TOOTH REFERRAL · INSURANCE

Stop chasing insurance cards.

One click sends the patient a secure link. Their card lands on the case.

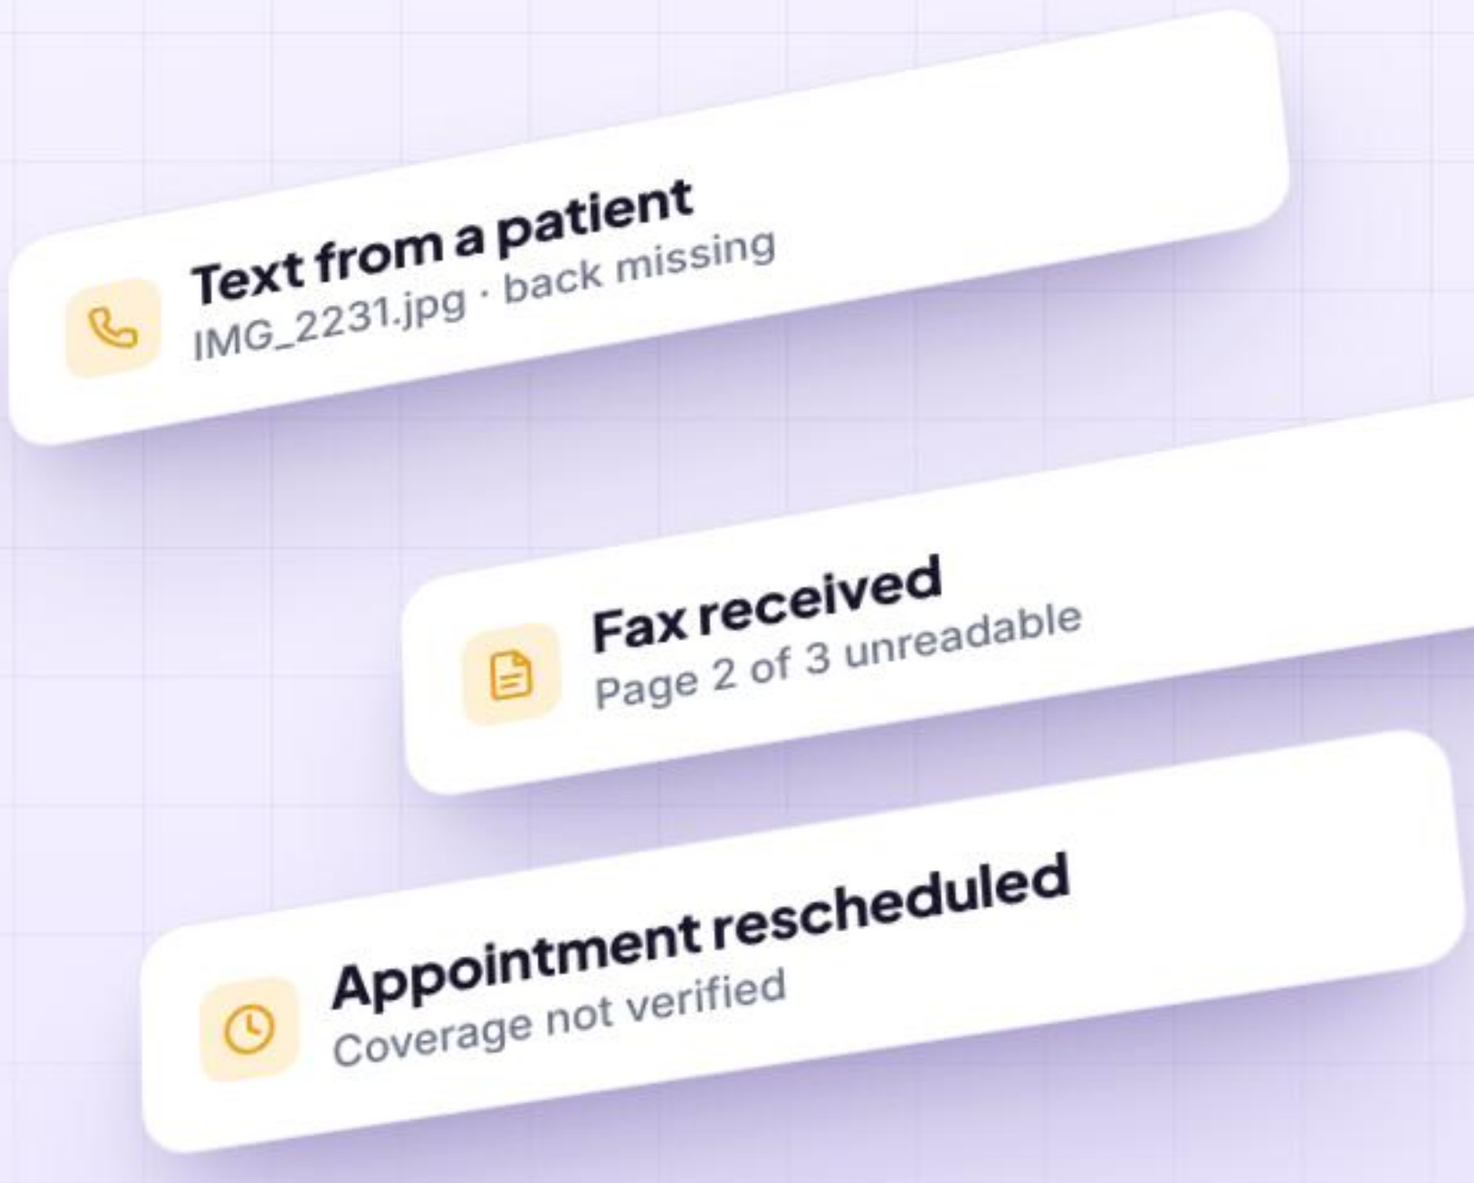

Front & back received

Swipe →

SOUND FAMILIAR?

"Can you text us a photo of your card?"

