ENDO START-UP DIARY

A day in the life of an endodontic start-up.

How I set up referrals before my first patient walked in.

Day 1

7:00 AM

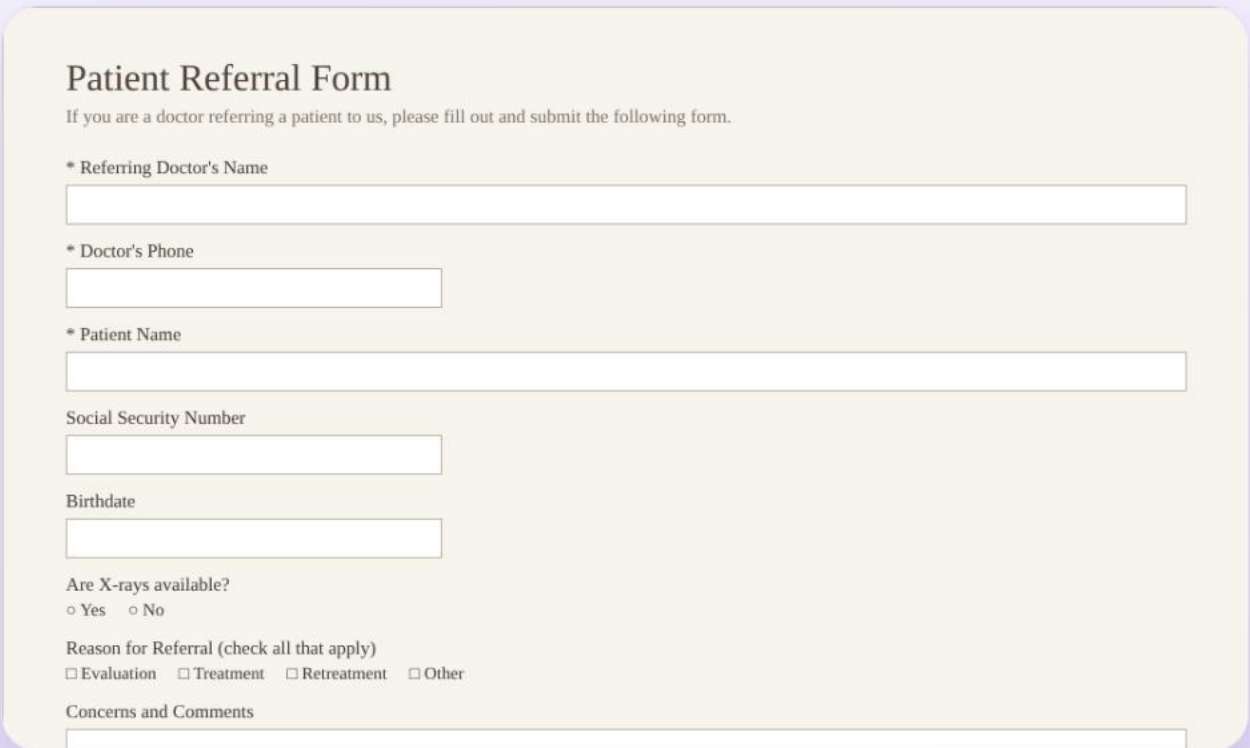

The chairs are in. The CBCT works.

- ✓ Operatories set up
- ✓ CBCT calibrated
- ✓ Staff hired: front desk, assistant
- ○ Website goes live tomorrow

The practice is ready. The question is: how will referrals reach us?

11:00 AM · BUILDING THE WEBSITE

Every template comes with a referral form.

Patient Referral Form

If you are a doctor referring a patient to us, please fill out and submit the following form.

* Referring Doctor's Name

* Doctor's Phone

* Patient Name

Social Security Number

Birthdate

Are X-rays available?
○ Yes ○ No

Reason for Referral (check all that apply)
☐ Evaluation ☐ Treatment ☐ Retreatment ☐ Other

