TOOTH REFERRAL · SCRIPTS 21 TO 23 · THE FEATURE SERIES

After "Buried in Emails": now show the software

Three scripts that build from the first video. Same front desk, same people (Tanya and Amanda, then Greg). Video 1 set the hook: referrals buried in emails, voicemails and faxes, and one promise, "every referral came in as one case". Each new episode takes one part of that promise and **shows it on the real screens**, feature by feature, and ends on a question that makes the viewer want the next one.

Vejay's notes this answers (13 Nov)

- "Build from the first video, the buried one." Every episode quotes a line from video 1 and pays it off.
- "Focus on showing the features of the software." Each clip names the exact Tooth Referral screen on view; the dialogue is two colleagues using it, not describing it.
- **A different feature set in every script (no repeats):** 21 is how a referral **arrives** (the website form), 22 is how it is **worked** (statuses, reminders, insurance request, notifications), 23 is how it is **closed** (notes and e-signature).
- "People need to turn the page with curiosity." Each script ends on an open question that the next episode answers.
- "Send me topics before you produce: hook, goal, and how it builds from the first video." The topics are below; nothing gets produced until you approve them.

Topics for approval

Script 21 · Episode 2 · The Form That Isn't a Form (How a referral arrives: the website referral form)

Topic	The website referral form: build it yourself in minutes, put it on your site, and every referral it receives starts a case instead of an email.
Hook	"The team said yes. So where do we even start?" · "With the form on our website. The one that just sends an email."
Goal	Show the first thing a new office does in the software, on screen, step by step. The viewer should think: "I could set that up this afternoon."
Builds from video 1	In video 1 Amanda said: "We replaced the form on our website with Tooth Referral. Every referral came in as one case." Video 1 only said it. This episode shows the replacement being built and the first test referral landing as one case.
Turns the page	Ends on: "That's just how it arrives. You're off tomorrow, right? Let's see how Greg does without you." (opens Script 22)

Script 22 · Episode 3 · Tanya's Day Off (How a referral is worked: anyone can pick it up)

Topic	Tracking and follow-up when a person is out: statuses on every referral, next-step reminders, automatic updates to the referring office, the insurance request link and the notifications feed.
Hook	"Tanya's out today. A month ago, that meant her referrals were out too."
Goal	Prove the "system for the team" idea with features. The viewer sees a colleague pick up every open referral in minutes and understands this is what protects the practice when staff are out.
Builds from video 1	In video 1 Tanya asked: "So if I'm out tomorrow..." and Amanda answered: "Greg opens it and knows exactly where it stands. No digging through anyone's email." This episode is that exact day. It also answers the old problem from video 1: "every referral lives in someone's inbox or someone's head".
Turns the page	Ends on: "What about the letters after treatment?" · "Oh, those write themselves. Ask Tanya tomorrow." (opens Script 23)

Script 23 · Episode 4 · The Letter That Writes Itself (How a referral is closed: notes, signed and sent before five)

Topic	Notes: templates that fill themselves in, your own letter imported from Word, e-signature, the signed note on the case for both offices, and copy into your electronic health record.
Hook	"It's ten to five, and Tanya has three completion letters to send. Why does she look so calm?"
Goal	Show the feature most offices do not expect from a "referral form": the paperwork after treatment. The viewer should see the letter fill itself in and get signed, and want to try it on their own letters.
Builds from video 1	Video 1 opened with a patient who never got a call back and a team "losing steam". This is the other end of the same referral: the loop closes on time, without staying late. It completes the journey the series has followed since video 1: arrives (21), worked (22), closed (23).
Turns the page	Ends on: "You know who should see this? The doctor." · "From the owner's chair? The numbers are a whole other conversation." (opens the Analytics episode)

Each script: 11 clips of about 8 seconds (about 90 seconds). Horizontal 16:9 like video 1, with the split-screen dashboard. Script only; filming prompts come after approval. Demo data: Gentle Dental (general dentist) refers to the specialist office where Tanya, Amanda and Greg work. No doctors are named.