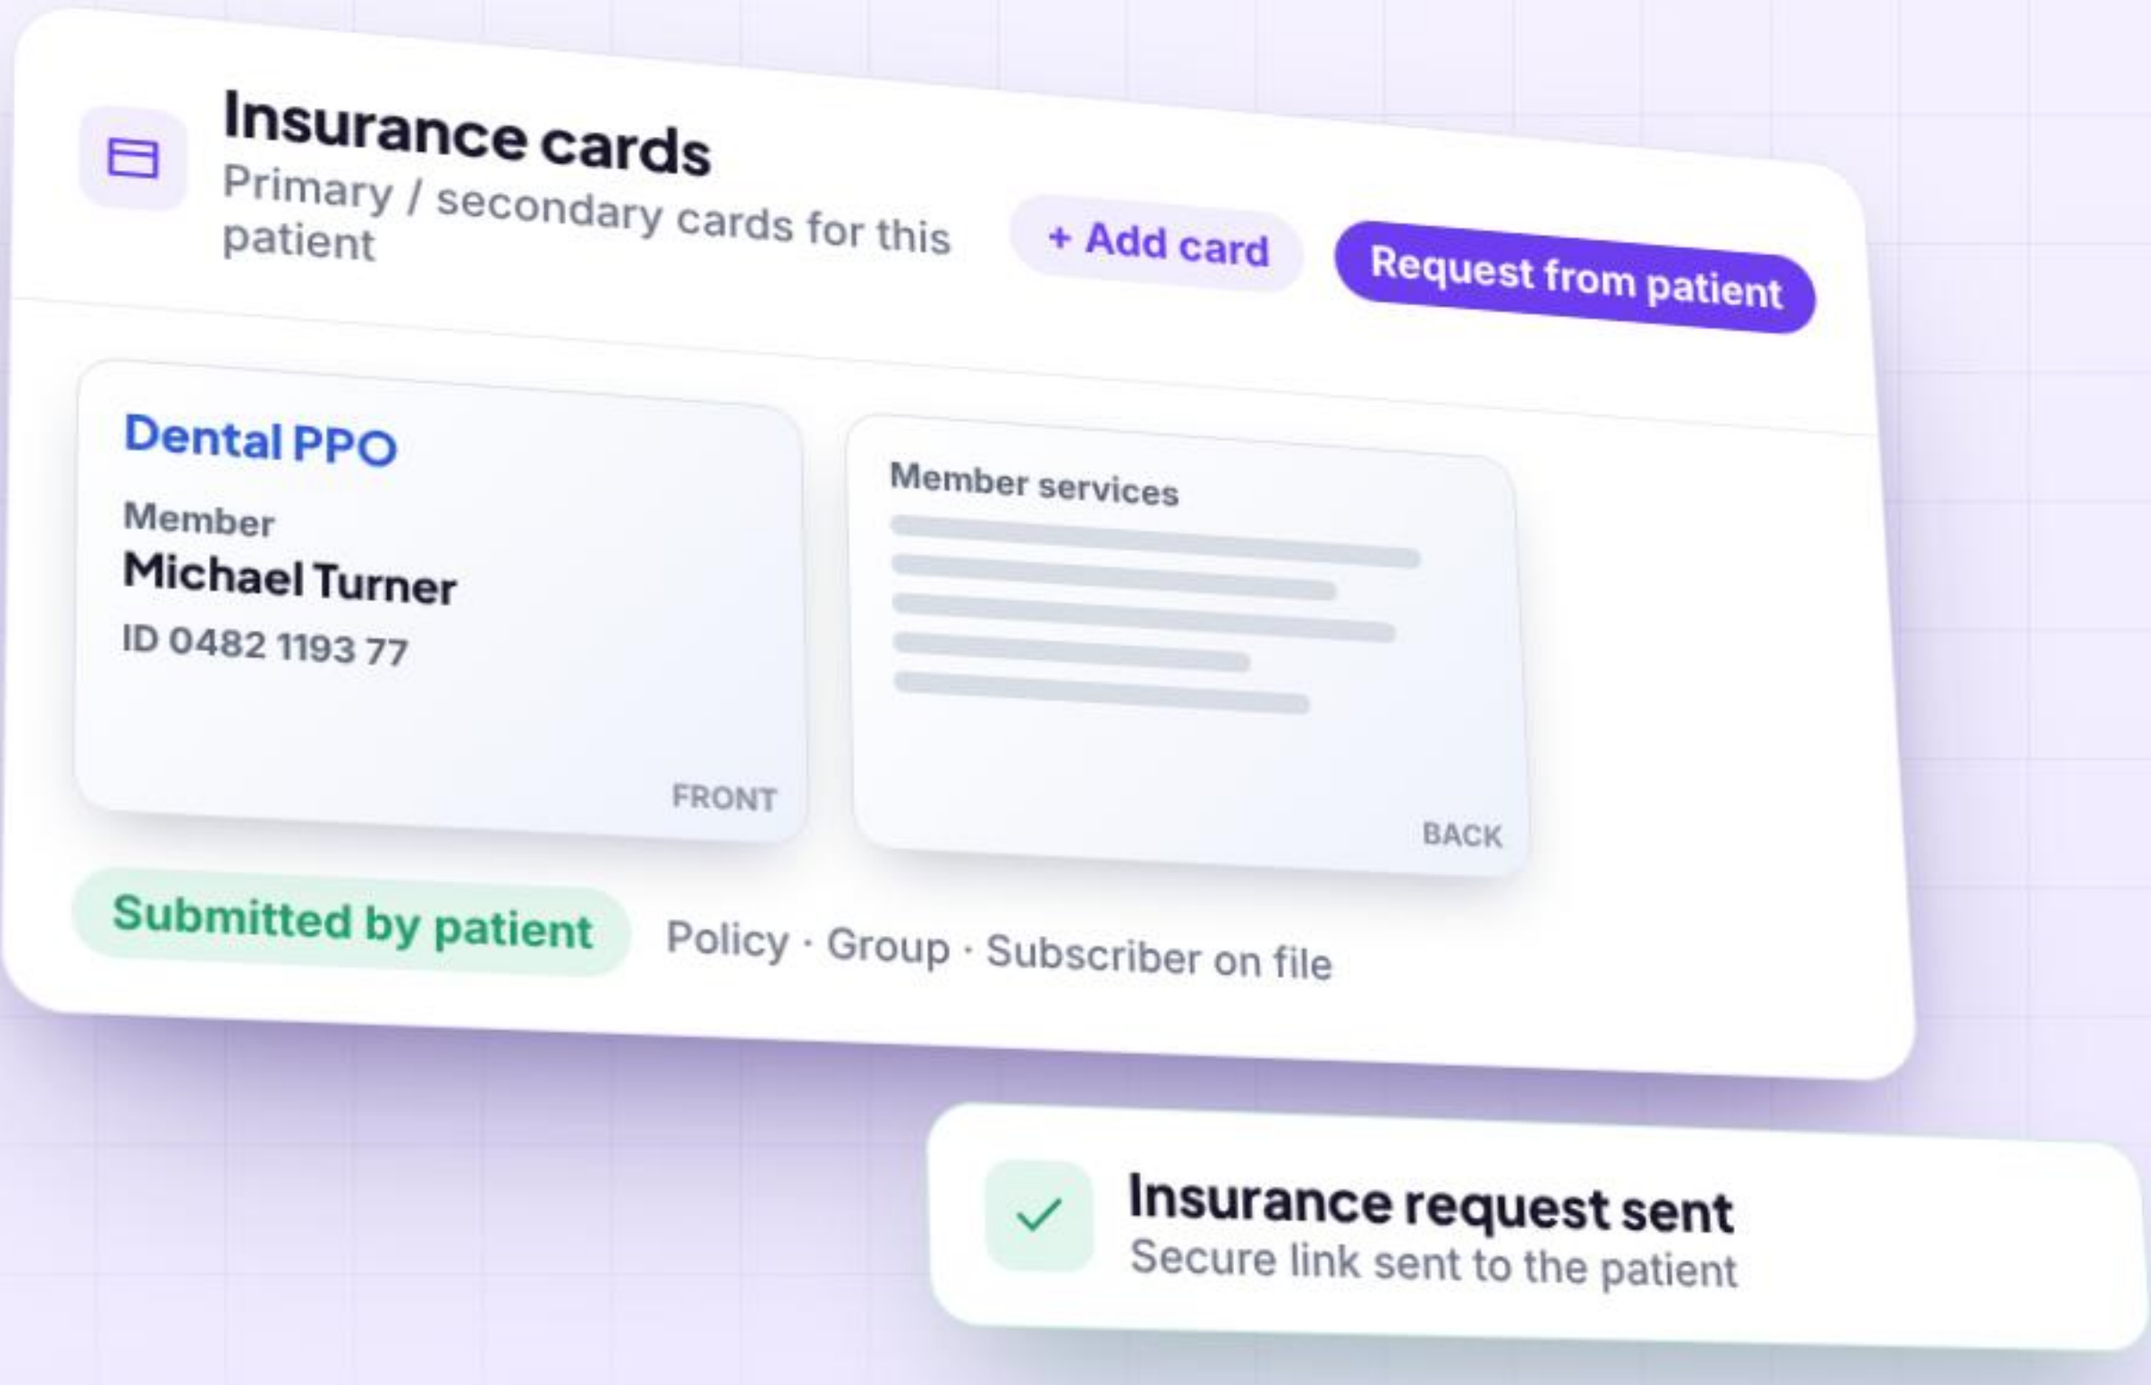

Insurance chaos: photos in personal texts, blurry faxes, missing backs and patients sent home because coverage wasn't checked.

THE FEATURE

One click: Request from patient.

