FOR DENTAL SPECIALISTS

Your referral form is a digital fax machine.

Here's what really happens after a general dentist hits **Submit** on your website.

Patient Referral Form

If you are a doctor referring a patient to us, please fill out and submit the following form.

* Referring Doctor's Name

* Doctor's Phone

* Patient Name

Social Security Number

Birthdate

Are X-rays available?

○ Yes ○ No

Reason for Referral (check all that apply)

☐ Evaluation ☐ Treatment ☐ Retreatment ☐ Other

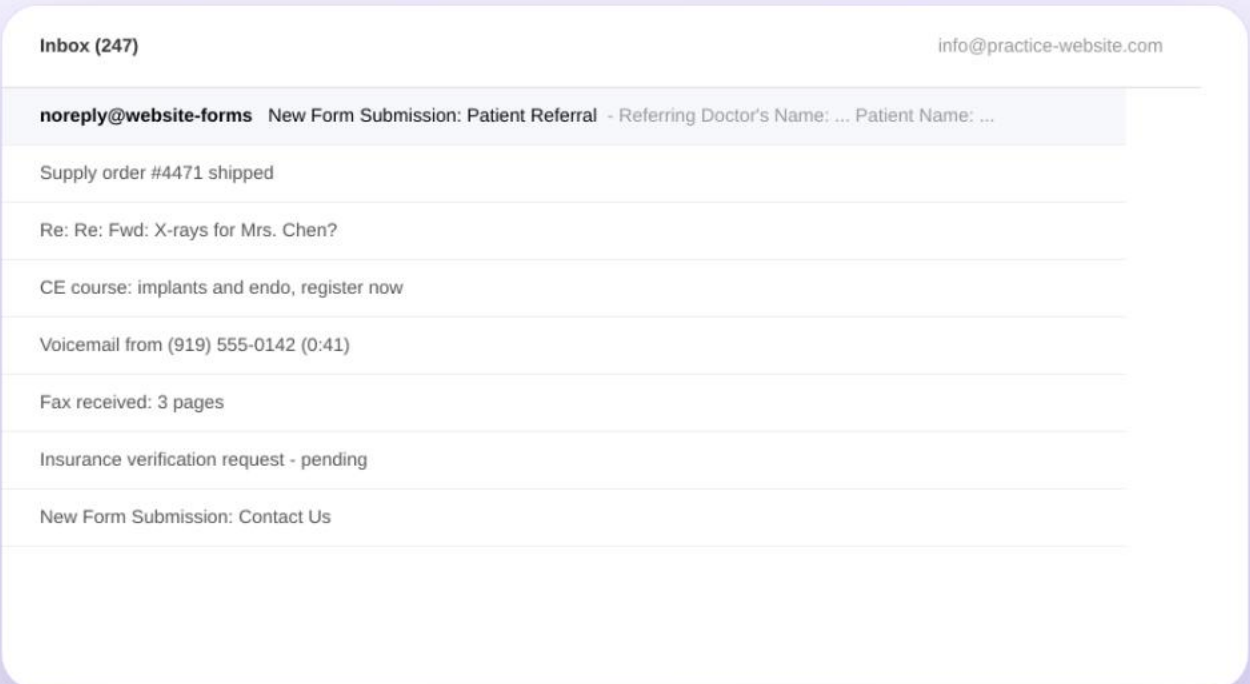

Concerns and Comments

Submit

THE WEB FORM

It ends at "Submit".

The referral becomes one more email in a shared inbox, between supply orders and voicemails.

