code, and sometimes a code that expired last week. Many referring offices give up and call your front desk instead, which is the phone tag the portal was meant to end.

ToothReferral puts both offices on the same platform. The GP has their own dashboard and so do you. A case, a message or an X-ray shows up in both, with no codes and no links. Every milestone, from case received to the patient returning for restorative care, reaches the GP in seconds.

When the updates stop, GPs look elsewhere: they try another specialist, or they start doing the procedure themselves. Keep them in the loop and you stay their first call, and one extra referral pays for the system. Setup takes about five minutes.

Is your referral pipeline built to transfer?

Or is it built on sticky notes?

Swipe →

WHAT BUYERS SEE: KEY-PERSON RISK

Your pipeline depends on one person.

Your referral pipeline today

One coordinator's memory
Who called, who's waiting, who needs a reminder.

Sticky notes and a private inbox
Nobody else can see what's pending.

They leave, the pipeline stalls
Buyers and DSOs price that risk in.

ToothReferral
Just Refer it

IS THIS PATIENT SCHEDULED?

Without ToothReferral, nobody can tell.

Without ToothReferral

- ? A sticky note that says “called pt?”
- ? A voicemail. Returned? Maybe.
- ? Scheduled or not: nobody can tell

With ToothReferral

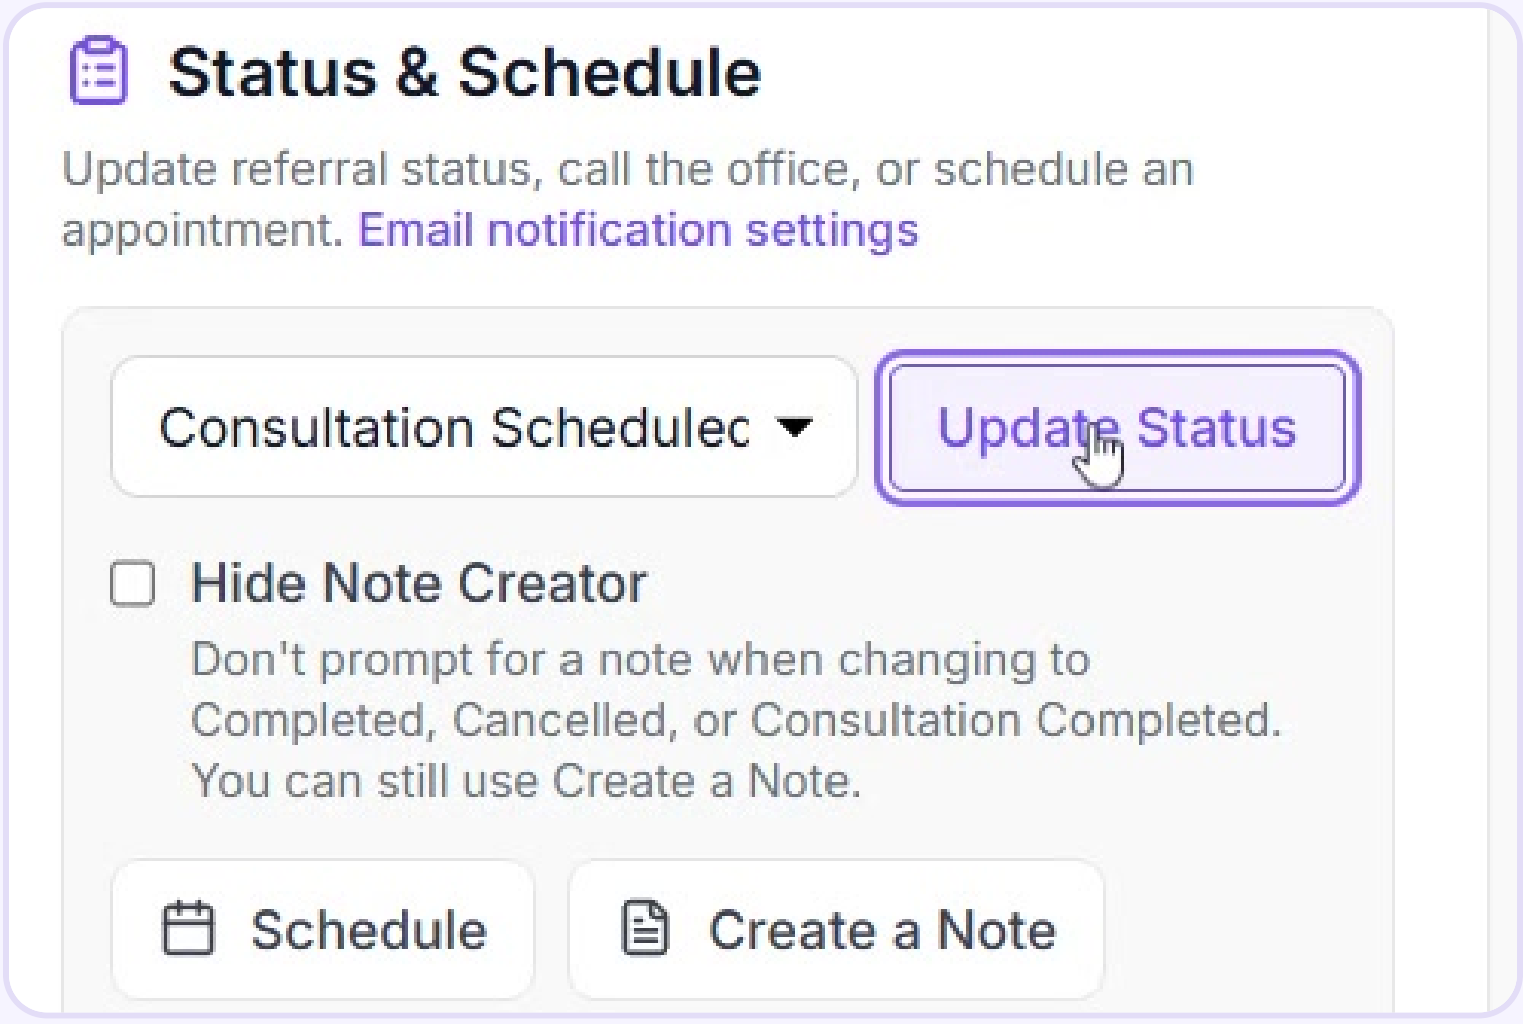

Consultation Scheduled **Nov 6 · 10:30 AM**

Updated by Katie (Dental Assistant) · the referring GP sees it too

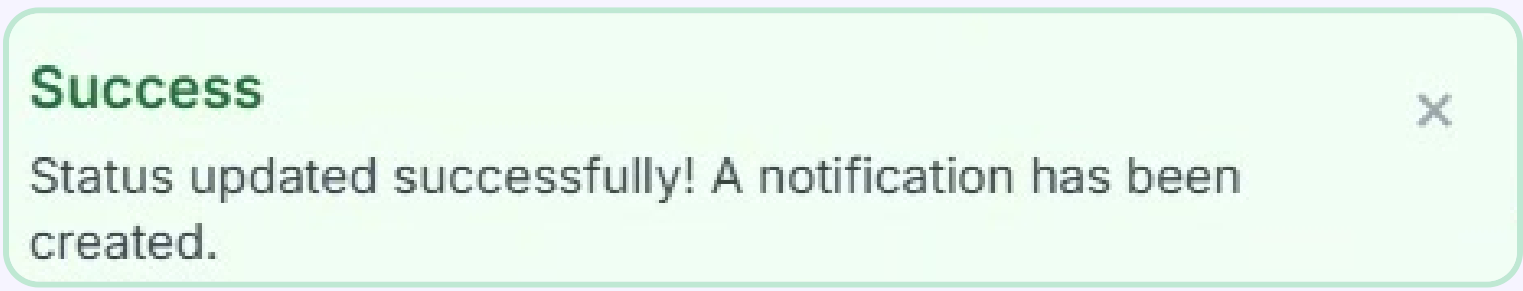

ToothReferral
Just Refer it

INSIDE THE DASHBOARD

Update the status once. The GP sees it right away.

Then, instantly:

ToothReferral

DAY-ONE HANDOFFS

A new hire picks up where the last person stopped.

Coordinator logs a call and a voicemail

↓

The coordinator leaves the practice

↓

✓ New hire opens the dashboard

↓

✓ Sees the full history and follows up

EVERY STEP IS LOGGED

Who did what, and when.

The front desk's work, step by step. A new hire reads it and carries on.

