TOOTH REFERRAL · LINKEDIN CAROUSEL 1 OF 3 · ONE FEATURE: OFFICE COMMUNICATION (SECURE MESSAGES ON THE CASE)

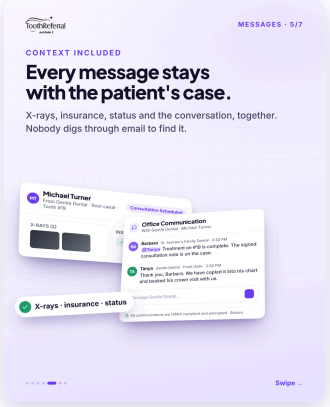

End the phone tag between offices

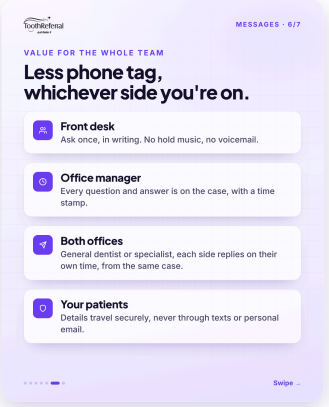

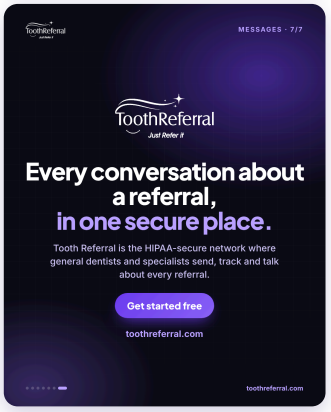

Hook (first line)

One small question between two dental offices shouldn't take four phone calls.

Caption

One small question between two dental offices shouldn't take four phone calls.

Whether you're a general dentist sending referrals or a specialist receiving them, you know the routine. "Has she been scheduled?" "Do you have a newer X-ray?" Each one turns into a call nobody picks up, a voicemail, an email to someone's inbox, and a callback while you're with a patient.

In Tooth Referral, both offices talk right on the referral. The general dentist's front desk checks on an implant consultation and gets the appointment time back in minutes. The specialist's office manager asks for a current periapical, and it's attached to the case before lunch. A treatment coordinator @mentions the other office for an afternoon slot, and the appointment is moved. When treatment is complete, the signed note is on the case and goes straight into the patient's chart.

X-rays, insurance, status and every conversation stay together with the patient's case, HIPAA compliant and encrypted. The front desk asks once. The office manager sees every question and answer. Each office replies on its own time.

Every conversation about a referral, in one secure place.

SOUND FAMILIAR?

One small question. Four phone calls.

"Has she been scheduled?" or "Do you have a newer X-ray?" turns into a call, a voicemail, an email to someone's inbox and a callback while you're with a patient.