No confirmation **No status** **Nobody assigned**

No reply to the dentist

WHAT WE FOUND

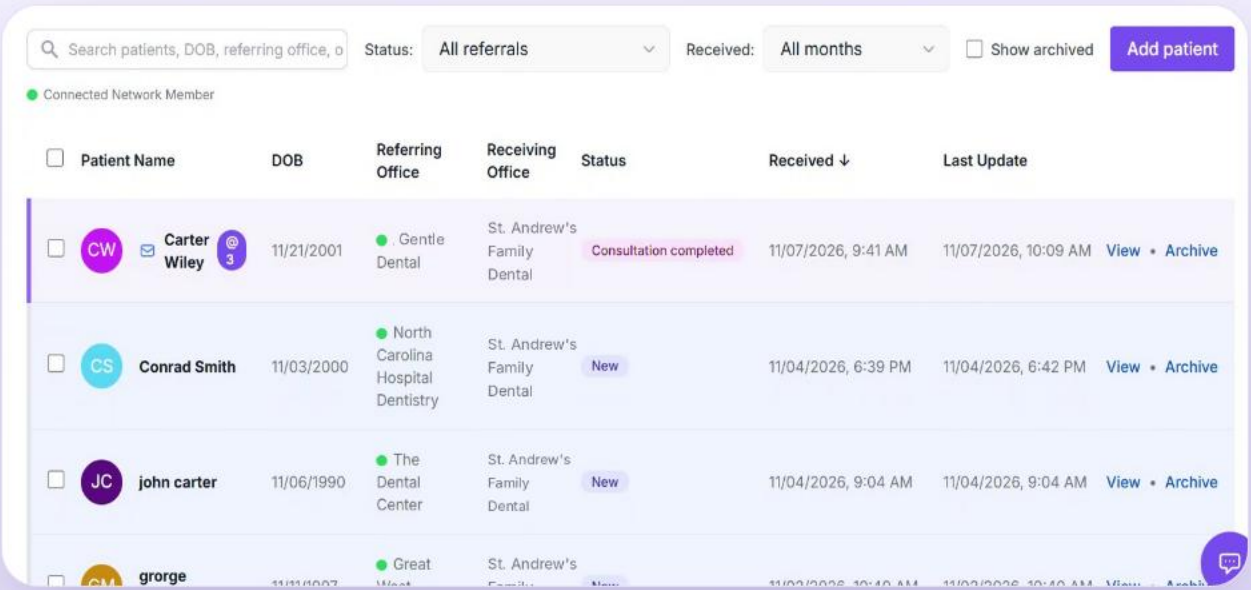

We reviewed real specialist referral pages.

1. One asks referring offices for the patient's **Social Security number** on a public web form.
2. One needs a **Doctor ID, a password and a math question** before a dentist can refer.
3. Most still offer a **PDF to print and fax**.
4. **None** show the referring office what happened next.

TOOTH REFERRAL

It starts a case, not an email.

Every referral lands in one list, with its status and the office that sent it.