Concerns and Comments

So I asked one question: **what happens after a dentist hits submit?**

2:00 PM · CHOOSING REFERRAL SOFTWARE

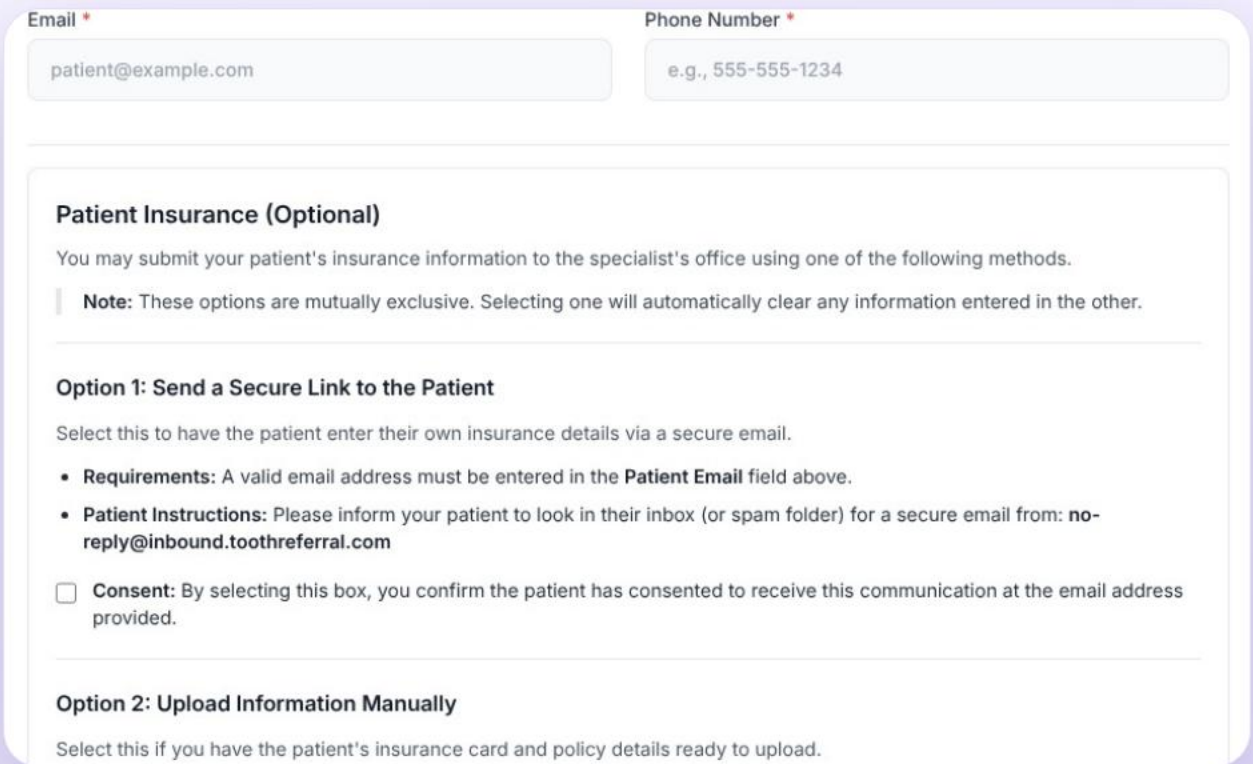

Form vs. software

	Web form	Tooth Referral
Lands in	an inbox	**a tracked case**
X-rays & insurance	email or fax	**on the case**
Status for the dentist	a phone call	**live, automatic**
Who did what	nobody knows	**audit trail**
Completion note	print, sign, fax	**signed in app**
Analytics	none	**every referral**

3:30 PM · ON MY WEBSITE

I embedded Tooth Referral.