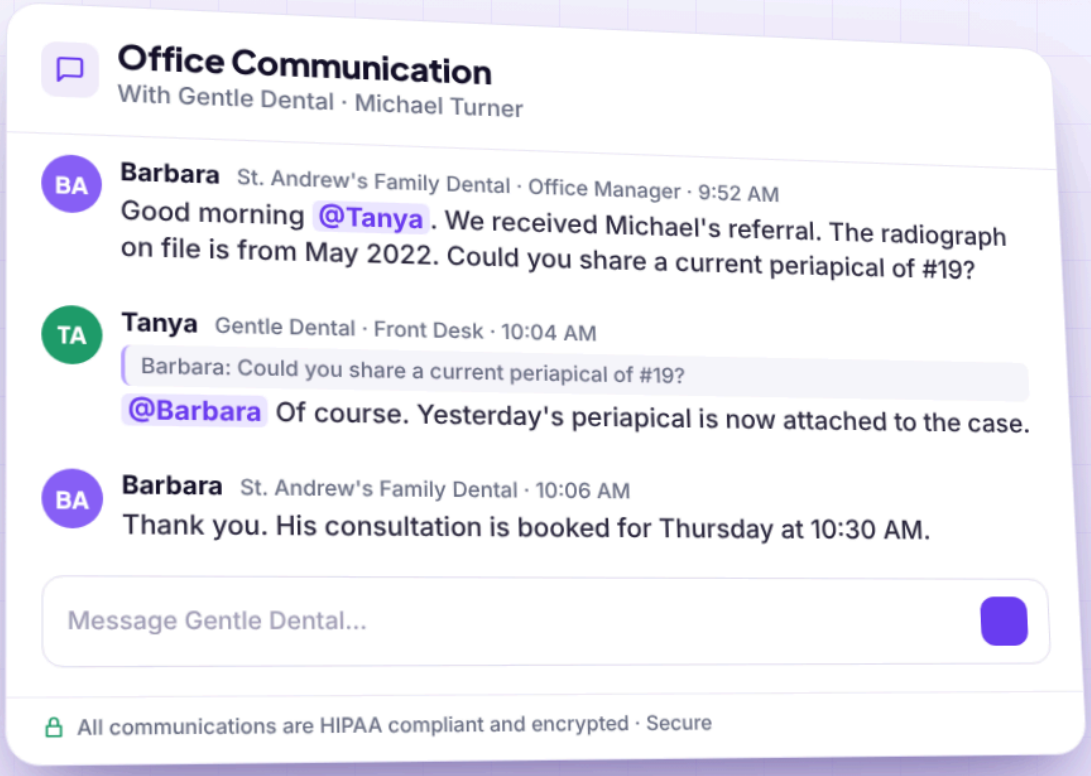

ToothReferral
Just Refer it

THE FEATURE

Message the other office right on the referral.

Secure cloud messages between the general dentist's office and the specialist's office, attached to the patient's case.

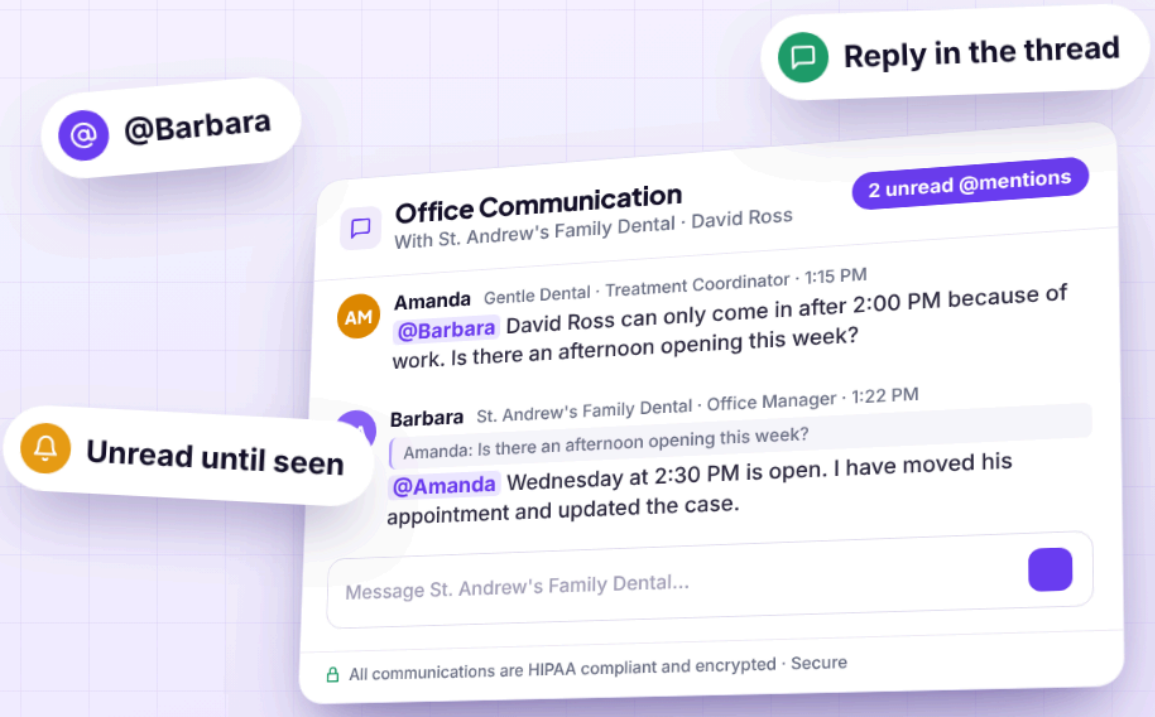

ToothReferral
Just Refer it

@MENTIONS

Tag the right person. They see it right away.

Need an afternoon slot? An @mention reaches the right teammate at either office, with an unread badge until they've seen it.

CONTEXT INCLUDED

Every message stays with the patient's case.

X-rays, insurance, status and the conversation, together. Nobody digs through email to find it.

ToothReferral
Just Refer it

VALUE FOR THE WHOLE TEAM

Less phone tag, whichever side you're on.

Front desk
Ask once, in writing. No hold music, no voicemail.

Office manager
Every question and answer is on the case, with a time stamp.

Both offices
General dentist or specialist, each side replies on their own time, from the same case.

Your patients
Details travel securely, never through texts or personal email.