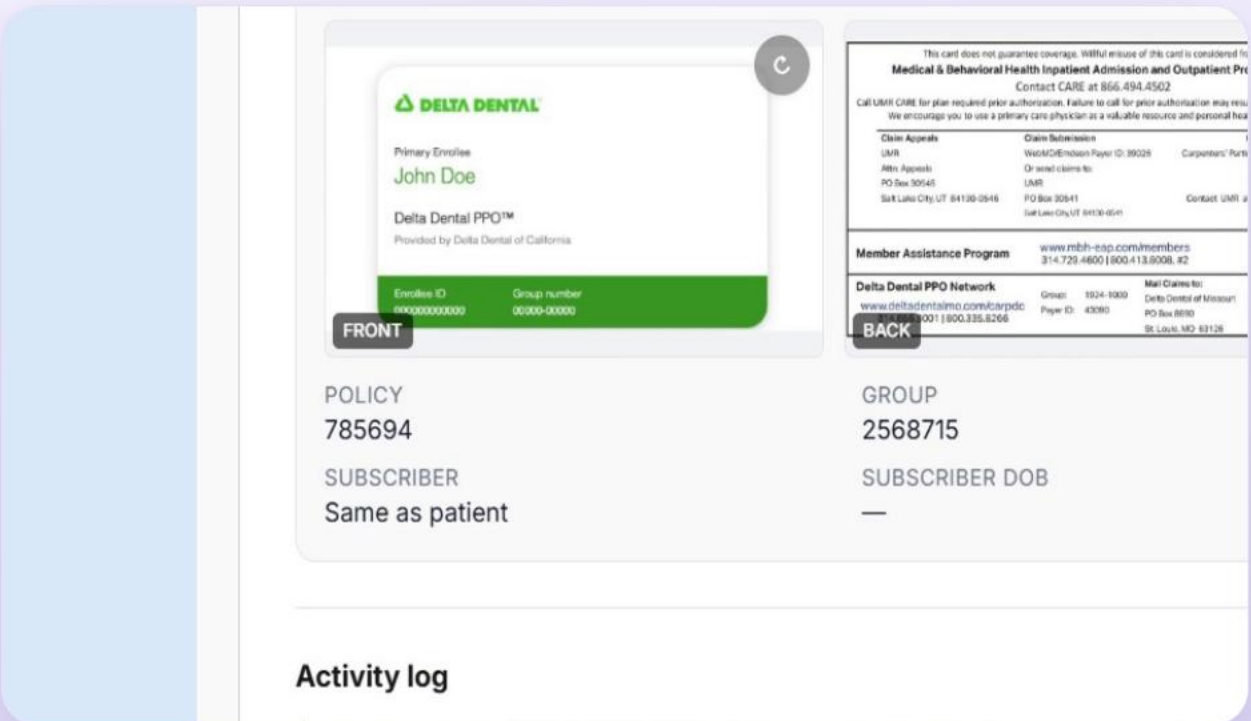

One list | Live status | Connected network member

EVERYTHING TRAVELS WITH IT

X-rays and insurance, on the case.

Or send the patient a secure link to upload their own insurance card.

THE AUDIT TRAIL

Every step, who did it, and when.

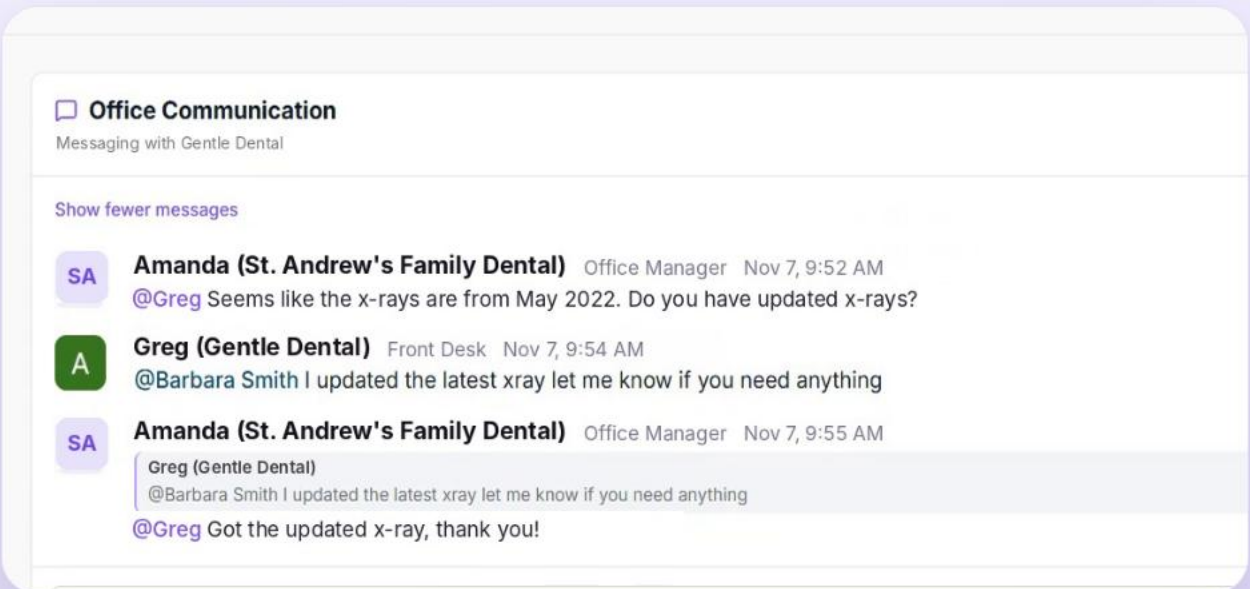

Received Contacted Consultation scheduled Completed

BOTH OFFICES

One conversation. One signed note.

Message the general dentist right on the case. When treatment is done, the signed completion note goes back automatically.

WHAT A FORM CAN'T SHOW YOU

Your referrals, measured.

- ✓ 28 referrals this month, first contact in 3.7 hours, 76% case acceptance.

Replace your web form with a referral pipeline.