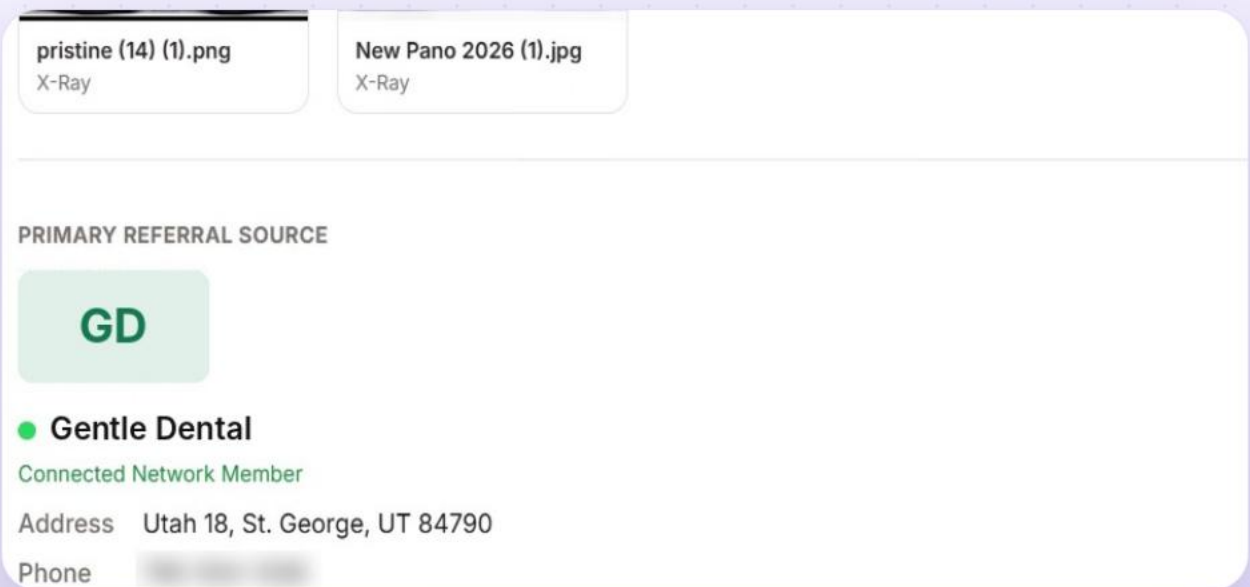

Offices pick a location, attach X-rays and send insurance through a secure patient link.

5:00 PM · MY NETWORK

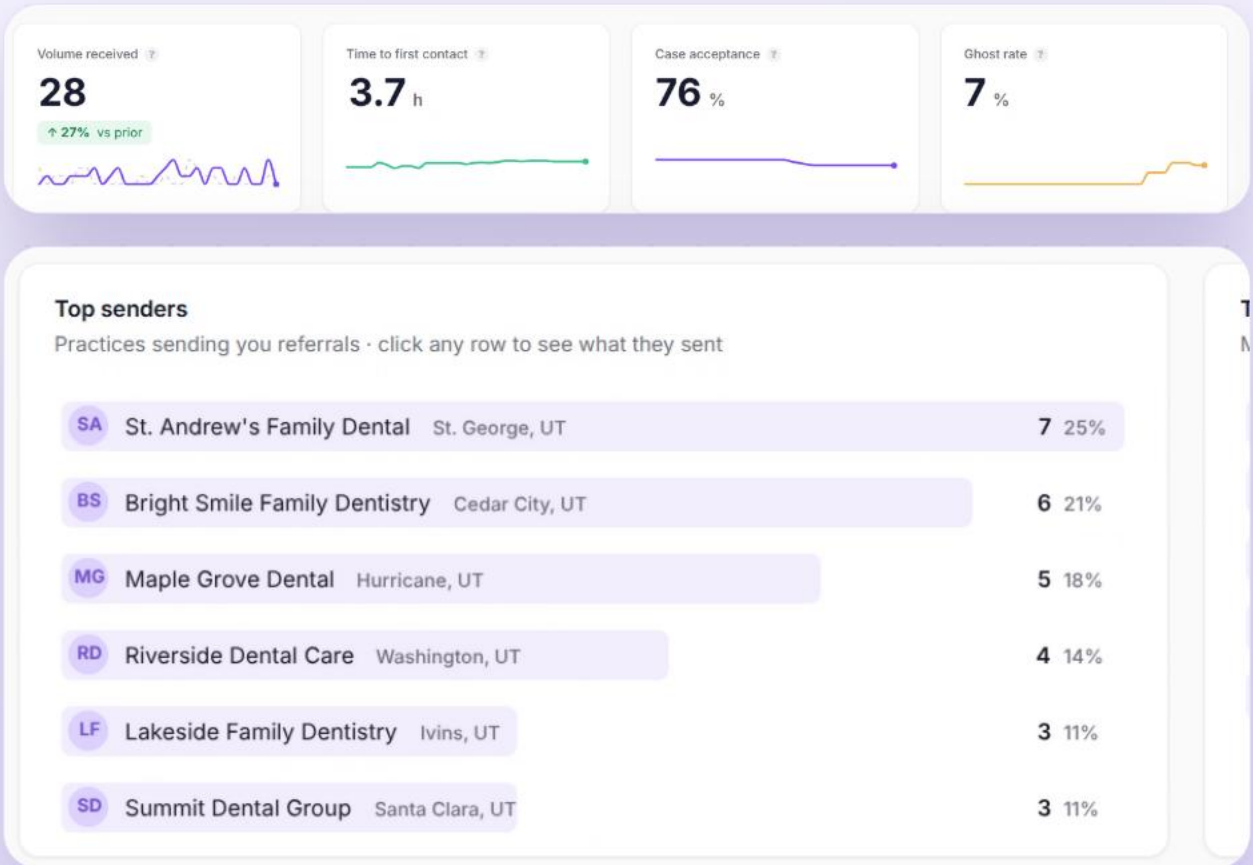

I invited the dentists I already know.

Now we share the same case, the same messages and the same status. No portal logins, no access codes.

WEEK 4

Every referral, who sent it, how fast we called.

THE LESSON

Start with a system, not a sticky note.

Starting a practice is hard. Losing referrals shouldn't be part of it.

Set up in about 5 minutes
