Where The Hell Is That X-Ray?

POV story, relatable panic turning into calm. Every specialist has lived the 4:58 PM missing-X-ray moment.

LENGTH	MADE IN	GOAL
8 clips × 8 s = 64 s	Google Flow, one 8 s clip per segment	Awareness and value, not a sale: no prices, no sign-up

Why this version

A story hook works with dental teams because they recognise it instantly; the dashboard then answers the exact problem in the hook, which shows the value without a sales line.

The whole script at a glance

00-08 s	**Hook** · “POV: it's 4:58, patient's in the chair, and the GP swears they sent the X-ray. Where the hell is it?”
08-16 s	**The usual suspects** · “Spoiler: it's buried in someone's inbox. Or a fax tray. Or page three of an email chain from June.”
16-24 s	**How it should work** · “Here's how it should work. Every incoming referral, from every office, in one list you can trust.”
24-32 s	**There it is** · “Open the patient, and the X-rays are right there, shared with both offices. Insurance card too, front and back.”
32-40 s	**Ask in the case** · “Missing something? Message the GP inside the case. Tag them, they answer, and it's saved with the patient.”
40-48 s	**No callbacks** · “Then update the status. The referring office sees it instantly. No callbacks, no "any update?" emails.”
48-56 s	**The network** · “And every office you work with stays connected. That's not just software. That's a referral network that works.”
56-64 s	**Close** · “So next time it's 4:58? You'll know exactly where that X-ray is. Calm. Collected. Connected.”

Presenter and set (paste into every clip)

Same presenter and set as the earlier ToothReferral videos (swap in your avatar's own description if it differs): a man in his early 30s, short dark textured hair, light stubble, grey knit crew-neck sweater, black podcast mic on a boom arm entering from frame left, warm home studio behind him (wooden shelf with plants, Edison-bulb lamps, soft purple-blue wall light). Vertical 9:16, medium close-up from mid-chest up, eye level, camera locked off, the same framing in every clip.

Before you generate

- **One clip = one segment = 8 seconds.** Keep every line to the words written (14 to 20 words fits 8 s at a natural pace). Longer lines get rushed or cut.
- **Start and end every clip in the rest pose.** Hands relaxed at chest height, looking at camera, mouth closed for about half a second at the very start and end. This is what lets me join the clips so they feel like one take.
- **Gestures happen inside the frame, at chest-to-shoulder height.** A hand that leaves the frame cannot be tracked, and the animation that rides on it has nowhere to land.
- **Point at the same places every time.** Upper-left = where the dashboard panel will appear. Right side = where chat / notifications appear. Keep these consistent so the animations always land where he points.
- **Paste the 'Flow prompt' block as is.** It already carries the look, the action, the expression and the spoken line. If Flow mutes or refuses a swear word, use the clean word in [brackets].

PINCH-OUT	fingers spread apart: zoom into the dashboard
JOIN	hands come together / fingers interlock: offices connect into one network
TOSS	flick over the shoulder: the old way gets thrown out of frame