Activity log

Bob Smith · referral from Oral Surgery Associates

BO **Barbara (Office Manager)** 10/26/2026 · 1:54 PM
sent an insurance request to the patient

KD **Katie (Dental Assistant)** 10/26/2026 · 1:53 PM
added the patient's insurance card

KD **Katie (Dental Assistant)** 10/26/2026 · 1:51 PM
updated the dental X-rays

BO **Barbara (Office Manager)** 10/26/2026 · 1:50 PM
added the reason for referral: teeth #26, #27

BO **Barbara (Office Manager)** 10/26/2026 · 1:48 PM
created the referral from Oral Surgery Associates

THE RETURN

3 ways it pays for itself.

One referral can cover the software

One new referral

Pays for a full year of the software, in most cases.

One referral saved from leaking

Pays for at least 8 months.

One referral won back by great communication

Priceless. And yes, it pays for a full year.

ToothReferral
Just Refer it

AN ASSET, NOT A FORM

What you'd hand to a buyer.

Web form

- ✕ Tied to one person's habits
- ✕ No audit trail
- ✕ Stalls when staff leave

ToothReferral

- ✓ Transfers to a buyer
- ✓ Every step logged
- ✓ Anyone picks up any case

ToothReferral
Just Refer it

EASY TO START

Live in 5 minutes.

Worth more every day after.

LINKEDIN CAPTION

Is your referral pipeline built to transfer, or built on sticky notes?

For many specialty practices, it's the sticky notes. The pipeline lives in one coordinator's head and an inbox only they check. Buyers and DSOs call this key-person risk, and they price it in.

ToothReferral keeps the pipeline in a system instead of a person. A case can't move to Scheduled without an appointment and a note, and every call, note and status change is logged, so a new hire can pick up where the last person stopped.

It pays for itself three ways. One new referral covers a full year of the software in most cases. One referral saved from leaking covers at least eight months. And one referral won back by great communication is priceless, though it also covers a full year. Setup takes about five minutes.