SCRIPT 21 · EPISODE 2 OF THE SERIES

The Form That Isn't a Form

How a referral arrives: the website referral form · 11 clips · about 90 seconds · 183 spoken words

Topic	The website referral form: build it yourself in minutes, put it on your site, and every referral it receives starts a case instead of an email.
Hook	"The team said yes. So where do we even start?" · "With the form on our website. The one that just sends an email."
Goal	Show the first thing a new office does in the software, on screen, step by step. The viewer should think: "I could set that up this afternoon."
Builds from video 1	In video 1 Amanda said: "We replaced the form on our website with Tooth Referral. Every referral came in as one case." Video 1 only said it. This episode shows the replacement being built and the first test referral landing as one case.
Turns the page	Ends on: "That's just how it arrives. You're off tomorrow, right? Let's see how Greg does without you." (opens Script 22)
Cast and set	Tanya and Amanda, at the same front desk as Buried in Emails. The morning after the team meeting.

FEATURES SHOWN

Website Lead Forms · Referral Web Form · Logo and welcome message · Insurance Accepted display · "What we are known for" skill tags · Specialty and doctor routing · Form field toggles (tooth numbers, chief complaint, X-rays) · Live preview · Referral Access Code for regular referring offices · Get embed code · The referral lands in Incoming as one case

The script

	DIALOGUE	ON SCREEN (TOOTH REFERRAL)
01	**Where do we start?** **Tanya:** “The team said yes. So where do we even start?” **Amanda:** “With the form on our website. The one that just sends an email.”	Full frame. The old website form from video 1 appears small beside them with an email icon, greyed out.
02	**Replace it** **Amanda:** “Website Lead Forms. Referral Web Form. This replaces it.” **Tanya:** “We build it ourselves?”	Website Lead Forms page: the "Referral Web Form for Dental Specialists" card. Amanda clicks it; the builder opens.

03	**Make it ours** **Amanda:** “Our logo. A welcome message. And the insurance we accept, so nobody has to call and ask.”	Builder, left side: logo upload, welcome message, the Insurance Accepted display. Each lights up as she names it.
04	**Known for** **Tanya:** “'What we are known for.' Implants, wisdom teeth...” **Amanda:** “And it routes each referral to the right doctor.”	The "What we are known for!" skill tags being added, then Specialty & Doctor Routing.
05	**Click, click, click** **Amanda:** “Now pick what the dentist fills in. Tooth numbers. Chief complaint. X-rays.” **Tanya:** “Click, click, click.”	The toggles switch on one by one: Tooth Numbers, Chief Complaint, Referral Status, uploads.
06	**Live preview** **Tanya:** “And that's what they'll see?” **Amanda:** “Live preview. Exactly what Gentle Dental sees on our site.”	The Live patient preview on the right updates as each toggle changes: "Create New Referral".
07	**Access code** **Amanda:** “Offices that refer to us a lot get an access code. Their details fill in by themselves.” **Tanya:** “So Greg never types his address again.”	Referral Access Code (Company Access PIN). On the form, entering the PIN auto-fills the referring office details.
08	**Embed** **Amanda:** “Get embed code. Paste it on the website. Done.” **Tanya:** “That's it?”	The "Get embed code" button, the code copied, then the form live on the practice website.
09	**Test it** **Tanya:** “Okay, test it. I'm Gentle Dental, sending a patient... Submit.”	The website form filled in quickly (patient, tooth number, X-ray attached) and submitted.
10	**Not an email** **Amanda:** “Now look at Incoming.” **Tanya:** “It's already here. One case. Not an email.”	Incoming referrals list: the new row slides in with status "New". The greyed-out email icon from clip 1 dissolves.
11	**A system behind it** **Tanya:** “Same form on the outside. A whole system behind it.” **Amanda:** “That's just how it arrives. You're off tomorrow, right? Let's see how Greg does without you.”	Full frame. End card.