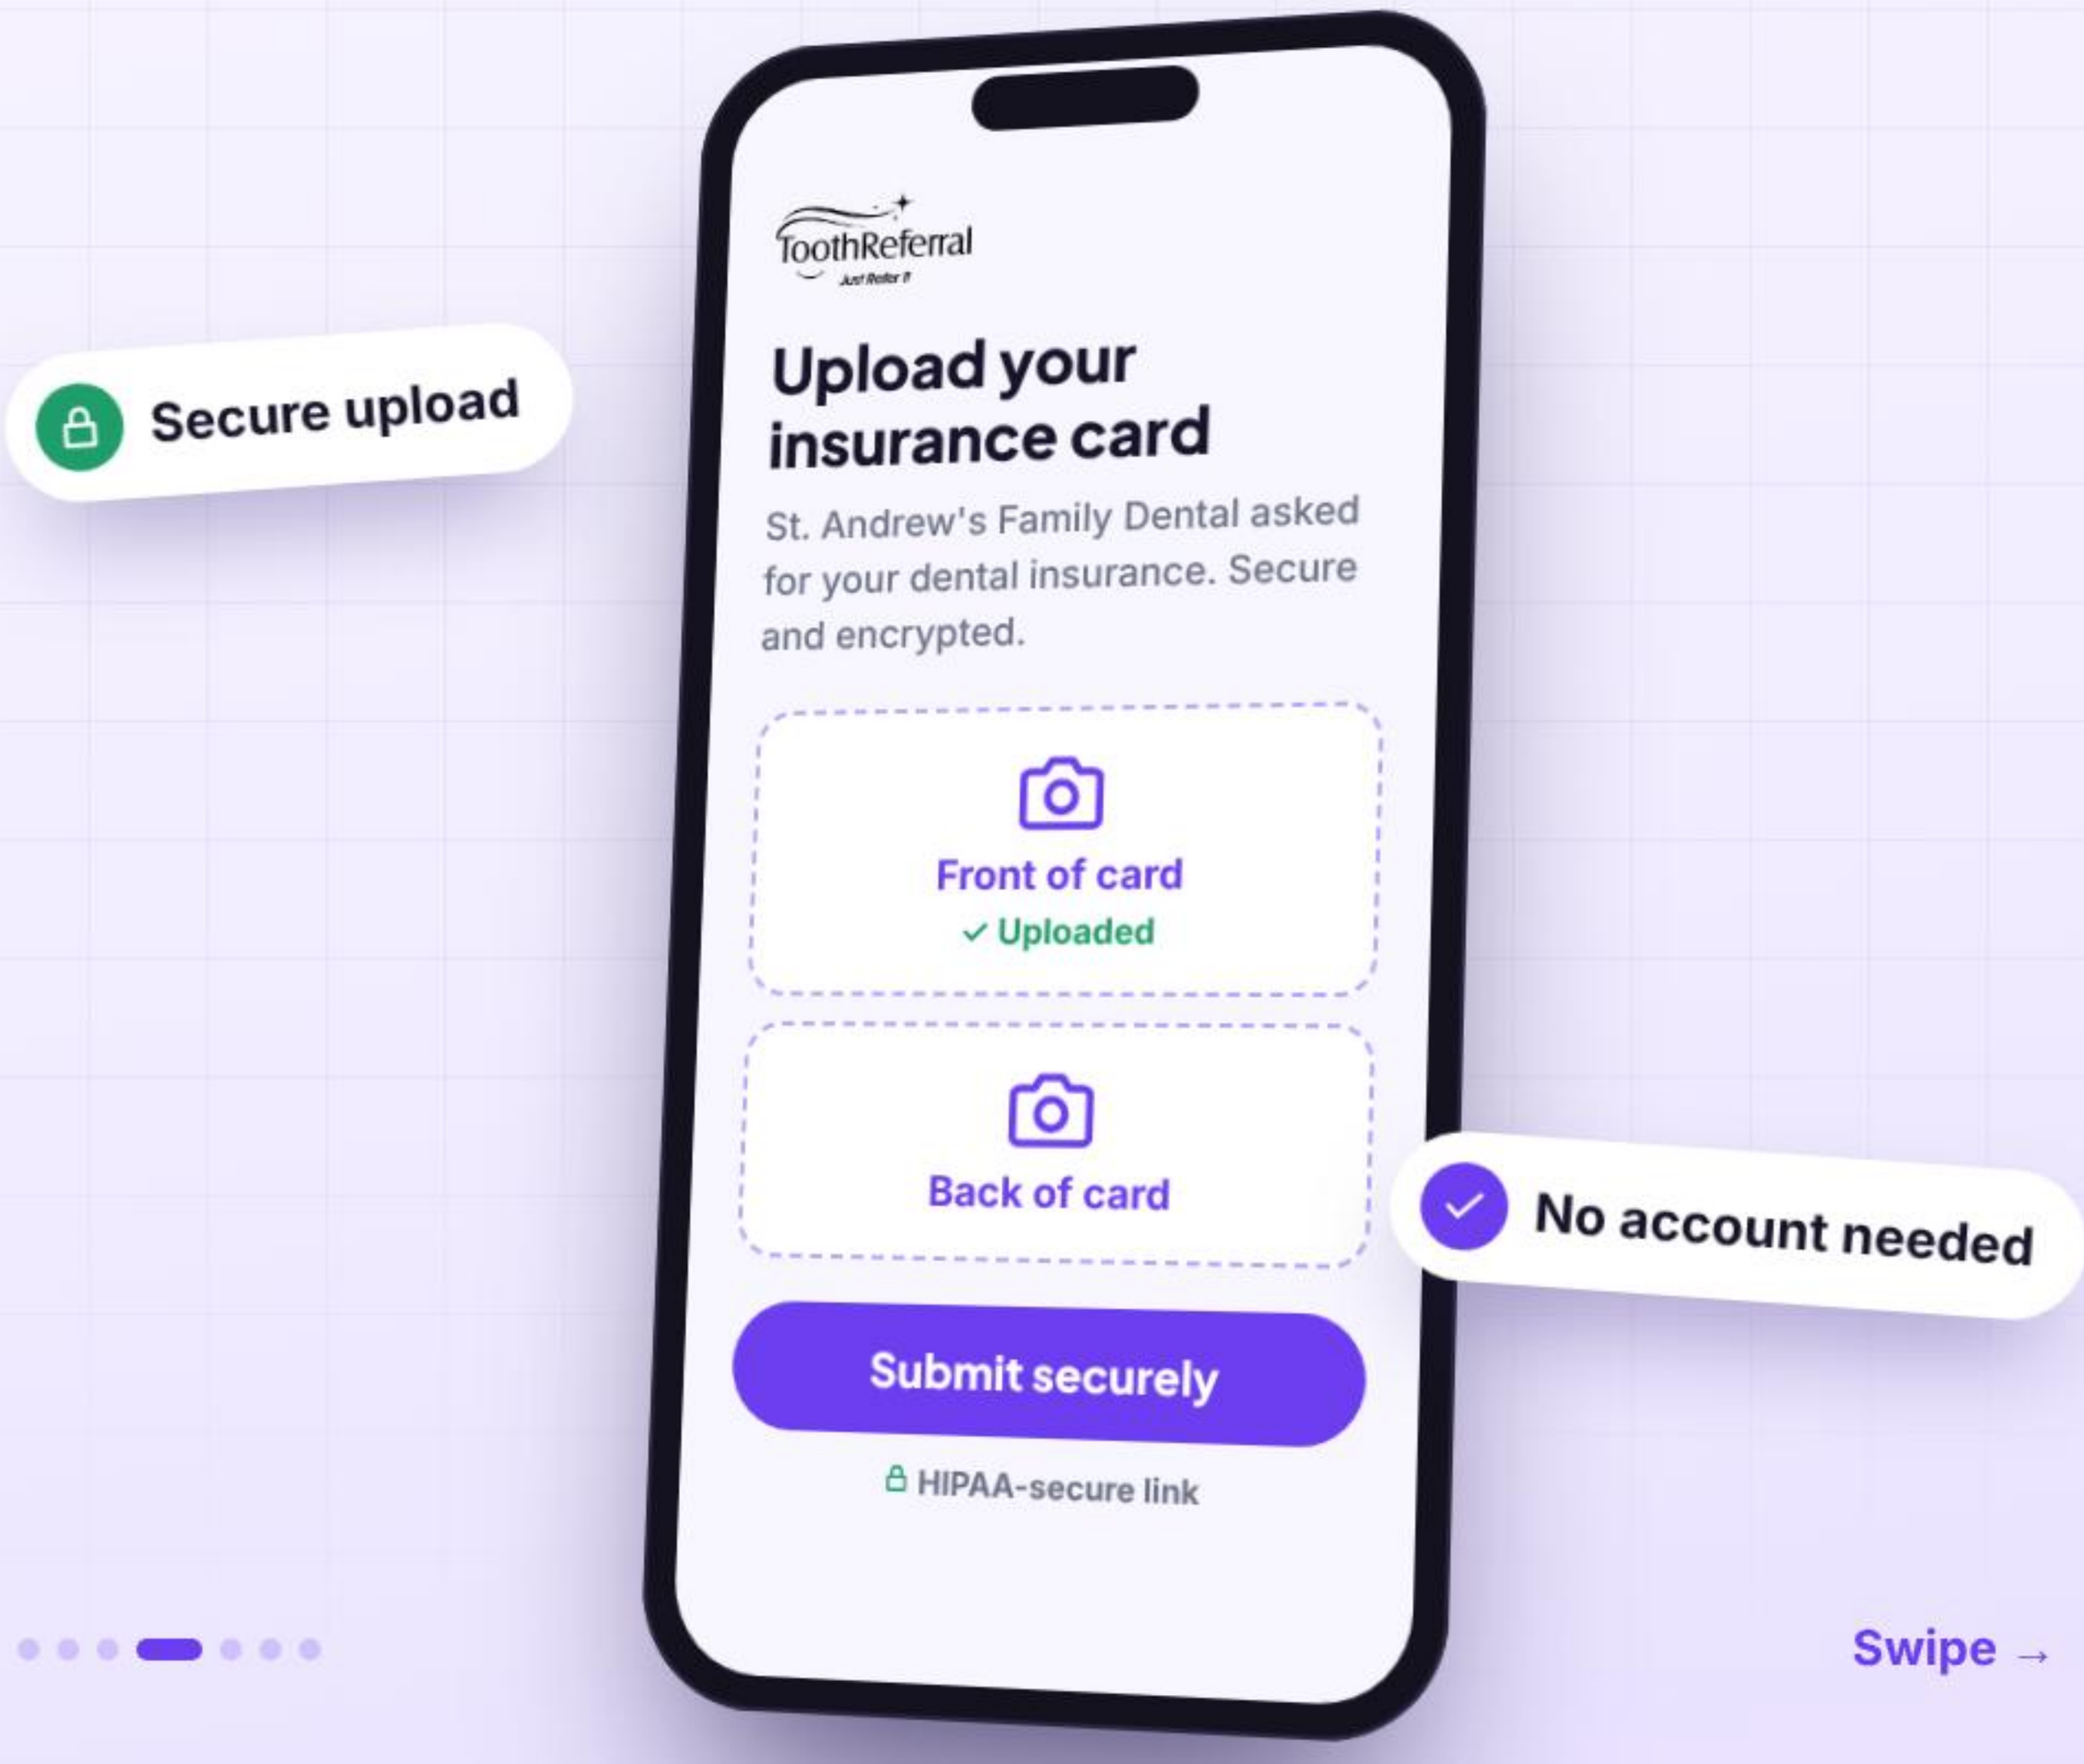

Either office, general or specialist, sends a HIPAA-secure link from the referral. No account needed for the patient.

THE PATIENT'S SIDE

Snap the front and back. Done.