End card: Tooth Referral. Not just a form. A system. · toothreferral.com

SCRIPT 22 · EPISODE 3 OF THE SERIES

Tanya's Day Off

How a referral is worked: anyone can pick it up · 11 clips · about 90 seconds · 164 spoken words

Topic	Tracking and follow-up when a person is out: statuses on every referral, next-step reminders, automatic updates to the referring office, the insurance request link and the notifications feed.
Hook	"Tanya's out today. A month ago, that meant her referrals were out too."
Goal	Prove the "system for the team" idea with features. The viewer sees a colleague pick up every open referral in minutes and understands this is what protects the practice when staff are out.
Builds from video 1	In video 1 Tanya asked: "So if I'm out tomorrow..." and Amanda answered: "Greg opens it and knows exactly where it stands. No digging through anyone's email." This episode is that exact day. It also answers the old problem from video 1: "every referral lives in someone's inbox or someone's head".
Turns the page	Ends on: "What about the letters after treatment?" · "Oh, those write themselves. Ask Tanya tomorrow." (opens Script 23)
Cast and set	Greg and Amanda, same front desk, the next morning. Tanya is out.

FEATURES SHOWN

Incoming list with status filter · Contact statuses (Left a Voicemail, Callback Requested) · Next-step reminders · Scheduling from the status chips · Automatic status updates to the referring office · Request insurance from the patient (secure link) · Notifications feed

The script

	DIALOGUE	ON SCREEN (TOOTH REFERRAL)
01	**Out today** **Amanda:** “Morning, Greg. Tanya's out today.” **Greg:** “I know. A month ago, that would've scared me.”	Full frame. Amanda walks in with coffee; Greg is already at Tanya's workstation. Chip: "Tanya · out today".
02	**Everything she had** **Greg:** “Now I just open Incoming. Everything she was working on. Each one with a status.”	Incoming referrals list: rows with different status pills. He uses the Status filter.

03	**Where she stopped** **Greg:** “Michael Turner. 'Left a voicemail', yesterday, ten past four.” **Amanda:** “So you know exactly where she stopped.”	The case: Status & Schedule chips with "Left a Voicemail" selected and the time it was set.
04	**The reminder** **Greg:** “And she set a reminder. 'Check back in two business days.' It came to me this morning.”	"Next Step: Check back in 2 business days? Remind me on..." Then the reminder notification arriving today.
05	**He called back** **Greg:** “He just called back. Consultation scheduled. Tuesday, ten a.m.”	Greg clicks Consultation Scheduled, picks the date, Save & update status. Green success toast.
06	**They already know** **Amanda:** “Does his dentist need a call?” **Greg:** “They get the update automatically. Every status change.”	Split: the referring office (Gentle Dental) sees the same referral now marked "Consultation Scheduled".
07	**Missing insurance** **Greg:** “This one's missing insurance. Before, I'd be calling the patient all day.” **Amanda:** “And now?”	Another case: the Insurance cards panel is empty. The button "Request from patient" pulses.
08	**Request from patient** **Greg:** “Request from patient. She gets a secure link and takes a picture of her card. Sent.”	Click on Request from patient. Green toast: "Success · Insurance request sent".
09	**She sent it** **Amanda:** “And we find out how?” **Greg:** “Right here. 'Patient submitted insurance.' Front and back, on the case.”	Notifications feed: "patient submitted insurance". The card images appear in the Insurance panel.
10	**Everything that moved** **Greg:** “Notifications shows me everything that moved. Every office we work with, one feed.”	Notifications feed with the tabs All / Unread / Read and the Type filter (Status, Mentions, Insurance Submission).
11	**Twenty minutes** **Amanda:** “Twenty minutes, and nothing's waiting on Tanya.” **Greg:** “What about the letters after treatment?” **Amanda:** “Oh, those write themselves. Ask Tanya tomorrow.”	Full frame. Behind them, every row on the Incoming list has moved on one step. End card.

End card: Tooth Referral. Whoever opens it knows where it stands. · toothreferral.com

SCRIPT 23 · EPISODE 4 OF THE SERIES

The Letter That Writes Itself

How a referral is closed: notes, signed and sent before five · 11 clips · about 90 seconds · 170 spoken words

Topic	Notes: templates that fill themselves in, your own letter imported from Word, e-signature, the signed note on the case for both offices, and copy into your electronic health record.
Hook	"It's ten to five, and Tanya has three completion letters to send. Why does she look so calm?"
Goal	Show the feature most offices do not expect from a "referral form": the paperwork after treatment. The viewer should see the letter fill itself in and get signed, and want to try it on their own letters.
Builds from video 1	Video 1 opened with a patient who never got a call back and a team "losing steam". This is the other end of the same referral: the loop closes on time, without staying late. It completes the journey the series has followed since video 1: arrives (21), worked (22), closed (23).
Turns the page	Ends on: "You know who should see this? The doctor." · "From the owner's chair? The numbers are a whole other conversation." (opens the Analytics episode)
Cast and set	Tanya and Amanda, same front desk, late afternoon. Amanda has her coat on.

FEATURES SHOWN

Status change prompts the note · Note templates with smart variables (auto-filled) · Import your own letter from Word or PDF · Show values / preview · Who signs: route to a doctor to sign · E-signature (DocuSign) · Signed notes visible to both offices · Copy into your electronic health record · Save as a new template

The script

	DIALOGUE	ON SCREEN (TOOTH REFERRAL)
01	**Ten to five** **Amanda:** “It's ten to five. Why do you look so calm?” **Tanya:** “Three completion letters to send. Watch this.”	Full frame. Clock chip: 4:50 PM. A small stack of three "Completion letter" cards beside Tanya.
02	**It asks for the note** **Tanya:** “Emma Park's treatment is done. I mark it Completed...” **Amanda:** “...and it asks you for the note.”	She clicks Completed. The note creator opens by itself ("Prepare note").

03	**Our own letter** **Tanya:** “That's our own letter. We imported it from Word. Now look at the names.”	Template picker, then the letter. "Import from Word / PDF" button visible. The purple variable chips light up one by one.
04	**All filled in** **Tanya:** “Her name, date of birth, the referring office, today's date. All filled in.” **Amanda:** “You didn't type any of that?”	Close-up of the letter: Patient Name, Patient DOB, Referring Office Name, Today's Date switch from codes to real values (Show values).
05	**Two lines** **Tanya:** “It pulls it from the case. I just add two lines about the visit.”	She types two short lines in the body. Preview.
06	**Route it** **Amanda:** “But the doctor has to sign it.” **Tanya:** “So I route it to the doctor. One click.”	"Who signs this note?" · I'll sign it myself · Sign on behalf of a doctor · Route to a doctor to sign (selected).
07	**Signed** **Tanya:** “Signed. No printing, no scanning, no fax.”	The e-signature step: signature placed, Finish, then "All done — your document is signed!" and the green success toast.
08	**Both offices** **Amanda:** “And Gentle Dental?” **Tanya:** “It's on the case. Greg can open it right now.”	Signed notes panel: "Completion Note · Signed · Visible to both offices". Split: the same note on Gentle Dental's side.
09	**Our chart** **Amanda:** “What about our own chart?” **Tanya:** “Copy, paste. Straight into our electronic health record.”	The line "Copy and paste into your patient electronic health record as a note" with the copy action highlighted.
10	**Next time** **Tanya:** “And I saved it as a new template. Next time, it's one click.” **Amanda:** “We used to stay late for those letters.”	"Save as New Template". The three letter cards from clip 1 tick off: sent, sent, sent. Clock chip: 4:58 PM.
11	**The owner's chair** **Amanda:** “You know who should see this? The doctor.” **Tanya:** “From the owner's chair? Oh, the numbers are a whole other conversation.”	Full frame. Tanya picks up her bag. A one-second glimpse of the Analytics page, blurred. End card.

End card: Tooth Referral. Completion letters that write themselves. · toothreferral.com