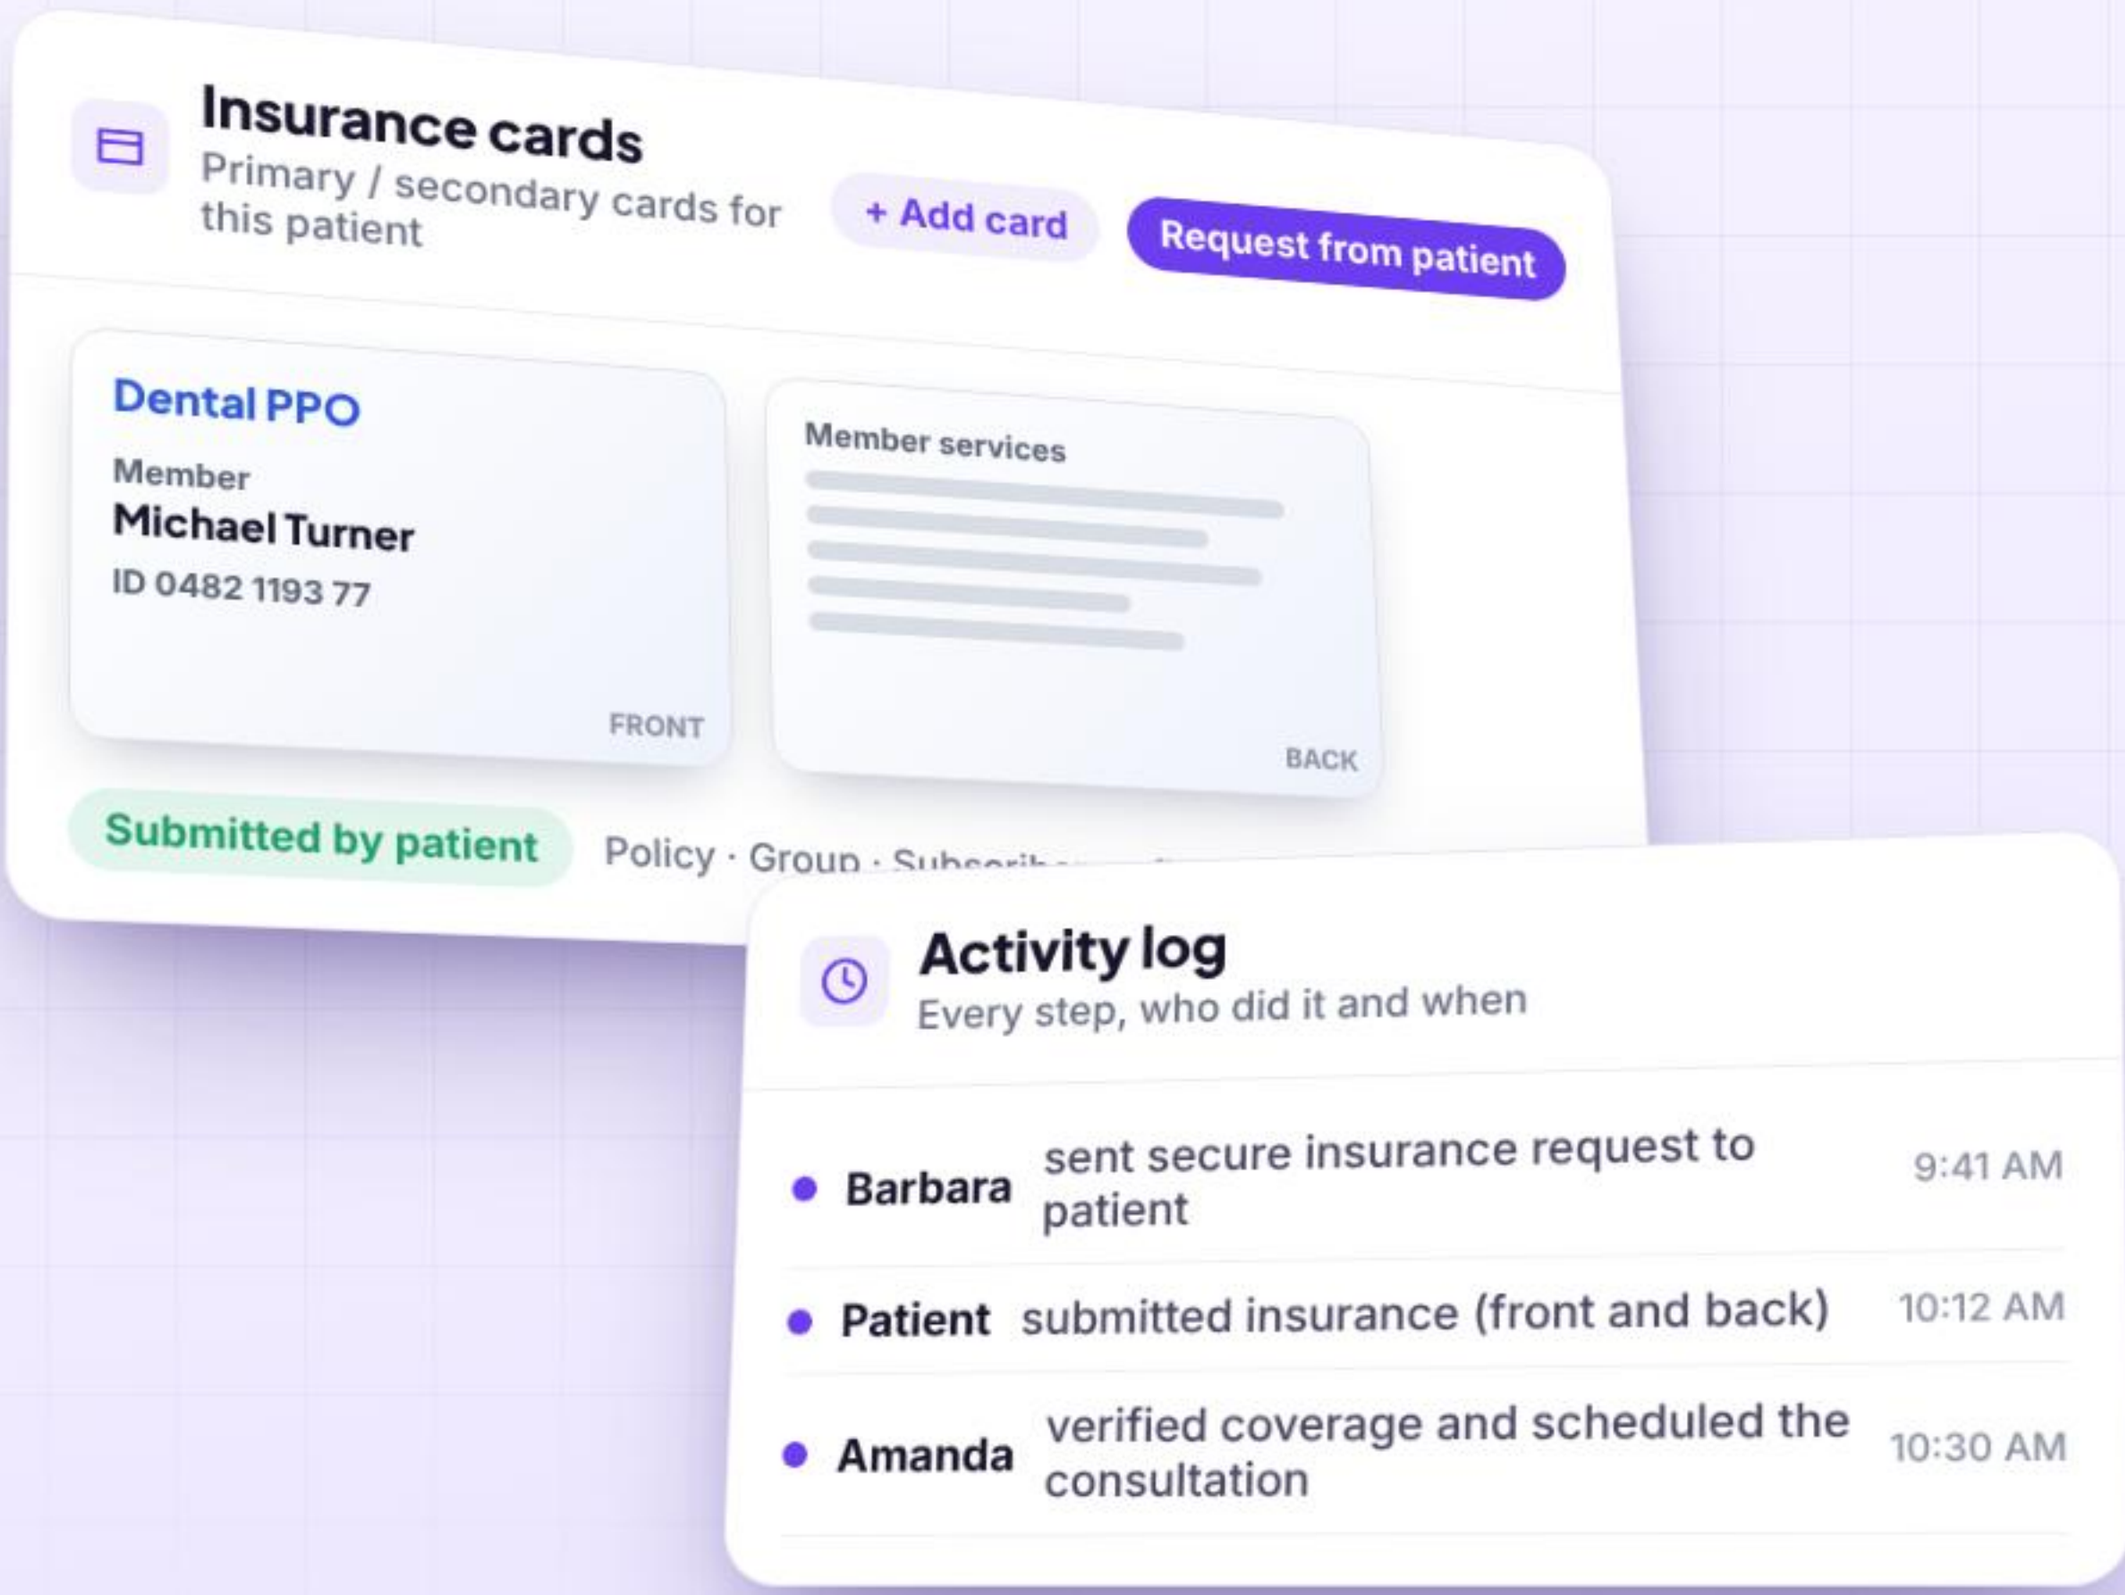

Patients upload their own card from their phone, securely, before the first visit.

ON THE CASE

The card lands right on the referral.

Front and back, policy and group, logged with who asked and when.

Swipe →

VALUE FOR EVERYONE

Fewer calls to verify insurance.

Front desk
No more chasing photos, faxes or callbacks.

The specialist's office
Coverage is on the case before the consultation.

The general dentist's office
Refers the patient without chasing the card first.

The patient
Shares it once, securely, from their phone.

ToothReferral
Just Refer it

No more insurance chaos. Just refer it.

The patient uploads their own card through a HIPAA-secure link, and it arrives on the referral, ready to verify.
